Wireless mortise lock with ENGAGE™ technology

Overview

The Schlage® LE wireless mortise lock with ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building beyond traditional perimeter and high security openings. The LE is ideal for commercial real estate, K-12, higher education, assisted living, medical offices, or multi-family applications. Facilities can benefit from the enhanced security, efficiency, and convenience of upgrading to electronic credentials.

LE wireless locks simplify installation by combining the lock, credential reader, door position sensor and request-to-exit switch all in one unit. LE wireless locks require only minor modifications to existing mechanical mortise prep with no wires to run to the lock or additional hardware necessary. LE suites with the most popular Schlage L Series decorative levers, keyways, and finishes, providing attractive options to meet the requirements of nearly any facility. LE is ideal for office and suite entries, conference rooms, common area doors, resident units, and sensitive storage areas with a mortise door prep.

Built-in Bluetooth® enables LE wireless locks to connect directly to smart phones and tablets; no need for a proprietary handheld device for set-up and configuration. And with built-in Wi-Fi®, LE locks can connect directly to an existing Wi-Fi network enabling automatic updates to lock configuration and user access. With the ENGAGE cloud-based web and mobile apps, it's easy to configure lock settings, add users, and view audits and alerts from anywhere.

For advanced capabilities including networked real-time communication with the ENGAGE™ Gateway, LE wireless locks can be managed with software from one of our access control alliance members. For additional details, please refer to the LE Integrations found in the Alliances menu on our website at www.us.allegion.com.

LE wireless locks are compatible with most proximity and smart cards including aptiQ® and aptiQmobile™.
Features and benefits

- Designed to be easy to install, connect, manage, and use for perimeter and interior door applications

- Suites with mechanical L Series with 28 levers and 2 knobs

- Weather-resistant design for use on perimeter doors
