

# NDE

Wireless lock with ENGAGE™ technology

### Overview

The Schlage® NDE wireless cylindrical lock with ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building beyond traditional perimeter and high security openings. Whether commercial real estate, K-12, higher education, assisted living, medical offices, or multi-family, nearly any facility can benefit from the enhanced security, efficiency, and convenience of upgrading to electronic credentials.

NDE wireless locks simplify installation by combining the lock, credential reader, door position sensor and request-to-exit switch all in one unit. NDE wireless locks utilize standard ND cylindrical door prep and can be installed in minutes with only a Phillips screwdriver; no need to install additional components, drill holes or run wires to each opening. NDE suites with the most popular Schlage ND levers, keyways, and finishes, providing attractive options to meet the requirements of nearly any facility. NDE is ideal for office and suite entries, conference rooms, common area doors, resident units, and sensitive storage areas with a cylindrical door prep.

Built-in Bluetooth® enables NDE wireless locks to connect directly to smart phones and tablets; no need for a proprietary handheld device for set-up and configuration. And with built-in Wi-Fi, NDE locks can connect directly to an existing Wi-Fi network enabling automatic updates to lock configuration and user access. With the ENGAGE cloud-based web and mobile apps, it's easy to configure lock settings, add users, and view audits and alerts from anywhere.

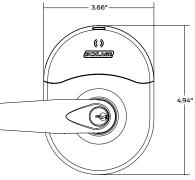

For advanced capabilities including networked real-time communication with the ENGAGE™ Gateway, NDE wireless locks can be managed with software from one of our access control alliance members. For additional details, please refer to the NDE Integrations found in the Alliances menu on our website at us.allegion.com.

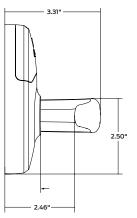

NDE wireless locks are compatible with most proximity and smart cards including aptiQ $^{\text{TM}}$  and aptiQmobile. $^{\text{TM}}$ 

## Features and benefits

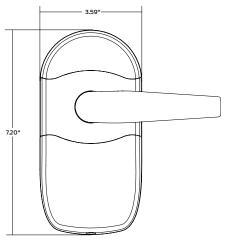

- Designed to be easy to install, connect, manage, and use
- Fits mechanical ND door prep with no additional holes
- Installs in minutes with only a Phillips screwdriver
- Weather resistant design for use on perimeter doors
- Lever handing is field reversible in seconds; no tools required
- Innovative integrated door position sensor requires no additional door prep
- Built-in Bluetooth® enables wireless configuration from smart phones and tablets
- Built-in Wi-Fi® enables automatic daily updates sent directly from host software
- Enables networked real-time communication with the ENGAGE Gateway and software alliances
- Up to 2 years of battery life
- Compatible with major brands of key systems
- ANSI/BHMA A156.25 (Indoor/Outdoor), ANSI/BHMA Grade 1, UL 294, UL10C, FCC Part 15, ADA, RoHS, Industry Canada (IC)

### Flexible solutions

NDE wireless locks offer connectivity options to fit any size budget or business.

- 1 Mobile
- 2 No-Tour with MT20W
- 3 Wi-Fi
- 4 Real-time with ENGAGE Gateway

# ENGAGE™ cloud-based web and mobile applications

The ENGAGE cloud-based web and mobile applications deliver simple and convenient site set-up with basic access management for users and locks.  $^{1,3}$  Please refer to the ENGAGE data sheet for additional detail.

- Maximum database storage capacity of lock. Can vary upon access control software database capacity when linked with an ENGAGE Gateway RS-485 to ACP.
- <sup>2</sup> Maximum audit storage capacity of lock. Can vary upon access control software audit storage capacity when linked with an ENGAGE Gateway RS-485 to ACP.
- Response time does not include latency time of host when linked with an ENGAGE Gateway or when using No-Tour.
- Assuming indoor application, 13.56 MHz CSN credential, 100 actuations and one Wi-Fi update per day.
- Consult your access control software provider for specific scope of support.
- Software indicates lock/unlock status based on sequence of events.
- When using the ENGAGE cloud-based access management software.

# Benefits of NDE multi-technology readers:

- Reads both proximity (125 kHz) and smart (13.56 MHz) technologies with single device
- NDE multi-technology readers are NFC compatible <sup>1</sup> and enable use with aptiQmobile credentials
- Allows end user to migrate to more secure credentials over time and as budgets permit

<sup>&</sup>lt;sup>1</sup> Please refer to aptiQmobile compatibility chart for a list of certified devices

 $<sup>^2\ \ \</sup>text{No-tour functionality requires minimum 1K byte/8k bit Allegion smart credential and MT20W enrollment reader}$
