

CONCEALED DOOR LOOP

- CONTINUOUS HINGE APPLICATIONS
- BUTT HINGE APPLICATIONS
- EASY INSTALLATION
- SUPPORTS UP TO 180° SWING
- 3-YEAR WARRANTY

This patented Concealed Door Loop (CDL) is a low cost method of transferring low voltage power from the door frame to the locking device. Whereas typical door loops are surface mounted and remain constantly visible, the CDL slides into the door and/or frame completely concealing itself when the door is closed. Designed for Continuous and Butt hinge applications that are either full mortise, half mortise or half surface and have a standard throw. Commonly installed where ETH hinges are cost prohibitive and surface door loops are not desired. The CDL's aesthetic appeal will benefit retrofits and new installations alike.

SPECIFICATIONS

FEATURES:

- Available in aluminium or black finishes
- Durable finish
- Easy Installation
- Variable mounting locations
- Special 1/4" flexible armoured conduit
- Supports up to 180° swing

PRODUCT DETAILS:

- Zip Lock Bag: 6" x 4": x .5"
- Weight: .5 Lbs
