1 Cone Loudspeakers, Systems & Subwoofers

Strategy Series II 4", 6" & 8" Loudspeaker Systems	16-17
Strategy Series II "Mother Board" Assemblies	16-17
Strategy Series 4", 6" & 8" Loudspeaker Systems	18-20
8" & 12" Coaxial Speakers	21
Great Deals & Super Deals	21
4", 8", and 12" Loudspeaker Drivers	22
Constant-Voltage Transformers	23
8" Loudspeaker/Transformer/Baffle Packages	24-25
Professional Quality Ceiling Loudspeakers	26-27
Open-Ceiling, Beam-Mounting Loudspeakers	27-28
4" Loudspeaker/Transformer/Baffle Packages	28
Atlas Sound® Architectural Series In-Ceiling/In-Wall Speakers	28
Atlas Sound® Standard Series In-Wall Speakers	29
Garden Speaker, Indoor/Outdoor Mini-Loudspeaker Systems	30
Noise Masking Processor	30
Atlas Sound® Subwoofer Systems	31

2 Environment-Resistant Loudspeakers —Compression Drivers & Horns

Professional Omni-Purpose® AP Series Loudspeakers	32
New APX Constant Directivity Loudspeakers	33
Intercom, Paging & Alarm Loudspeakers	34
UL Listed AP Series Voice Control™ Loudspeakers	34
Indoor/Outdoor Music Loudspeakers	35
Reflex Sound Horns	35
High-Efficiency Compression Driver Units	36
Explosion-Proof Loudspeakers	36
Transformers & Accessories	37

3 Loudspeaker Baffles & Enclosures

Baffle/Enclosure Mounting Guide	38-39
Cylindrical Baffles for 4" and 8" Loudspeakers	40
Round Recessed Baffles for 4" and 8" Loudspeakers	40
Round Recessed Baffles for 4", 8" & 12" Loudspeakers	41-42
Square Recessed Baffles for 8", 12" & 15" Loudspeakers	43
Surface Baffle/Enclosures for 4" and 8" Loudspeakers	44
Ceiling Tile and Concrete Block Replacement Baffles	45
High-Impact Plastic Baffles	45
Vandal-Proof Baffles	46
Digital Clock/Speaker Baffles and Enclosures	47
Combination Clock/Speaker Baffles and Enclosures	47
Fire-Rated Enclosure Systems	48-49
EZ-Mount Enclosure System for Suspended Ceilings	50
Blind-Mount Enclosure System for Difficult Access Ceilings	51
Enclosures for Extended Loudspeaker Performance	52
Enclosures for High-Performance Professional Loudspeakers	52
Round Protective Enclosures for Recessed Installation	52-53
Rectangular Recessed & Surface Protective Enclosures	54
Baffle/Enclosure Mounting Accessories	55-56

4 Attenuators, Devices—Volume Control Accessories & Hardware

Industry Standard Commercial Attenuators	57
Atlas Sound® WhisperTouch® Volume Controls	58
Atlas Sound® Speaker Switching Systems	59
Wall Plates & Microphone Floor Boxes	60
Hardware Accessories & Touch-Up Paint	61

5 IR Repeater Systems, Power Supplies & Electronic Accessories

Atlas Sound® Infrared Repeater System & Devices	62
Power Supplies/Electronic Accessories	63-65

6 Emergency Communications Systems & UL Listed Loudspeakers (Life Safety)

UL Listed Emergency Telephone Communications System	67
UL Listed Emergency Telephone Assemblies & Components	67-68
Emergency Telephone Cabinets	68
UL Listed Voice/Tone™ Emergency Loudspeakers	69
Installation Accessories for Voice/Tone™ Loudspeakers	70
UL Listed 4" & 8" Fire Protective Signaling Loudspeakers	71

7 Audible & Visual Signaling Devices —Siren Loudspeakers

Electronic Siren Loudspeakers and Replacement Kits	72
Voice/Tone™ "Basic" Environment-Resistant Drivers	73

8 Intercom/Telecom System Components & Accessories

Vandal-Proof Intercom Stations - New VPCS Series	74
Weatherproof Intercom Stations	75
Visikom Intercommunication System	75
PageKom® Intercommunication Systems	76
Intercom Station Assemblies and Wall Plates	77
Telephone Intercom Stations and Accessories	77

9 Sound Masking Loudspeakers, Systems & Generators

Sound Masking Loudspeaker Systems & Generators	78
8" and 4" Sound Masking Loudspeakers	79

10 Enclosure Systems—Cabinets, Racks, Consoles & Accessories

Cabinet Section Index	80
Standard Series 19" Floor Cabinets and Racks	81-83
Standard Series 19" Wall and Desk Cabinets	84-85
Heavy-Duty Vertical Cabinets & Accessories—Series 5000	85-88
Modular Consoles/Easy-Order Assemblies—Series VI	89-92
Modular Consoles/Piece-Part Components—Series VI	93-94
Desk Configurations—Series VII	95
Functional Add-ons: Panels	95
Functional Add-ons (Shelves & Drawers): for 19" Cabinets	96-97
Functional Add-ons: for Series 5000, VI & VII	97
Functional Add-ons: General	98
Paint Colors	99
Functional Add-ons: General & Electronic Access.	100-101
Functional Add-ons: Cooling Access. Panels	102

11 Atlas Sound Microphone & Equipment Stands, Booms & Accessories

Microphone Floor Stands	103
Performer Series & Musician Series Tripod Stands	104
Studio Boom Stands	105
Instrument Miking Stands	105
Performer Series & Traditional Boom Attachments	106
Loudspeaker Equipment Stands & Adapters	107
Desk & Banquet Stands	108
Accessories, Adapters, Fittings & Replacement Kits	109

12 Professional Series Speakers

1000 Series Loudspeakers	110
2000 Series Loudspeakers	110
Professional Stage Monitors	111
Single Reflex Bandpass Subwoofer	111

INDEX

112-115

NEXT GENERATION STRATEGY SERIES II SPEAKER SYSTEMS—THE DEFINITIVE CHOICE FOR COMMERCIAL AND BUSINESS APPLICATIONS

In 1991, Atlas Sound shook the commercial sound industry with the introduction of the Strategy Series commercial loudspeaker systems. Strategy Series set the benchmark for “step-up” business and commercial ceiling speaker systems. Since the original Strategy Series introduction many have copied the original Strategy Series concept but few have ever come close to performance of the product that has been the choice of consultants, specifiers and contractors for years. Why? The smooth frequency response, even, wide coverage, sonically pleasing voicing and ease of installation of the Strategy Series have stood the test of time.

The Next Generation

Atlas engineers have taken all feedback received over the years for suggested enhancements to Strategy Series and employed advanced new manufacturing techniques to present Strategy Series II, a series that will once again “re-set the bar” for commercial audio ceiling speaker systems.

New models include

The **FAP42T** 70.7/100V tuned & ported 4" coaxial ceiling speaker system

The **FAP62T** 70.7/100V tuned & ported 6" coaxial ceiling speaker system

These premium 70.7/100V tuned & ported coaxial ceiling speaker packages will satisfy the needs of owners, architects, contractors, and consultants by delivering true, high fidelity sound reproduction in an attractive and easy-to-install system.

To reduce installation time and simplify ordering and specifying the FAP42T and FAP62T package ships complete with speaker/transformer factory assembled into back can, grille and unique V-rail/C-ring mounting hardware.

Atlas Sound has also addressed retrofit and “division of labor” installations with new “motor board” versions of the Strategy Series II :

Model **FA42T-6MB** is the entire 4" speaker/transformer/selector switch/front plate assembly found in the FAP42T assembly. The footprint of the FA42T-6MB is identical to a standard FA series 6" speaker component. This footprint allows the motor board to fit into all current Strategy Series II 6" enclosures in the exact same manner as a regular 6" FA speaker.

Model **FA62T-8MB** is the entire 6" speaker/transformer/selector switch/front plate assembly found in the FAP62T assembly. The footprint of the FA62T-8MB is identical to a standard FA series 8" speaker component. This footprint allows the motor board to fit into all current Strategy Series II 8" enclosures in the exact same manner as a regular 8" FA speaker.

FEATURE ENHANCEMENTS INCLUDE:

- Front mounted tap selector switch for easy system tuning adjustments
- Unique “trap door” input section allows for through conduit runs with rigid or flex conduit.
- 4 Pole detachable “Phoenix” style connector allows easy pre-wiring and is convenient for daisy chaining additional Strategy Series II full range speakers or subwoofers
- “Press fit” grilles blend better into contemporary architecture
- Higher power, enhanced quality 70.7V/100V internal transformers minimize insertion loss and maintain low frequency response while providing increased output for higher SPL applications
- Extended low frequency response from the optimally tuned and ported deep drawn galvanized steel enclosure (285 cubic inches FAP42T, 475 cubic inches FAP62T)

Premium construction provides premium performance

The high quality construction of the FA series drivers utilized in the FAP42T & FAP62T will provide familiar performance.

All Strategy Series II drivers feature a weather/UV resistant polypropylene cone with butyl rubber surround coupled with a 19mm PEI tweeter. Crossover components are of the highest quality providing a smooth transition between the driver components insuring even frequency response and coverage.

COMPLETE ANY DISTRIBUTED 70.7V SYSTEM WITH AMAZING EXTENDED LOW FREQUENCY RESPONSE

In recent years, there has been a shift in market demand for commercial sound systems to deliver higher fidelity sound. Retail, restaurant and hospitality settings are finding that their customers are expecting the quality of their shopping or dining experience to be enhanced by music reproduced at nearly the same level of sound quality they have come to expect in their home theaters and car stereos. Business owners now realize that the excitement caused by a quality audio system can turn into increased customer satisfaction. The **FASUB70**, when used in conjunction with other Atlas Sound full-range speakers, provides great sounding background/foreground music reproduction suitable to these applications.

FASUB70

FEATURES

- Tuned & ported, long excursion 8" subwoofer system produces amazing extended low frequency response in any 70.7V ceiling speaker system
- Low crossover point greatly reduces localization (ability of listener to identify the subwoofer location)
- Easy installation in drop tile or sheetrock ceilings via C-ring/V-rail tile bridge and dog leg mounting system (included)
- Uniquely designed, "easy access" input panel design allows for thru conduit runs using flexible or rigid conduit
- Detachable, Phoenix style, locking, four-pole connector provides for easy daisy chain wiring
- Attractive, stud mount grille matches aesthetics of other Atlas Sound FA Series
- UL listing pending

GREAT SOUND COME RAIN OR SHINE

Atlas Sound expands the industry standard Strategy Series® speaker line by introducing four new, weather-resistant, surface mount speaker models. Models include the Strategy Series SM52 (8 ohm) and SM52T (25/70.7/100V) 5¼", two-way speaker systems and the Strategy Series SM82 (8 ohm) and SM82T (25/70.7/100V) 8", two-way loudspeaker systems.

System components consist of highly efficient woofer sections and titanium dome high frequency devices. The SM82 series features a 1" exit compression driver, while the SM52 series features a dome style tweeter. The high frequency section is symmetrical, for equal coverage in both vertical and horizontal cabinet mounting positions. SM52 and SM82 8 ohm models feature magnetic shielding for use near video and CRT monitors.

The Strategy Series speaker systems include a versatile yet simple U-bracket designed to provide easy vertical or horizontal installation on just about any surface. Systems are available in Black or White finishes and can be painted to accommodate any architectural considerations.

FEATURES

- Compact, 2-way loudspeaker systems for exceptional performance in music and sound reinforcement systems
- Weather-resistant construction for year-round indoor or outdoor use: UV-resistant-talc-impregnated-polypropylene injection molded enclosure, powder coated aluminum grilles and all brass hardware inserts
- Conforms to 100HR salt spray test per ASTM B117
- Color matched heavy-duty zinc chromate plated and powder coated U-bracket (included)
- Atlas Sound TRX WAVEGUIDE™ – A constant directivity style high frequency wave guide system provides accurate, even high frequency coverage (90°H x 90°V for the 5¼" model, and 65°H x 65°V for the 8" model)
- Atlas Sound POLYGUARD™ high frequency circuit diverts damaging transient signals to protect the tweeter
- Screwdriver adjustable 25/70.7V/100V transformer for distributed sound applications
- All ¼"-20 hardware inserts allow easy integration of " off-the-shelf" security hardware
- OMNIMOUNT™ compatible
- Available in black or white
- Five-year warranty

FROM AMPHITHEATERS TO ARENAS —COMPRESSION DRIVER COAXIALS ARE THE CHOICE FOR HIGH CEILING APPLICATIONS

8CXT60

Atlas Sound true compression coaxial loudspeakers are optimized for high-ceiling applications such as arenas, convention centers, gymnasiums and auditoriums. The extremely high efficiency and higher "Q" provide the increased available SPL often required in these high ceiling applications.

In 70.7V/100V systems this high efficiency can also result in lower tap settings, which can conserve amplifier power.

Save time and touch labor with the 8CXT60 and 12CXT60. Many products of this type require the installation of an external transformer from another manufacturer. The Atlas Sound 8CXT60 and 12CXT60 include a high efficiency built-in 60watt 70.7/100V transformer (Taps @ 7.5W, 15W, 30W & 60W). (12", 8-ohm version also available Atlas Sound Model CX12)

Both model are designed to work optimally in any Atlas Sound "Q" series high volume enclosure allowing for a complete high output solution.

FEATURES

- 1" Exit true compression high frequency driver coupled to a specially designed conical wave-guide horn provides exceptional output and accurate high frequency reproduction
- High efficiency cone woofer is optimally matched with a specially designed crossover to insure even transition between components
- 90 Degree conical dispersion (@ 2kHz)
- Available with factory installed 60W 70.7/100V transformer (8CXT60 & 12CXT60)
- Perfectly suited for use with Atlas Sound "Q" Series enclosures

12CXT60

AFFORDABLE EXCELLENCE

Use Atlas Sound's new cost effective, 8" diameter, multi-purpose, loudspeaker packages for high quality music reproduction or paging in any commercial, retail, industrial, or institutional application.

SD SERIES FEATURES

- 8" 10oz. Dual Cone Speaker With Factory Assembled High Quality 25V/70.7V Transformer Provides Familiar Response and Performance
- Choose Speaker/Transformer Only Or Complete Assembly With Attractive CRS White Powder Coat Baffle Available With Optional Center Mounted Volume Control
- All models individually packaged for stocking and ordering convenience

SD72 dimensions match Atlas Sound model C10AT72.

SD72W(V) matches dimensions of Atlas Sound "D" & "HV" series (62-8 Style Baffle).

Models are designed to work with a wide variety of standard Atlas Sound tile bridges & enclosures

LOUD AND CLEAR FOR PAGING APPLICATIONS

The SBMS is ideal for "big box" retail stores whose special design calls for an open beam ceiling. Since the goals are to get customers to pay attention to the announcements of specials and the employees to respond to general paging—intelligibility is a top design goal. The high efficiency of the specially designed 8" speaker included in the SBMS package fills this requirement.

Atlas gave the SBMS a square design, which blends in with the overall aesthetic of an open beam ceiling.

The SBMS is infinitely flexible, complying with a variety of conduit requirements. Integral knockouts facilitate 1/2" and 3/4" conduit where required by code while an integral "romex" style connector simplifies installation for applications where conduit is not required at all. The SBMS also includes a 25V/70.7V internal transformer and is finished in neutral white epoxy for simplified stocking and ordering.

SBMS

FEATURES

- Easy-to-Install Loudspeaker Package Includes Provisions for Fast Clamp-Mount Installation to I-Beams and Girders
- Package Includes an 8" Dual-Cone Loudspeaker with a Pre-Mounted Transformer, Baffle, and Enclosure Equipped with Clamp Mounts
- Convenient Lead Wire Extensions Assure Expedited Field Connection
- Durable White Powder Coat Finish

See Page 27 for more information

WHEN PRIVACY IS PRIORITY

With a good majority of America's workplaces having adopted an open office plan, favoring a labyrinth of cubicles over traditional closed offices, conversational privacy has become an increasingly sensitive issue. A properly designed sound masking system can significantly increase speech privacy and improve the overall work environment.

The new M1000 masking speaker assembly is designed to accurately reproduce the needed spectrum of masking signal into the plenum space. The innovative 712 cubic inch square enclosure insures ample low frequency response. A specially designed 8" dual cone loudspeaker is included in the package. A high efficiency 70.7V internal transformer is coupled to an external selector switch for easy system tuning. For more precise adjustments, a wide selection of wattage taps ranging from 1/4 watt to 4 watts are provided.

The exclusive Atlas Sound EZ hang brackets simplify installation. This innovative suspension system utilizes (2) collapsible galvanized hangers configured to allow quick upward or side firing installation. The hangers are factory-installed on the unit and fold flat for shipping. To meet most any local code requirement, the M1000 includes an innovative cover containing both knockouts and a strain relief. This system will allow the use of rigid or flexible conduit (if required) and easily accommodates "through" connections on the removable plate. To fit continually shrinking construction budgets, the M1000 is very aggressively priced. Contact your regional Atlas Sound representative for details.

M1000

FEATURES

- Pre-Assembled Unit Includes 8" Dia. Loudspeaker, Transformer, Enclosure, Baffle and Mounting Hardware
- Labor-Saving Hardware Package – Complete with New Snap Hanger Assembly, Allows Quick and Easy Installation
- Innovative input panel includes combination knock-out and strain relief connector to accommodate flexible or rigid conduit
- Design Enables Upward or Horizontal Sound Dispersion
- 712 Cubic Inch Enclosure for Extended Low Frequency Response
- Black Epoxy Finish Blends with Open Ceiling Plans
- Suitable for Use Above Suspended Ceiling Systems

See Page 79 for more information

SMALL FOOTPRINT BIG PERFORMANCE

Atlas Sound AT series attenuators were designed with a smaller footprint to fit easily into readily available electric outlet boxes while maintaining the highest levels of efficiency. A higher quality core (see "The Method" below) was the primary requirement to make the unit smaller and reach this design goal.

The Method

Steel - Atlas Sound uses grain-oriented silicon iron laminates in the New AT series attenuators. Iron can be thought of in terms of efficiency. Grain-oriented laminations carry higher magnetic flux densities and require lower magnetizing currents. If the laminations can carry a higher magnetic flux density, a smaller cross-sectional area (smaller core) is required for a given application. A smaller core leads to fewer turns of copper (wire) required to excite it. Less copper means lower resistance and lower heat. Lower heat means higher efficiency. Choosing a higher grade of transformer lamination translates, in every way, to higher efficiency in smaller designs.

Precise Transformer Windings - Atlas Sound utilizes state of the art transformer winding machines to create the most dense wire pack possible helping to create an incredibly efficient performance in the new smaller footprint.

The VPF (Vacuum Pressure Finalization) Process:

All transformers are varnished or wax dipped, but Atlas Sound AT series transformers are varnish dipped in a **vacuum**. To cure the varnish at an accelerated rate the transformers are then removed and baked at 130° C. Varnish dipping not only seals the assembly by locking the laminates, bobbin and windings in place, it also minimizes "singing." Poorly sealed transformers produce a humming or vibrating sound when driven at near capacity. In extreme cases, one can actually hear the music through the attenuator. The sound is the result of the bobbin or windings vibrating against each other or against the steel laminates in the alternating magnetic field produced in the iron.

The Results

An amazing performance from a new compact unit poised to become the standard for the next generation of 70.7V auto-former attenuator applications

See Page 57 for more information

Three new Atlas Sound -RM Attenuators shown mounted on the new Atlas Sound AT Plate

See Page 61 for more information

FEATURES

- 10, 35 & 100 Watt Models Feature 3dB Positive Detent Attenuation Steps to Meet Application and Budget Requirements
- All Models Now Mount into Most 1-Gang E.O. Boxes
- Wall Plates are Stainless Steel with Stamped & Filled or Screen Printed Dial Scale, and a Skirted Black Knob (White and Ivory Plastic Plates with Matching Skirted Knobs Also Available in Decora Style)
- Popular Rack Mount Attenuator Versions are Available for Mounting onto Blank Panels in Equipment Cabinets
- Detachable "Phoenix" Style Connector for Easy Installation
- Optional "priority relay" models available
- All models include a newly designed D-shaft knob for better stability
- UL Listed

AT10, AT35, AT100

VP14 VANDAL-PROOF SPEAKER SYSTEM

LEAVE WOULD-BE PERPETRATORS POWERLESS

VP14
Shown with wire mold adapter (included)

The VP14 vandal resistant, slanted wall mount baffle, finished in attractive, neutral beige, is ideal for use in high-security areas such as schools and correctional facilities. Its sturdy, 14-gauge baffle construction and specially designed protective labyrinth screen protects the enclosed speaker assembly against abuse. Each package contains a high-quality 8" diameter loudspeaker with a 10-ounce ceramic magnet complete with factory assembled 25V/70.7V transformer including four power taps (.5, 1, 2 & 4 Watts). The VP14 exhibits a wide frequency response with low distortion.

More and more jobs in secured facilities are using surface mount raceways due to continual building expansions and retrofits. To accommodate for this, the VP14 includes an adapter to comply with Wiremold® 500 and 700 series conduit. This adapter can be installed securely through any of the standard 3/4" knockouts that are included on all four sides of the VP14. This provides for a cleaner installation where surface mount raceways are required. All knockouts are finished completely flush before the enclosure is painted making them invisible to any would be perpetrator.

FEATURES

- Attractive Design is Suitable for Use in a Variety of Surface-Mount Vandal Proof Applications
- Wire Mould 500 & 700 series compatible
- Durable all-steel construction
- Impermeable security grille protects speaker
- Attractive finish
- 9.5° Sloped Design Offers Directional Sound Projection
- Includes High-Quality 8" Loudspeaker with 25V/70.7V Line Transformer

See Page 27 for more information

WME150 WALL MOUNT SHELF/ENCLOSURE SYSTEM

LEAVE YOUR CONFIGURATION OPTIONS OPEN

WME150

The new, extremely versatile six-piece Wall-Mount Shelf/Enclosure System shelf is easy to assemble in a variety of configurations. The set can be assembled using common tools.

FEATURES

- Ideal for use in utility closets and anywhere space is at a premium
- Six piece set is shipped flat and can be easily assembled with common tools
- Two shelf configuration with the supporting side panels, provides a sturdy shelf for a wide variety of equipment
- Four identical pieces can be used as shelves, locking door or top
- Can be configured as a locking enclosure with two shelves or as an open, two-shelf system

Whatever the installation need, contractors will find it simple and economical to install the new Atlas Sound WME150 Wall-Mount Shelf/Enclosure System.

Available in -592 Neutral White.

See Page 85 for more information

CULTIVATE GREAT SOUND

Atlas Sound is taking outdoor audio to a whole new level with its unique, new garden speakers that simplify installation and deliver deep, rich sound. They are designed to easily blend into any environment, as they are available in two different models with two different base types. One includes a short base for shallow bed or surface mounting and the other has a deeper base for in-landscape burial.

The revolutionary two-piece design allows for the following two-phase installation:

1. Install the small or large base
2. After initial construction is complete, install the speaker/transformer unit

ATS183GL

FEATURES

- Durable 8" coaxial speakers are great sounding with a 360° dispersion pattern
- Weather-resistant materials for even the most temperamental and unpredictable climates
- Convenient, adjustable 8, 16, and 32 watt taps @ 70.7V. 8 ohm version also available
- Ideal for theme parks, hotels, and any landscaped area
- Green finish

ATS183GS

The Garden Speaker is available in two base types: The shorter base for shallow bed or surface mounting (left) and the deeper base for in-ground use (above)

See Page 30 for more information

DSP-BASED SOUND MASKING GENERATOR/EQUALIZER

MG2500

The Atlas Sound MG2500 Noise Masking Processor is a digital pink-noise generator that includes a balanced line-level audio input and a 2-channel DSP processor, all in a single rack-space unit. An extended 'non-apparent' repeat time of noise (200 minutes) and output delay with distance/delay calculation, per channel helps insure the masking source will not be decoded in high security installations. The MG2500 includes two independent matrices for channel-to-channel mixing and balanced input & outputs on plug-in barrier strip connectors. Noise & audio levels, plus two channels of combined 1/3 octave & parametric equalization, EQ, gain management & delay, are adjusted via computer software (Windows 95/98/2000/XP/NT4). Sixteen presets can also be recalled via contact-closures, RS-232, or other remote control options. There are no manual controls on front panel, to prevent tampering. All programming software & serial cable included. UL Listed.

MG2500

See Page 78 for more information

CB SERIES RACK FILLER PANELS

EXPERT PANEL AT ECONOMY PRICING

The new Atlas Sound CB series of filler panels are available in RU heights of 1space to 4 space. The durable units are constructed of 14 gauge steel punched with EIA standard mounting holes and are finished in flat black epoxy to better blend in with other rack mount equipment.

For convenient storage the CB series blanks are packaged in the new Atlas Sound blister pack system. This system allows the contractor or retail store to easily hang the CB blank on slat wall or peg board hooks. 1U and 2U models are packaged in 12 unit master packs while 3U and 4U models are packaged in 6 unit master packs for convenient ordering and stocking.

FEATURES

- All models include oblong mounting holes on E.I.A Centers
- Units are finished in flat black
- To enhance merchandising opportunities, all rack accessories have been repackaged in a distinctive Atlas Sound packaging

See page 95 for more information

SEC SECURITY COVERS

MAXIMUM SECURITY AT MINIMUM PRICE

Designed to eliminate unauthorized operator tampering to rack mount equipment such as equalizers and rack mount mixers. 22-gauge construction features fine perforated steel insert for good visibility. Unique radiused corners provide a professional looking installation. Formed edges protect equipment from scratches. Available in 1U to 3U heights.

See page 95 for more information

THE MUSICIAN'S CHOICE

Atlas Sound's next generation of Musician Series tripods are lightweight, styled stands that offer the fit and feel of tripods costing considerably more.

TE-E is an all-purpose tripod. The full height stand extends from 37" to 65" and includes an all-new three-piece clutch design with a highly durable metal clutch barrel. Tripod legs attach to a metal retainer assembly that includes a thumbscrew/brake system to provide secure positioning and prevent tube marring. Tube assemblies are durable CRS construction terminated in the industry standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 5½ lbs.

Versatile, low-cost **BE-E** boom features adjustable-length positioning for extended mic range applications. The two-piece boom extends 24"-39". Includes a molded plastic handle, metal swivel clamp with protective rubber insert, and an easy-grip knob for vertical alignment. Adjustment for the main and extension boom includes a thumbscrew/brake system to provide secure positioning and prevent tube marring. Tube assemblies are manufactured of CRS and terminate in standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 2 lbs.

TEB-E tripod/boom combination features the BE-E removable, telescopic boom to provide microphone extension from 24" to 39". It includes a molded plastic handle, metal swivel clamp with protective rubber inserts and an easy-grip knob for vertical alignment. Adjustment for the main and extension boom include a thumbscrew/brake system to provide secure positioning and prevent tube marring. Tube assemblies are manufactured of CRS and terminate in the standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 7½ lbs.

FEATURES

- All new models redesigned for better durability
- Full height of 65" allows for various microphone stand application requirements
- Easy-locking legs tighten with a single motion for fast set-up and tear down
- New three-piece clutch has protective insert for secure scratch-free positioning
- Clutch barrel constructed of die-cast metal
- Tripod leg attachment cup constructed of die-cast metal (not plastic!)
- "Brake" mechanism on all adjustment points offers secure positioning —eliminates tube marring
- New and improved model BE-E telescopic boom included with TEB-E package

See page 104 for more information

SS500E SPEAKER STAND

THE PERFORMER'S CHOICE

Designed for easy transportability, set-up and tear down, the new heavy-duty Model **SS500E** aluminum speaker stand weighs a mere 7 lbs. and supports up to 150 lbs! Additionally, the stand folds to a minimal 53" making it a great portable stand for use in churches, schools, and theaters. Height adjusts from 54" to 85" for versatile positioning and support of sound, monitor, and control equipment. The SS500E is equipped with a positive clamping system complete with a safety support pin to assure safe, slip-free support of elevated equipment. Vertical tube assembly contains 1½" and 1⅝" tubing. Clutch mechanism includes a protective insert for scratch-free height adjustment. Legs are double braced and include heavy-duty rubber feet for extra stability. Universal platform style top adapter.

Model **SSA-7** (available separately) is offered to mount a variety of equipment sizes that do not include tripod sockets. Material is mold-pressed plastic in satin ebony (E) finish.

FEATURES

- Heavy-duty aluminum speaker stand weighing 7 lbs. supports up to 150 lbs.
- Folds to a minimal 53" for convenient transport
- Height adjusts from 54" to 85" for vertical flexibility
- Positive clamping system features a safety support pin for extra safety

2ND GENERATION STRATEGY SERIES II SPEAKER SYSTEMS MAINTAIN LEGENDARY PERFORMANCE WITH ENHANCED

- Extended low frequency response from the optimally tuned and ported deep drawn galvanized steel enclosure. (285 cubic inches FAP42T, 475 cubic inches FAP62T)
- Easy installation in drop tile or sheetrock ceilings via C-ring/V-rail tile bridge and "dog leg" mounting system (Included)
- Front mounted tap selector switch for easy system tuning adjustments
- Unique "trap door" input section allows for through conduit runs with rigid or flex conduit.
- 4 Pole detachable "Phoenix" style connector allows easy pre-wiring and is convenient for daisy chaining additional Strategy Series II full range speakers or subwoofers
- "Press fit" grille blends better into contemporary architecture.
- Enhanced quality 70.7V/100V internal transformers minimize insertion loss and maintain low frequency response while providing increased output for higher SPL applications
- UL Listing Pending

General Description

The new Strategy Series II premium 70.7/100V tuned & ported coaxial ceiling speaker packages will satisfy the needs of owners, architects, contractors, and consultants by delivering true, high fidelity sound reproduction in an attractive and easy-to-install system. These High performance systems are perfectly suited for many business music and public address applications. Compact profile enclosures and wide dispersion make the FAP42T & FAP62T a perfect choice for low ceilings.

The loudspeaker's components match the performance of the legendary Atlas Sound Strategy Series II FA Series.

High quality construction of the 1" voice coil cone type drivers include polypropylene cones with a butyl rubber surround. The 19mm coaxially mounted tweeter is constructed of durable PEI. The high sensitivity of the loudspeaker means less power may be required to achieve the desired SPL. The loudspeakers are factory assembled to an optimally tuned & ported deep drawn enclosure and include a specially designed low saturation 70.7V/100V transformer. A convenient front mounted switch allows tap selection without the need to remove the speaker from the ceiling. Uniquely designed "easy access" input panel design allows for "thru" conduit runs using flexible or rigid conduit. A detachable Phoenix style locking four-pole connector provides for easy daisy chain wiring to other full range loudspeakers or Atlas Sound FASUB70 subwoofers. Attractive press-fit grille better matches contemporary architecture.

Mounting is simplified with Strategy Series II style "dog leg" tabs that allow easy installation into drop tile or drywall ceilings with provided tile bridge assembly. The tile bridge consists of (2) triangular formed mounting rails and a c-ring assembly.

The c-ring can be attached to the rails with the screws provided to extend support to the t-bar grid in suspended ceiling applications. Multiple hole locations are provided to allow the c-ring to be positioned all the way to the outer edge the tile if necessary.

For existing dry-wall applications the tile bridge c-ring and support rails can be inserted into the hole cut for the enclosure. For easy positioning the "V" shaped support rails match the shape of the C-ring tabs for easy maneuvering and location when working "blindly" above the deck.

For new construction drywall ceiling applications, an optional trim ring is available. This unit provides a marked location for drywall installers to cut around essentially reserving the desired location in the ceiling until final installation of loudspeaker. Mounting holes are provided to accommodate 16" or 24" OC stud/joist mounting.

Use model **FAP42-TR** new construction ring for model FAP42T.

Use model **FAP62-TR** new construction ring for model FAP62T.

A support ring is also provided on the top of the enclosure to facilitate an auxiliary support cable.

Each of the new Strategy Series II packages contains two speaker/transformer/enclosure assemblies, along with two grilles and tile bridges.

PERFORMANCE SPECIFICATIONS BY MODEL

MODEL	SPKR	SENSITIVITY	XFMR	TRANSFORMER TAPS	ENCLOSURE VOLUME	SYS FREQ RESP ±5dB	CUT-OUT DIMENSION
FAP42T	FA134	88dB Avg/ 92dB Peak	16 Watt @ 70.7/100V	1,2,4,8 & 16 Watts	285 Cubic In.	65 Hz to 20 kHz	8.9" (226mm)
FAP62T	FA136	88dB Avg/ 91dB Peak	32 Watt @ 70.7V/100V	1,2,4,8,16 & 32 Watts	475 Cubic In.	55 Hz to 20 kHz	10.9" (277mm)

Atlas Sound has also addressed retrofit and “division of labor” installations with new “motor board” versions of the Strategy Series II :

Model **FAP42T-6MB** is the entire 4” speaker/transformer/selector switch/front plate assembly found in the FAP42T assembly. The footprint of the FAP42T-6MB is identical to a standard FA series 6” speaker component. This footprint allows the motor board to fit into all current Strategy Series II 6” enclosures in the exact same manor as a regular 6” FA speaker.

Model **FAP62T-8MB** is the entire 6” speaker/transformer/selector switch/front plate assembly found in the FAP62T assembly. The footprint of the FAP62T-8MB is identical to a standard FA series 8” speaker component. This footprint allows the motor board to fit into all current Strategy Series II 8” enclosures in the exact same manor as a regular 8” FA speaker.

FASUB70

In recent years, there has been a shift in market demand for commercial sound systems to deliver higher fidelity sound. Retail, restaurant and hospitality settings are finding that their customers are expecting the quality of their shopping or dining experience to be enhanced by music reproduced at nearly the same level of sound quality they have come to expect in their home theaters and car stereos. Business owners now realize that the excitement caused by a quality audio system can turn into increased customer satisfaction. The **FASUB70**, when used in conjunction with other Atlas Sound full-range speakers, provides great sounding background/foreground music reproduction suitable to these applications.

- Tuned & ported, long excursion 8” subwoofer system produces amazing extended low frequency response in any 70.7V ceiling speaker system
- High efficiency, passive crossover network eliminates the need for dedicated amplification & active crossover
- Low crossover point greatly reduces localization (ability of listener to identify the subwoofer location)
- Easy installation in drop tile or sheetrock ceilings via C-ring/V-rail tile bridge and dog leg mounting system (included)
- Uniquely designed, “easy access” input panel design allows for thru conduit runs using flexible or rigid conduit
- Detachable, Phoenix style, locking, four-pole connector provides for easy daisy chain wiring
- Attractive, stud mount grille matches aesthetics of other Atlas Sound FA Series
- UL listing pending

General Description. Strategy Series loudspeaker systems (U.S. Patent #5206464) uniquely combine full-frequency response, cost-efficiency, aesthetics, and easy installation into one complete assembly. Strategy Series systems are offered in 4", 6" and 8" sizes enabling owners, architects, contractors, and consultants to meet varying sound system requirements. UL 1480 listed for general signaling (non-fire) when used in combination with UL listed enclosures and baffles. For UL Classified fire-rated versions see page 48.

PRE-ASSEMBLED STRATEGY SERIES

The Strategy Series speaker packages are designed for the contractor who wants to install premium-quality, state-of-the-art products, in a simple to order, simple to install package. The speaker and back can come pre-assembled—simply take them out of the box and install! Each package contains 2-tile bridges, 2-attractive 720 series grilles and 2-speaker/can assemblies. 70.7 Volt versions include the highly efficient HT87 8 watt transformer pre wired and terminated to a BX box. Also available in 8 ohm.

STRATEGY SERIES SYSTEM COMPONENTS

- **Loudspeakers.** Choose from 4", 6" and 8" coaxial or full-range models.
- **Enclosures.** Easy-to-install, front-loading enclosures secure with adjustable clamps.
- **Grilles.** Architecturally pleasing grilles push-mount for easy, hardware-free installation.
- **Mounting Accessories.** Choose tile bridge, plaster/mounting ring or rough-in trim ring.

STRATEGY SERIES LOUDSPEAKERS

FA134/FA114 — 4" Loudspeakers. Strategy Series 4" loudspeakers are ideal for low-ceiling, low-profile applications where high-fidelity and broad dispersion are required. The FA134 is the industry's first UL listed coaxial 4" loudspeaker. It features a polypropylene cone woofer, a 10 oz. magnet to handle 25 watts with excellent low frequency reproduction and smooth extended response. Model FA114 is a 10 watt, full-range loudspeaker equipped with a paper cone and 10 oz. magnet.

FA136/FA116 — 6" Loudspeakers. The six-inch Strategy Series loudspeakers combine the high performance of an eight-inch loudspeaker with the wide-dispersion of a four-inch. Coaxial 50 watt model FA136 delivers excellent fidelity and response. Unit is UL listed and features a polypropylene cone woofer, 14 oz. magnet, SBR surround, and a 2" post-mounted dome tweeter with PEI diaphragm for outstanding weather-resistant performance. Full-range Model FA116 is a 25 watt loudspeaker comprised of a 6" driver, weather-resistant dual paper cones, half-rolled polyether foam surround, and 10 oz. ceramic magnet.

FA138/FA118 — 8" Loudspeakers. High-performance and extended sound pressure levels make the Strategy Series 8" loudspeakers ideal for prestigious venues or high/vaulted-ceiling applications. The 100 watt, FA138 is Atlas-Sound's premium 8" coaxial loudspeaker. It is UL listed and incorporates a polypropylene cone woofer, a SBR surround, a 1 1/2" vented Kapton/E voice coil, a 21 oz. magnet, and a 3/4" PEI dome tweeter for clean and powerful weather-resistant performance. The full-range, 25 watt, FA118 includes an 8" driver, a self-edge weather-resistant dual paper cone and a 10 oz. magnet.

STRATEGY SERIES ENCLOSURES

FA97 Series/FA95 Series. Acoustically matched and treated backboxes allow Strategy Series loudspeakers to perform with optimum resonance-free operation. Standard units include three, easy-to-adjust clamps that rotate and secure with a screwdriver into ceilings up to 1 1/4" thick. They may also be installed by conventional screw mounting if desired. Models are offered in 4", 6" and 8" sizes in volume and economy versions. Volume Model Series FA97 and Economy Model Series FA95 are 22-gauge CRS, undercoated and equipped with four threaded loudspeaker inserts and three grille-stud receptacles. Both are finished in black epoxy. FA97 Series is lined with 3/8" thick high-density acoustic batting for superior full-range music performance.

FAMT-6

STRATEGY SERIES MOUNTING ACCESSORIES (OPTIONAL)

FA81-4/FA81-6/FA81-8. Tile bridges are designed to prevent ceiling tile sag by distributing the loudspeaker assembly weight to the ceiling's support members. Model Series FA81 is offered in 4", 6" and 8" sizes and accepts both the FA95 Series and FA97 Series enclosures. It also mounts the FAPR Series plaster/mounting rings. Models are constructed of 24-gauge electro-galvanized steel.

DIMENSIONS				
MODEL	CUT-OUT	LENGTH	WIDTH	DEPTH
FA81-4	6½" (163mm)	23¾" (600mm)	14½" (359mm)	¼" (6mm)
FA81-6	8½" (206mm)	23¾" (600mm)	14½" (359mm)	¼" (6mm)
FA81-8	9¾" (248mm)	23¾" (600mm)	14½" (359mm)	¼" (6mm)

FAPR-4/FAPR-6/FAPR-8. Plaster/mounting rings are used to mount Strategy Series 4", 6" and 8" loudspeakers into ceilings and walls for applications where a backbox cannot be used, or where it is not desired. (NOTE: The mounting configuration of Strategy Series requires that an enclosure or plaster mounting ring be used to mount both the loudspeaker and the grille). Units are constructed with the same internal mounting flange as Series FA95 and FA97 enclosures to accommodate ceiling/wall thickness up to 1¼". Rings may be used to mount non-transformer equipped loudspeaker models into walls having a min. depth of 3½" and transformer-equipped models into walls with a minimum depth of 5½" (measured from the front of the mounting surface to the rear of the inside mounting area). Series FAPR is constructed of 20-gauge CRS and finished in textured black epoxy. It is equipped with four threaded inserts for loudspeaker installation and three stud receptacles for mounting Strategy Series series Series grilles. Cut out dimensions are: FAPR-4 – 6½" (163mm)/FAPR-6 – 8½" (227mm) FAPR-8 – 9¾" (248mm).

FA-TR4/FA-TR6/FA-TR8. Trim ring/rough-in brackets are offered in three sizes to allow for easy installation of enclosures or plaster/mounting rings for Strategy Series 4", 6" and 8" loudspeakers in walls or ceilings. Units install prior to drywall installation and serve as a pattern cut-out for the dry-wall contractor. This time-saving step identifies pre-wire location, expediting installation. Trim ring mounting ears span 25½" W and will accommodate ¾" to 1¼" thick drywall. Mounting holes are provided to match both 16" and 24" stud centers. Finish is black epoxy.

FAMT-6. Mounting ring/adaptor for retrofit applications allows a 6" cone or horn loudspeaker to mount an 8" enclosure and/or baffle.

8CXT60, 12CX & 12CXT60. NEW

- 1" Exit true compression high frequency driver coupled to a specially designed conical wave-guide horn provides exceptional output & accurate high frequency reproduction
- High efficiency cone woofer is optimally matched with a specially designed crossover to insure even transition between components
- 90 Degree conical dispersion (@ 2kHz)
- Available with factory installed 60W 70.7/100V transformer (8CXT60 & 12CXT60)
- Perfectly suited for use with Atlas Sound "Q" Series enclosures

Atlas Sound true compression coaxial loudspeakers are optimized for high-ceiling applications such as arenas, convention centers, gymnasiums and auditoriums. The extreme high efficiency and higher "Q" provide the increased available SPL often required in these high ceiling applications.

In 70.7V/100V systems this high efficiency can also result in lower tap settings, which can conserve amplifier power.

Save time and touch labor with the 8CXT60 & 12CXT60. Many products of this type require the installation of an external transformer from another manufacturer. The Atlas Sound includes a high efficiency built-in 60watt 70.7/100V transformer (Taps @ 7.5W, 15W, 30W & 60W). (12", 8-ohm version also available Atlas Sound Model CX12)

Both model are designed to work optimally in any Atlas Sound "Q" series high volume enclosure allowing for a complete high output solution.

HIGH-PERFORMANCE 4", 8" AND 12" CONE LOUDSPEAKERS

Atlas Sound high-performance loudspeakers are the standard for professional sound reinforcement and music systems in offices and retail establishments, auditoriums, meeting rooms, houses of worship, restaurants, clubs, transportation terminals, recreation and sports centers throughout the world. Selection includes standard 4", 8" and 12" coaxial models. Many units are UL listed. All are available with factory-installed, constant-voltage transformers (order separately) to meet individual project requirements.

C12A. High-performance coaxial loudspeaker delivers 65 watts with smooth frequency response and superior sound reproduction for engineered sound system use in restaurants, night clubs, lounges, theaters, airports, shopping malls and houses of worship. Competitively priced unit achieves excellent low-end response when front or rear-mounted in vented or sealed enclosures with a minimum volume of 3 cubic feet. Recommended enclosure is Atlas Sound's Q Series recessed Model Q4612. Loudspeaker Model C12A is complete with transformer mounting bracket for field installation of high-quality transformer Models HT-87, HT-82, HT167, and HT327.

General signaling (1480 non-fire) includes all speaker/transformer combinations (except models with HT-82) when used in combination with a UL listed enclosure and baffle.

COMMERCIAL 8" CONE LOUDSPEAKERS

Atlas Sound offers a complete selection of quality loudspeakers for voice, music, and signal reproduction in commercial, industrial and institutional communications systems. Many units are UL listed. All are acoustically proven, and realistically priced units which will provide many years of optimum service reliability. Selection includes standard 8" loudspeakers and a dual-voice-coil loudspeaker for operational monitoring. All units are available with factory-installed, constant-voltage transformers (order separately) to meet an unlimited variety of project requirements.

25, 70.7 & 100-VOLT TRANSFORMERS

Selection of single voltage or combination use constant-voltage line transformers includes models for professional and commercial sound and for intercom (45 ohm) applications. Transformers with 8 or 4 ohm impedance mount standard 4" or 8" loudspeakers without additional hardware except Model HT167 which may require bracket Model CX188329. For convenience and cost savings, Atlas Sound loudspeakers can be ordered with factory-installed transformers. Consult loudspeaker specifications or technical service for proper loudspeaker transformer combinations to meet your installation requirements. For additional transformer information see spec # SL1-1369 or SL1-1450. (Transformers for compression drivers are listed in Section 2.)

* One common, two with fast-on terminals.

** CX188329 is offered as a dedicated HT167 mounting bracket to facilitate high-powered systems utilizing loudspeaker models: C5A, C10A, C10LWA, C803A, CF883.

Note: Model AF140 consists of a single coil autoformer with multiple taps for maximum flexibility in matching a wide variety of loudspeaker loads to power amplifier outputs. A single AF140 will handle loads up to 150 watts and by connecting two units in series, power handling capacity can be increased to 300 watts.

GENERAL DESCRIPTION

Atlas Sound offers an extensive selection of its commercial 8" drivers factory-assembled with transformers and attractive baffles. These eleven different series and 71 model combinations arrive assembled, ready for installation to save you time and money. Choose from ceiling and surface-mount packages, models with volume control, and the cost-efficient EZ Mount installation system. All assemblies are competitive in price with individual components and save you the labor and material expense of re-packaging for the job site.

SD72W(V) & GD87W NEW

SD72W. The speaker used in the SD72W package is the next generation of Atlas high performance cone loudspeakers, very similar to the preceding C Series speakers. The similarity in the sonic qualities ensures that contractors and designers who have worked with the C Series in the past will know exactly what to expect when they purchase the SD72W package. The SD72W includes a 10oz magnet dual cone loudspeaker with 5 watt dual voltage transformer fully assembled onto an attractive CRS white powder coated grille with standard mounting holes to accommodate the majority of Atlas Sound standard 8" back cans, trim rings and tile bridges. This baffle includes welded speaker mounting studs making for a more discrete installed appearance. All mounting screws are included in the package. Model SD72WV includes a 50-Ohm baffle mounted potentiometer for applications requiring local volume control.

GD87W. The speaker used in the GD87W package is the next generation of Atlas high performance coaxial 8" cone loudspeakers, very similar to the preceding C803A Series speakers. The similarity in the sonic qualities ensures that contractors and designers who have worked with the C803A Series in the past will know exactly what to expect when they purchase the GD87W package. The loudspeaker is matched with a high efficiency 8 watt 70.7V transformer with a maximum insertion loss of 0.6dB. The primary taps are 1, 2, 4 and 8 watts. Speaker/transformer is fully assembled onto an attractive CRS white powder coated grille with standard mounting holes to accommodate the majority of Atlas Sound standard 8" back cans, trim rings and tile bridges. This baffle includes welded speaker mounting studs making for a more discrete installed appearance. All mounting screws are included in the package.

Each package is individually packaged for stocking and delivery convenience. All models individually packaged for stocking and ordering convenience.

D SERIES/G SERIES

Quality loudspeaker packages for ceiling or wall installation include loudspeaker with 10 oz. (D Series) or 5 oz. (G Series) magnet, dual-voltage transformer and choice of two grilles.

General signaling (1480 non-fire) when used in combination with a UL listed enclosure and baffle.

Enclosures are UL 1480 general signaling listed and accepted under UL 2043 for use in air handling "plenum" spaces.

FD/EZFD SERIES, HD/EZHD SERIES

Industry-favorite loudspeaker packages for ceiling installations are available in standard and EZ Mount Versions (EZ) where noted. Packages include loudspeaker with 5 oz. (FD/EZFD) or 10 oz. (HD/EZHD) magnet, choice of transformer and grille. Patented EZ Mount assemblies are designed for use in standard 2 x 4 lay-in ceiling installations when backboxes are not required. All EZ Mount loudspeakers have pre-mounted brackets and install quickly with wingnuts to support rails provided.

SV/EZSV SERIES, HV/EZHV SERIES

The SV/EZSV and the HV/EZHV Series loudspeaker packages are designed for easy, on the spot, volume control of ceiling mounted loudspeakers. Packages include loudspeaker with factory mounted 50-ohm potentiometer, 5 oz. (SV Series) or 10 oz. (HV Series) magnet, choice of 25, 70.7 or dual voltage 25/70.7V transformer, patented EZ Mount support rails (EZ Models only) and selection of three grilles with a center-mounted volume control knob. Attractive knob has been re-designed for a low profile, flush-to-grille appearance. The knob may also be removed to allow for screwdriver adjustment of volume. This screwdriver adjustment feature is desirable in applications where individual volume control is needed, but easy, general access is not.

1' X 2' DROP-IN SPEAKER SYSTEMS

The new Atlas Sound IS100 series of 1' x 2' drop-in ceiling speakers allow for a hassle-free installation method. Because they have a unique baffle, contractors may simply drop the speaker system into the grid, then cut the ceiling tile to the appropriate length. This is much faster than conventional methods. Each speaker is made up of attractive, perforated metal that blends well with acoustic ceiling tiles. You can enjoy clean, crisp sounds from the installation-friendly Atlas Sound IS100 series speakers without sacrificing building cosmetics. The 1' x 2' drop-in ceiling speakers are packaged with two pre-assembled systems per box. The following 1' x 2' drop-in system models feature industry standard Atlas Sound speakers, transformers and conical back cans:

EQ SERIES 8" MUSIC LOUDSPEAKER SYSTEM

EQ818. The EQ Series was developed to meet the sound industry's need for high-fidelity ceiling loud-speaker systems with conventional installation and architectural integrity. Cost-efficient 8" system combines a high-performance loudspeaker with a ported, bass-reflex ceiling enclosure and a choice of flush grilles to achieve professional quality sound reproduction in an attractively packaged ceiling loudspeaker system. Series is ideal for foreground music and sound reinforcement application wherever enhanced audio quality is desired to create listener appreciation in stores and boutiques, restaurants, nightclubs, hotels, lecture halls, meeting rooms, airports, recreation and performing art centers.

This 50 watt system is comprised of an 8" diameter woofer, 4" diameter high-frequency piezo transducer and an acoustically matched ported enclosure to deliver optimum response, sensitivity and power handling. High-performance loudspeaker assembly is factory mounted to a subplate and offered with choice of three, professional-quality line-matching transformers. Bass reflex enclosure Model EQ818-BX (order separately) is manufactured from 20-gauge CRS, includes 3/4" knock-outs, and is lined with 1 1/2" thick fiberglass. Unit has provisions for mounting a single-gang E.O. box (included) to the top of enclosure. Enclosure is finished in black, and measures 11 1/4" diameter x 8" deep. It includes teflon leads with connectors for installation in suspended tile ceilings and separate junction box for convenient connection to conduit systems. Attractively styled companion baffles (order separately) are constructed of 22-gauge CRS and finished in white. Model EQ61 measures 13 3/8" diameter and Model EQ164A is 16" square. To assure prime appearance in suspended ceilings, optional load-bearing tile bridge Model EQ81 is recommended. The round cut-out of the EQ81 measures 12 1/8" diameter.

2' X 2' DROP-IN SYSTEMS

IS289Q. The Atlas Sound IS289Q, 2' x 2' drop-in speaker system features a premium 8-inch coaxial speaker, transformer, and enclosure. This premium line offers clean, crisp sound. Each speaker is made up of a handsome perforated metal that blends well with any acoustic ceiling tiles. Like its relative, IS100 series 1' x 2' drop-in speaker system, the Atlas Sound IS200 series 2' x 2' drop-in speaker systems are also easy to install, eliminating complicated installation procedures and saving time. The Atlas Sound IS200 series 2' x 2' drop-in speakers include a one-of-a-kind baffle, which allows contractors to simply drop the speaker system into the grid, then cut the ceiling tile to the appropriate length. This unique installation method is much faster than conventional modes Available IS200 Series 2' x 2' Drop-In Speaker System IS289Q 2x2 with FA138 HT327 and Q enclosure. Comes with 2' T-Bar.

SLANT WALL-MOUNT BAFFLE SYSTEMS

VP14

VP14. The VP14 vandal resistant slanted wall mount baffle, finished in attractive, neutral beige, is ideal for use in high-security areas such as schools and correctional facilities. Its sturdy, 14-gauge baffle construction and specially designed protective labyrinth screen protects the enclosed speaker assembly against abuse. Each package contains a high-quality 8" diameter loudspeaker with a 10-ounce ceramic magnet complete with factory assembled 25V/70.7V transformer including four power taps (.5, 1, 2 & 4 Watts). The VP14 exhibits a wide frequency response with low distortion. VP14 includes an adapter to comply with Wiremold' 500 and 700 series conduit. This adapter can be installed securely through any of the standard round combination knockouts that are included on all four sides of the VP14.

OPEN-CEILING, BEAM-MOUNTING LOUDSPEAKERS

SBMS

SBMS. Install the SBMS clamp-mounting loudspeaker assembly wherever paging, intercom, and background music are desired in open ceiling applications. This ready-to-install unit combines exceptional performance and fast installation into one complete package making the SBMS ideal for use in open ceiling venues such as: retail superstores, warehouses, light industrial facilities, multi-purpose athletic buildings, cafeterias, and convention/civic centers.

Pre-assembled unit feature an 8" dual-cone loudspeaker with a 25/70.7-volt transformer mounted within a square enclosure with matching baffle. Loudspeaker selection includes a 25 watt 10oz dual cone loudspeaker. Assemblies include two, easy-to-secure screw-down clamps mounted to the top of the enclosure. Clamps provide for quick and easy mounting onto beams, girders, and other surfaces (max. 1/2" thick) common to open-ceiling installations. The square SBMS package includes a 712 cubic inch enclosure paired with an attractive square baffle. This grille features one-piece, CRS construction. The SBMS is infinitely flexible, complying with a variety of conduit requirements. Integral knockouts facilitate 1/2" and 3/4" conduit where required by code while an integral "romex" style connector simplifies installation for applications where conduit is not required at all. Assemblies are shipped ready for installation with lead wires extending out of the enclosure through a wire-securing cable clamp. Finish is white powder coat epoxy.

RC AND SC SERIES

RC5-T72/RC10-T72/SC5-T72/SC10-T72. Conveniently packaged loudspeaker assemblies, for open-ceiling application, offer exceptional performance and easy clamp-mount installation in retail super-stores, warehouses, light industrial facilities, multi-purpose athletic buildings, cafeterias, and convention/civic centers. Ready-to-install, factory-assembled units are comprised of an 8" dual-cone loudspeaker with 25/70.7-volt transformer mounted into a round (RC Series) or square (SC Series) enclosure with baffle. Models RC5-T72 and SC5-T72 feature the C5A dual-cone, 15 watt loudspeaker; Models RC10-T72 and SC10-T72 include the dual-cone, C10A 25 watt loudspeaker. All models feature specially equipped enclosures with beam clamps for easy and secure mounting to beams, girders, and other surfaces in open-ceiling installations. They also offer the labor-saving convenience of lead wires extending out of the enclosure through a wire-securing cable clamp to allow for expedited connection to the transformer. Assemblies are available with choice of black (B) or white (W) finish.

4" LOUDSPEAKER/TRANSFORMER/BAFFLE PACKAGES

B SERIES

Often requested as a special assembly, the popular FC104 high-compliance 4" loudspeaker is available with transformer premounted to a selection of standard screw-mount and labor-saving torsion spring (T) grilles. For additional convenience, time and cost savings, two models are available with the patented EZ Mount installation system for applications which do not require a backbox.

** Note: Model T161-4 baffle is available only as a B Series assembly.

General signaling (1480 non-fire) when used in combination with a UL listed enclosure and baffle.

Enclosures are UL 1480 general signaling listed and accepted under UL 2043 for use in air handling "plenum" spaces.

ARCHITECTURAL SERIES IN-CEILING/WALL SPEAKERS

NEW

AS25CA

ARCHITECTURAL SERIES IN-CEILING SPEAKERS

AS25CA. Easy-to-install loudspeaker system includes a coaxial driver, "quick-fit" frame and grille. The attractive assembly was designed to compliment Atlas Sound's Architectural Series high-performance, in-wall speakers. Grille style is flush white with a diameter of 7 3/4". Speaker installs quickly into ceiling or walls with a maximum thickness of 1 1/4". Screwdriver-adjustable clamps provide fast installation and hardware-free appearance. The coaxial driver includes a 5 1/4" polypropylene woofer with half-roll foam and a 1/2" dome tweeter with a 1" voice coil. Ten watt RMS unit operates with a frequency response of 125 Hz - 20 kHz (±5dB) and a sensitivity of 83dB (at 1W/1M). Crossover frequency is 4000 Hz. Speaker depth is 2 1/4" and cutout dimension is 6 1/2". Optional rough-in bracket FA-TR4 is available for pre-wire convenience in new construction (order separately).

MODEL	SPEAKER SIZE	POWER (WATTS)	FREQUENCY RESPONSE	SENSITIVITY (1W/1M)	DISPERSION	IMPEDANCE

STANDARD SERIES IN-WALL SPEAKER SYSTEMS

Standard Series 6" and 8" in-wall loudspeakers are an attractive and reliable family of speakers that offer proven performance and outstanding value. Models AS80A and AS83A, are 8" units that provide high-fidelity foreground music for custom install and high-end commercial applications. Models AS60A and AS62A are 6" versions that are ideal for areas with limited space. All Standard Series models have a three-part assembly that offers fast and convenient installation with the loudspeaker component being installed last to avoid damage caused by paint, dust, or vandalism. Adjustable tweeter levels permit control of high-frequencies to match individual listening preference. Units project .185" from the wall and can be painted or decorated for decor flexibility. Units are equipped with transformer mounting posts for easy wiring of 70.7V transformers in distributed music applications (order separately). Use new construction trim ring Model TR-6 or TR-8 prior to drywall installation to streamline speaker installation. Trim rings not compatible with AS661.

AS60A. Two-way economy 10 watt RMS in-wall loudspeaker combines a 6½" woofer and 2" cone tweeter to provide frequency response of 60 Hz - 15 kHz and sensitivity of 85dB.

AS62A. Two-way model provides full-range sound in a small 20 watt RMS system. It has a 6½" woofer, 1" soft-dome tweeter, a response range of 60 Hz - 20 kHz and sensitivity of 88dB. Unit also contains a circuit board jumper wire for adjusting tweeter levels.

AS80A. Two-way, 30 watt RMS in-wall loudspeaker combines an 8" woofer and 1" soft-dome tweeter to provide a frequency response of 50 Hz - 20 kHz and sensitivity of 88dB. Model also contains circuit board jumper wire for adjusting tweeter levels.

AS83A. Three-way, 50 watt RMS in-wall loudspeaker combines an 8" woofer, 4" midrange, and 1" soft-dome tweeter to provide frequency response of 45 Hz - 20 kHz and sensitivity of 88dB. Unit also contains a three-position crossover switch for adjusting tweeter levels.

AS661. Dual 6½" woven fiberglass woofers and 1" silk dome pivoting tweeter combine to make this system the ideal choice for any high-fidelity listening area including family rooms, entertainment areas, kitchens, and home offices. It handles 80 watts RMS and has a frequency response of 45 Hz - 20 kHz (±4dB) and sensitivity of 87dB.

NEW CONSTRUCTION BRACKETS

TR-8/TR-6. New construction brackets are complete with mounting ears to span 16" and 24" frame studs for positioning prior to drywall installation. Model TR-8 and TR-6 are suitable for use with 8" and 6" loudspeakers, respectively. Hardware will fit walls with min. depth ¾" (10mm) and max. 1¼" (32mm).

ENCLOSURE FOR 8" IN-WALL LOUDSPEAKER & SUBWOOFERS

TR-BX8. Optional rear enclosure Model TR-BX8 is available to optimize the performance of 8" in-wall loudspeakers. Backbox provides a consistent operating volume and ensures acoustical isolation by reducing bass frequency "bleed-through" into adjoining rooms. Unit also protects the loudspeaker from dust and debris. Installation is accomplished by securing the enclosure between 2 x 4 studs on standard 16" centers using supplied hardware kit.

SM SERIES

Atlas Sound expands the industry standard Strategy Series speaker line by introducing four, new, weather-resistant, surface mount speaker models. Models include the Strategy Series SM52 (8 ohm) and SM52T (25/70.7/100V) 5 1/4", two-way speaker systems and the Strategy Series SM82 (8 ohm) and SM82T (25/70.7/100V) 8", two-way loudspeaker systems.

System components consist of highly efficient woofer sections and titanium dome high frequency devices. The SM82 series features a 1" exit compression driver, while the SM52 series features a dome style tweeter. Vocal and musical clarity is optimized by the mathematically conceived, advanced design of the Atlas Sound TRX Control Wave Guide™ high frequency director. This design gives each model smooth, even sound coverage (90°H x 90°V for the 5 1/4" model, and 65°H x 65°V for the 8" model). The high frequency section is symmetrical, for equal coverage in both vertical and horizontal cabinet mounting positions. High frequency component protection is provided by the Atlas Sound Poly Guard™ protection circuit. SM52 and SM82 8 ohm models feature magnetic shielding for use near video and CRT monitors. To withstand the harshest environments, the new Strategy Series surface mount loudspeakers are constructed of weather resistant materials: UV-resistant, talc impregnated, polypropylene injection molded cabinets; Hycone™ treated woofer cones; powder coated aluminum grilles and all brass hardware.

The Strategy Series speaker systems include a versatile yet simple U-bracket designed to provide easy vertical or horizontal installation on just about any surface. Systems are available in Black or White finishes and can be painted to accommodate any architectural considerations.

GARDEN SPEAKER

The new Atlas Sound garden speakers, designed for theme parks, hotels, and any landscaped area, simplify installation and deliver deep, rich sound. The speakers have a built in 70V line transformer with externally selected taps. An 8 ohm version is also available. The speaker is a coaxial 8", polypropylene/kevlar cone with rubber surround, 1/2" mylar dome tweeter, 1.5" voice coil, 21 oz. magnet.

They are designed to easily blend into any environment, as they are available in two different models with two different base types. One includes a short base for surface mounting and the other has a deeper base for in-landscape burial. The two-piece design allows for a two-phase installation. In phase one, plant the base in the ground. Phase two, after initial construction is done, the sound contractor can come back and install the speakers. This multiple step process protects the speakers from being damaged during the construction/landscaping process, and also eliminates the potential for theft from the construction site. The Garden Speaker even has a protective cover which is removed after phase two - the end of construction. Inside the enclosure, the speaker is a durable 8" coaxial speaker, with a great sounding 360-degree dispersion pattern. The enclosure is made of all weather-resistant materials, which ensure that the enclosure stays pristine in even the most temperamental and unpredictable climates. The enclosure is available in green.

AS SERIES & W SERIES

AS115A/AS130A/AS250. Compact 8 ohm systems offer high-fidelity sound and full-frequency response. Speakers are offered in 15, 3, and 50 watt models respectively to meet a variety of stereo application requirements. AS115 and AS130 units are comprised of a 4" low-frequency reproducer and a 1" tweeter. The AS250 includes a 5 1/2" woofer and 1" soft dome tweeter. The enclosure is constructed of high-impact plastic. AS115 internal components are encased within a high-impact plastic enclosure. Model AS130 features a low maintenance, die-cast aluminum enclosure. All models are finished in choice of black (-B) or white (-W) and packaged as a system pair.

W115AT/W130AT/W150AT. Models deliver excellent sound reproduction in 15, 30, and 50 watt versions respectively. Units include an adjustable 8 ohm/70.7 volt selector switch to meet standard or distributed application requirements. Models W130T and W150T feature carbon fiber reinforced polypropylene cone woofer and ferrofluid tweeter housed within a low maintenance die-cast aluminum enclosure. Model W115T is an economical unit which features a 4" woofer and 1" tweeter mounted within a high-impact plastic enclosure. Models are packaged in single units and offered in choice of black (-BK) or white (-WH).

SUBWOOFER AMPLIFIER/ELECTRONIC CROSSOVER SYSTEM

THP-CXB. Is a dedicated 100 watt RMS amplifier with an active crossover that enhances lower frequencies to the subwoofer speaker system. The THP-CXB has been designed and engineered to power all Atlas Sound 8 ohm subwoofers.

AMPLIFIER SPECIFICATIONS	THP-CXB
POWER OUTPUT:	100 Watts RMS, 8-Ohm Load 200 Watts Peak Power Output, 4-Ohm Load
ELECTRONIC CROSSOVER:	
LOW PASS:	24dB/Octave at 85 Hz
HIGH PASS:	6dB/Octave at 85 Hz
INPUT SENSITIVITY:	25mV RMS in for Rated Power
PROTECTION:	Short-Duration, Short Circuit Protection
DIMENSIONS:	17"W x 4 1/2"H x 12 3/4"D (432 x 105 x 324 mm) (Including Volume Control Knobs and Connectors)
POWER SOURCE:	117VAC 60 Hz

IN-FLOOR/IN-CEILING SUBWOOFER

THP-2. For those who desire totally hidden audio components, the THP-2 (U.S. Patent #5,561,717) is an in-floor or in-ceiling model that provides unlimited installation opportunities. Because of its versatile design, this passive 100 watt RMS subwoofer may be installed out-of-sight above suspended tile ceilings, between standard 16" center floor/ceiling joists, or into walls of sufficient depth—allowing the contractor to decide which installation method would be most appropriate and cost effective for each application.

SUBWOOFER SPECIFICATIONS	THP-2
POWER HANDLING (Total System)	100 Watts RMS
DRIVER COMPLIMENT	Two 8" woofers

AP-15/AP-30

APF-15

APC-30T

APR-30AT

APT-34AT

APW-30T

General Description: AP Series environment-resistant loudspeakers are the world standard for voice, music, and signal transmission in indoor and outdoor public address, intercom, security, and industrial signal system applications. Cost-effective, all-purpose units incorporate high-efficiency compression drivers to project through high ambient sound levels and to cover long distances at minimum installed cost. U.S.-made models assure superior intelligibility and service reliability. Weatherproof units are metal and plastic construction. AP Series transformer-equipped models now include a 3-way 25/70.7/100V transformer except Model AP-30T-25 which is 25V.

INDUSTRY STANDARD OMNI-PURPOSE LOUDSPEAKERS

AP-15/AP-30 Series. Patented environment-resistant, double re-entrant loudspeakers are available in 15 and 30 watt versions for medium and high-powered sound distribution. Selection includes 4 ohm models for auxiliary and mobile loudspeaker use, 45 ohm models for intercom application, and 25/70.7/100 volt transformer models with screwdriver-adjust power tap selection for a variety of sound and signaling applications. All include the Omni-Purpose® bracket for vertical/horizontal positioning and have provisions for surface/strap mounting to pillars and I-beams. Grey or beige (C) baked epoxy finish.

RECESSED FLANGE-MOUNTING LOUDSPEAKERS

APF Series. High-efficiency, 15 watt loudspeakers are designed for recessed installation in sound and alarm system applications. Flange mounting units may be installed flush to a panel or recessed into wall or ceiling surfaces. For aesthetic consideration and retrofit convenience of existing cone loudspeaker installations, models will accept any 6" or 8" diameter recessed mounting baffle (Note: 8" baffle mounting requires model MK-2 mounting kit. See APF Series accessories, this section.) Model APF-15 installs inside a 4" deep opening. Model APF-15T fits inside a 5½" deep minimum opening and includes combination 25/70.7/100 volt transformer with screwdriver-adjust power tap selection. Finished in grey baked epoxy.

EXPONENTIAL LOUDSPEAKER

APC-30AT. High-power 30 watt loudspeaker with extended low frequency response is equipped with a wide-angle molded plastic bell for sound directivity. Transformer includes a screwdriver-adjust power selection with a 45 ohm tap for intercom and talk-back use. It also features the Omni-Purpose® bracket for vertical/horizontal positioning and have provisions for surface/strap mounting to pillars and I-beams. Finished in grey baked epoxy. For constant directivity performance, see APX Series.

RADIAL LOUDSPEAKER FOR SUSPENSION MOUNTING

APR-30AT. 30 watt loudspeaker with 40° circular sound dispersion is designed for overhead installation in industrial, transportation, manufacturing, service, recreation and sports centers. Equipped with a combination 25/70.7/100 volt transformer with screwdriver-adjust power selection including a 45 ohm tap. Provision for suspended ceiling installation is included. Finished in grey baked epoxy. Includes conduit adapter. APR-30AT available on or around 7-15-02. Previous model (APR-30T) available until then. APR-30T does not include conduit adapter-order BX-1A if conduit it to be used.

BI-DIRECTIONAL TWIN HORN

APT-34T. Surface-mounting loudspeaker with bi-directional sound dispersion provides concentrated coverage in corridors, stairwells and walkways in commercial, institutional and industrial applications. Twin horn assembly delivers 30 watts of power with a single compression driver and provides 100° sound dispersion in each direction. Includes the Omni-Purpose® bracket and provisions for surface/strap mounting. Equipped with a combination 25/70.7/100 volt transformer with screwdriver-adjust power selection including a 45-ohm tap. Finished in grey baked epoxy. Includes conduit adapter. APT-34AT available on or around 7-15-02. Previous model (APT-34T) available until then. APT-34T does not include conduit adapter-order BX-1A if conduit it to be used.

SURFACE OR FLANGE-MOUNTING EXPONENTIAL

APW Series. High-efficiency 15 and 30 watt loudspeakers provide optimum directed and wide area sound dispersion and high intelligibility for application in medium and high-power commercial sound, intercom and protective signal systems. The exponential flare-rate of the projector bell increases high-frequency dispersion while retaining the space relationship required for good low-frequency reproduction. All models include the Omni-Purpose® mounting bracket and provisions for surface or strap mounting. Additionally, the APW Series may be recessed into a 6½" x 11" baffle cutout and mounted to any flat baffle surface with four screws. Combination 25/70.7/100 volt transformer features screwdriver adjust power selection which includes a 45 ohm tap. Finished in grey baked epoxy. ABS and metal environment-resistant construction. For constant directivity performance, see APX Series.

WIDE FREQUENCY & CONSISTENT BEAMWIDTH CONTROL

Models APX20TN and APX40TN are conservatively rated 20 watt and 40 watt, constant-directivity paging loudspeakers for use in public address or paging applications. The 20 watt model includes a 15 watt tap at 70V; the 40 watt model has a 30 watt tap at 70V. Environment-resistant units feature a 60° x 40° (±10 degrees) constant-dispersion pattern across the controlled frequency band of 1.25-10 kHz. The rotating bell pivots in precise 15° increments for exact on-site positioning of projection angles. A triple lock security mounting method saves installation time and provides long-term stability. APX models are equipped with an internal 25/70.7/100 volt transformer with screw terminal connections made beneath the rear cap. Rear cap will facilitate armored cable. Power stripe code around the driver assembly provides identification of power rating from a distance. One blue band equates to the 20 watt model while the 40 watt version displays two bands. Loudspeaker mounts to die-cast zinc base. Pre-mount the base to a standard 1-gang, 2-gang, or 4" sq. E.O. box. If replacing AP Series speakers, simply remove the APX base and mount to the Omni-Purpose® bracket. Loudspeaker construction is UL94 polycarbonate resin with UV light inhibitor added to prevent embrittlement or discoloration. Finish is neutral. Dimension: 14½" W x 10¼" H x 13¼" D (368 x 260 x 337mm). Weight: 6 lbs. (2.7kg).

UTILITY PAGING RE-ENTRANT HORN LOUDSPEAKERS

GA Series. Double-re-entrant 15 and 30 watt utility horns offer economical and efficient sound penetration for general paging, music, and intercom use. Models GA-15T and GA-30T feature a combination 25/70.7 volt line transformer with multi-position knob for selecting power taps. In addition, loudspeakers include wiring for an 8 ohm connection. Units are ideally suited for installations in commercial buildings, sports facilities and any applications where direct sound coverage is desired. GA Series models are constructed of weather resistant, high-impact plastic for indoor/outdoor installations and feature an adjustable surface mounting bracket to allow for multiple vertical and horizontal positioning. Loudspeakers are finished in gray.

COMPACT, HIGH-EFFICIENCY LOUDSPEAKERS

SC Series. Cost-effective series with versatile application provides directional sound projection and spot coverage in indoor and outdoor intercom and paging systems or functions as an extension loudspeaker to alarm systems and communication receivers. Standard Model SC-15 is an 8 ohm speaker and may be used with an external 25/70.7 volt transformer (order separately). Includes detachable swivel bracket. Weather-resistant construction. Finished in light beige epoxy. - Also available SC15-45 (45 ohm) version.

UTILITY AND MOBILE COMMUNICATIONS LOUDSPEAKERS

RC Series. Accessory loudspeaker enhances voice intelligibility-range for communications, radio-telephone, electronic hailer and alarm system installations in marine and vehicular applications. Series meets the element and vibration resistance requirements of industrial, service and utility vehicles and is recommended for area paging, intercom and low-power siren applications. Voice coil impedance is 8 ohm. Model RCM-15 has a round projector and includes the Omni-Purpose® mounting bracket for vertical and horizontal positioning. Model RCR-15 includes round projector bell and rigid 90° angle platform-mount.

MO-2. Compact, 8 ohm unit is designed for signal transmission in vehicular alarm, CB, marine radio and transceiver installations where concealed mounting or minimum aerodynamic obstruction is desired.

HIGH-POWER RE-ENTRANT LOUDSPEAKERS

AP-15TU/APF-15TU Series. 15 watt surface and flange mounting loudspeakers for life safety and communication system applications are designed for use with compatible control equipment to provide high-intelligibility voice and signal transmission in emergency alarm, protective signaling, sound and intercom system installations. AP-15TU(C)/AP-15TUCR Series are surface mounting units with Omni-Purpose® mounting bracket for vertical and horizontal positioning. Series also includes provisions for surface or strap mounting to pillars and I-beams. APF-15TU(C) Series are flange mounting units for recessed installation. All models include 25/70.7V Vari-Tap® transformer. Units with (C) suffix include 5-mfd capacitor for line supervision. Weatherproof construction. Finished in grey baked epoxy or red (R) as noted. *Models comply with UL Standard 1480—Speakers for Fire Protective Signaling Systems and California State Fire Marshal (Title 19). Models with special modifications to meet New York City MEA (Calendar no. 57-74-SA) and UL Canada are also available as standard product. Contact factory.*

REFLEX SOUND HORNS

BI-AXIAL HORN WITH GIMBAL MOUNT

BIA-100. Features a twin reflex air column for controlled directivity and an exponential bell for constant sound dispersion and linear frequency response emphasis. Unit is designed for use with compression driver units in high-power voice, music and signaling systems including service and mass transit centers, industry and commerce, educational and institutional applications. Patented gimbal mount for surface or flange mounting provides labor-saving installation and horizontal/vertical positioning adjustment. Non-resonant foam construction is suitable for indoor and outdoor application. Finished in non-glare matte black.

HORN FOR EXPONENTIAL SOUND DISPERSION

CJ-46. All-purpose unit is a low silhouette, directional horn for sound and signaling installations where wide-area dispersion and maximum sound and audibility are required. Recommended for use with compression driver units in indoor and outdoor applications including community warning systems, sports and leisure facilities, industry and commerce. Mounting bracket for vertical, horizontal or stacked positioning is heavy-duty steel with positive lock. Weatherproof bell is all-fiberglass construction finished in black.

HORNS FOR UNIFORM DIRECTIONAL SOUND PROJECTION

DR Series. Circular horns offer clean and uniform reflex sound path for high-efficiency penetration of voice or music over distance and ambient noise. Designed for use with compression drivers in sound and signaling installations including industrial plants, retail service establishments, sports facilities, church towers, amusement parks, and mass transit terminals. Includes heavy duty "U" shaped mounting bracket. All-metal construction. Finished in grey baked epoxy.

UNIVERSAL DRIVER-TO-HORN ADAPTERS

DA-FH. Compression driver adapter for flange-terminated sound projectors. (1 1/8"-18F to 1" throat bolt-on)

YDA-TH. Dual adapter for combining two compression drivers to one sound projector. (Two 1 1/8"-18F thread to 1 1/8"-18M thread)

EXPLOSION-PROOF LOUDSPEAKERS

30 AND 60 WATT LOUDSPEAKERS

HLE and MLE Series. These UL and CSA (HLE Models only) listed loudspeakers are specified for high-efficiency transmission of voice and/or electronic signals within explosive or combustible atmospheres and environments. Drivers and projector horns may be configured to comply with specific environment classification groups within Class 1 ratings. HLE Series drivers are 60 watts. MLE Series are 30 watts. Both are offered with an internally mounted line transformer (-T) or without. To meet UL Standards for loudspeakers in distributed applications, models with factory-mounted transformer (-T) must be specified. Projector horn Model HLE/MLE-30 is a reflex-type sound projector of molded plastic with wide-angle dispersion. Model HLE/MLE-32 is an all-metal circular reflex horn with directional sound distribution pattern. Drivers and projector horns are ordered and shipped separately. For performance accuracy, specifications are listed for assembled configurations. All models are equipped with 1/2" conduit access and adjustable mounting bracket. Horn Model HLE/MLE-30 with a mounted driver measures 14" W x 6" H x 17 1/2" D. Model HLE/MLE-32 horn with a mounted driver is 16 1/2" Dia. x 21 1/2" D.

For Canadian Use: ULC listed product (HLE 2 Series) are available in both Class2 (Explosion Proof and Dust Ignition Proof Electrical Equipment) and Class 3 (Explosion Proof). Please call for details. Atlas Sound explosion proof speakers meet division 1 & division 2 criteria. UL Listings include: UL1203; UL1604; UL2279; UL913 & UL813.

UNDERWRITERS' LABORATORY LISTINGS

MODELS	CLASS/GROUP	FOR ATMOSPHERE CONTAINING:
HLE-1 MLE-1	Class 1 / Group C & D	Gas Atmospheres (Including Ethyl, Ether, Gasoline Naptha, Alcohols, Butane, Propane)
HLE-3 MLE-3	Class 1 / Group B, C & D	Gas Atmospheres (Including Ethyl, Ether, Gasoline Naptha, Alcohols, Butane, Propane), plus Hydrogen, Gas and Vapor, (Manufactured Gas).

Model Series HLE and MLE are listed under UL 813 (Commercial Audio Equipment) and UL 1203 (Explosion-Proof Electrical Equipment). HLE Series is also CSA listed.

15, 30 AND 60 WATT TRANSFORMERS

Atlas Sound constant-voltage line-matching transformers are designed for use with compression driver type loudspeakers. U.S. made for dependable performance and service reliability, all units provide low insertion loss and cost-efficient power handling. (Transformers for cone loudspeakers are listed in Section 1.)

T-10. 15 watt transformer includes external "power reminder" indicator to reference the power setting in use. Primary: 8K, 4K, 2K, 1K, 670, 325, 180, 90 and 45 ohm. 70.7 Volt taps: .65, 1.25, 2.5, 5, 7.5, 15. Secondary: 4, 8 and 16 ohm.

T-11. 15 watt transformer in weatherproof housing. Specifications are the same as Model T-10.

T-18. 60 watt transformer without weatherproof housing. Primary: 2K, 1K, 500, 250, 125, 85 and 45 ohm. 70.7 Volt power taps: 2.5, 5, 10, 20, 40, 60. Secondary: 4, 8 and 16 ohm.

T-20. 30 watt transformer. Primary: 2500, 1300, 666, 333, 167, 89 and 45 ohm. 25 Volt power taps: 1.89, 3.7, 7 and 15. 70.7-Volt power taps: 1.8, 3.7, 7.5, 15 and 30. Secondary: 8 ohm.

CABLE/CONDUIT ADAPTERS

Vandal-resistant cover plates for armored cable and conduit connection are designed for use with environment-resistant, double re-entrant loudspeakers. BX Series mounts standard male threaded pipe with 14 threads per inch. Construction is cast aluminum.

MODEL	MOUNTS
BX-1A	APC-30 Series, APW-30T
BX-2A	AP-15, AP-15T, APW-15T
BX-3A	APF-15, APF-15T

MOUNTING ACCESSORIES

APBK. Replacement Omni-Purpose® swivel bracket, grey.

MK-2. Mounting kit for installation of APF Series flange loudspeakers to 8" diameter loudspeaker baffles.

XS8200601. AP-style Omni-Purpose® base only, painted neutral to match APX Series constant directivity loudspeakers.

APXBK-N. APX Base/swivel assembly; neutral color.

APXB-G. APX Base only; grey (matches AP Series).

APXB-N. APX Base only, neutral color.

APF SERIES BAFFLES, ENCLOSURES & MOUNTING RINGS

L20-100. Round grille. CRS construction with baked white epoxy finish. Mounts APF-15 or APF-15T. 11" (279mm) Dia. x 3/8" (10mm) Deep.

L20-101. Square grille. CRS construction with baked white epoxy finish. Mounts APF-15 or APF-15T. 10 1/2" Sq. (267mm) x 3/8" (5mm) Deep.

L20-201. Recessed 20-ga. CRS enclosure for L20-100 grille. Includes combination conduit knockouts for access. Undercoated to prevent resonance. 8 3/8" (217mm) Dia. x 6" (152mm) Deep.

L20-213. Square surface enclosure for mounting L20-101 grille. Conduit knockouts and mounting holes located in top. White epoxy finish. 10 1/2" Sq. (270mm) x 6" (152mm) Deep.

L20-220. Round mounting ring for L20-100 grille. 89/16" (217mm) Dia. x 5/8" (16mm) Deep.

L20-222. Same as L20-220 with mounting ears for 24" (610mm) lay-in tile.

193-8-6. Cost-efficient enclosure is provided in two depths and furnished with four compound conduit knockouts for standard screw-mount baffle installation. Construction is CRS, undercoated and finished in black epoxy.

FAMT-6. Mounting ring/adaptor allows a 6" cone or APF Series loudspeaker to mount an 8" enclosure and/or grille.

This guide will assist you in ordering Atlas Sound baffle/enclosure/mounting ring/tile bridge combinations. On this page, Atlas Sound baffle model numbers appear in numerical/alphabetical order along with the enclosure(s), mounting ring(s), or tile bridge(s) to which the models mount. Atlas Sound enclosure, mounting ring, and tile bridge model numbers are listed with their corresponding baffle(s) on the next page.

* X44 * X45 * X8409 * X8414	--	--	(standard E.O. box)

* May be appropriate for indoor/outdoor use provided suitable hardware and gaskets are used.

Notes:

- * The FA81-4, FA81-6 & FA81-8 will only support the enclosure. To attach both grille and speaker, a FA enclosure or ring must be purchased.
- ** The FA-TR trim ring is for pre-construction use. It defines the cut-out hole, but provides no attachment points for either speakers or grilles. FA enclosures or plaster rings must be purchased in addition to the FA-TR. NOTE: For proper support, torsion spring grilles should not be used with any loudspeaker/transformer assembly exceeding 5 lbs.
- *** EQ81 Tile bridge works only with the EQ818-BX, Q408 and 96-8 Series enclosures.
- **** The T620-8 will not accommodate an enclosure when used with the 81-S tile bridge.
- ***** The T620-8 will not work with the T198-8 enclosure when used with the 81-S tile bridge.

Channel Supports

180 Series. For application in suspended ceiling installations where adequate support is not available to mount loudspeaker, enclosure and baffle. Furnished with provisions to mount any type of protective enclosure or plaster frame. CRS construction. Galvanized finish.

186 Series. Support rails provide quick and efficient installation of protective enclosures and mounting rings in 16" (406mm) and 24" (610mm) stud ceiling construction. Adjustable slot and sliding basket nut allow a wide range of positioning flexibility to meet your application requirements. 186 Series is ideal for use with 95 and 96 Series enclosures and 75 and 76 Series mounting rings for 8" loudspeakers. Note: series will not accept enclosures and mounting rings for 4" loudspeakers. CRS construction. Galvanized finish.

Notes:

- * The FA81-4, FA81-6 & FA81-8 will only support the enclosure. To attach both grille and speaker, a FA enclosure or ring must be purchased.
- ** The FA-TR trim ring is for pre-construction use. It defines the cut-out hole, but provides no attachment points for either speakers or grilles. FA enclosures or plaster rings must be purchased in addition to the FA-TR.
- *** NOTE: For proper support, torsion spring grilles should not be used with any loudspeaker/transformer assembly exceeding 5 lbs.
- **** EQ81 Tile bridge works only with the EQ818-BX, Q408 and 96-8 Series enclosures.
- ***** The T620-8 will not accommodate an enclosure when used with the 81-S tile bridge.
- ***** The T620-8 will not work with the T198-8 enclosure when used with the 81-S tile bridge.

CYLINDRICAL BAFFLES

X409X8414

435 Series

DESIGNER BAFFLE ENCLOSURES

X Series (4+ and 8+). Unique to the commercial sound industry, these Atlas Sound baffle/enclosures provide aesthetic compliment to well-planned architectural interiors. Stylish appearance and high-quality workmanship enable these baffles to function as integral design elements in applications where architectural integrity is a primary concern including hotels, meeting rooms, reception areas, lounges, restaurants, airports and transportation terminals. Selection includes direction-controlled cylindrical units for surface, suspension or wall-mounting applications, and a bi-directional unit for surface installation. Units are manufactured of aluminum and include cast aluminum mounting base and choice of two colors. Suffix model number (A) Satin Aluminum or (W) Satin White. Canopies, grilles with regressed steps, and mounting base are finished in matte black enamel. Perforated grille is manufactured from 22-gauge CRS and finished in matte black enamel.

All X Series mount to a standard 4" octagonal E.O. Box.

MODEL	TYPE	MOUNTING CONFIG.	MOUNTS SPEAKER SIZE	DIMENSIONS INCLUDING HARDWARE

* Projection of suspended installations will vary.

SUSPENSION HANGERS

435 Series. Designed to support and suspend baffle Models X44, X8414 and X8409. Hangers are available in multiples of 1 foot and include brushed aluminum canopy, nickel-plated hang straight swivel, zinc plated 1/2" (13mm) steel tubing and necessary hardware. Units mount directly to a 4" (102mm) octagon E.O. box (not included). The 435 Series features an angular canopy and is designed to mount on flat ceilings or those with a slope of 15° or less.

MODEL	LENGTH
435-1	1 ft. (305mm)
435-2	2 ft. (610mm)
435-3	3 ft. (914mm)
435-4	4 ft. (121.92cm)
435-6	6 ft. (182.88cm)

ROUND RECESSED BAFFLES FOR 4" AND 8" LOUDSPEAKERS

T51-84

51-8

60-8

ECONOMICAL STEEL BAFFLES

51 Series. This industry favorite is an aesthetically pleasing and cost-efficient baffle available in standard screw-mount or labor-saving torsion-spring (T) versions. Models for 4" loudspeakers include welded mounting studs. One-piece CRS construction. Textured white epoxy finish.

MODEL	SPEAKER	DIAMETER	PROJECTS	ENCLOSURE	or MNTG RING

THREE

ROUND RECESSED BAFFLES

T720-4BT

T720-8A

T730-8B

SCULPTURED CONCEALED MOUNTING BAFFLES

T720-4 Series. High-quality grille with contoured trim ring and fine perforation pattern coordinates with lighting fixture trims to provide a clean and contemporary appearance for 4" loudspeakers. Models have provisions to accommodate ceiling thicknesses up to 2" deep. All models also feature a flush perforated center section, torsion springs, and concealed loudspeaker mounting studs. Welded CRS assemblies are finished in textured white. (Model T720-4BT was formerly Engr. Special M4551-4BT.)

T720-8A. Attractive baffle mounts 8" loudspeakers and offers all of the features of the T720-4 Series described above with the addition of two separate deep-ceiling, torsion-spring brackets to accommodate varying ceiling depths up to 2".

MODEL	SPEAKER	DIAMETER	PROJECTS	ENCLOSURE or	MTG. RING

VP410-S

VP510-B

RECESSED CIRCULAR BAFFLE

VP60-R. Ruggedly constructed baffle assembly provides tamperproof protection for 8" cone loudspeakers or APF Series re-entrant horns by means of adapter plate Model FAMT-6 (order separately). Trim ring is cast from self-aging aluminum alloy with a tensile strength of 44,000 P.S.I. Loudspeaker grille is stainless steel woven wire mesh reinforced by a perforated CRS loudspeaker adapter. Tamperproof screws are manufactured of a special heat-treated alloy and mount in countersunk holes for added security (special wrench included). Finished in satin aluminum with a clear lacquer coating.

MODEL	SPEAKER	DIMENSIONS	ENCLOSURE	or MTG. RING
VP60-R	8" (203mm) APF-15(T), APF-15TU(C)	12 ³ / ₄ " (324mm) Dia. x 1" (25mm) D.	(T)95-8 Series, 96-8 Series, CS95-8, Q408	75-8(E2), 76-8(E2)

* Accepts optional horn adapter plate Model FAMT-6 (order separately).

RECESSED OR SURFACE-MOUNT SQUARE BAFFLES

VP161 Series. Versatile series features security for a variety of cone and re-entrant horn loudspeaker types and sizes. Manufactured from special self-aging aluminum alloy with a tensile strength of 44,000 P.S.I. Loudspeaker grille is reinforced with a perforated CRS stud-mounting plate. Baffle installs with special heat-treated alloy screws which are countersunk to enhance security (special wrench provided). Finished in textured white epoxy. Baffles may be flush or surface-mounted using noted enclosures.

UNI- AND BI-DIRECTIONAL BAFFLE/ENCLOSURES

VP410-S/VP510-B. Welded cylindrical baffles of sturdy construction provide security against vandalism for 8" cone loudspeakers. Model VP410-S is a flush mount unidirectional baffle/enclosure that can be used with 8" cone loudspeakers and APF Series re-entrant horns by means of adapter plate Model FAMT-6 (order separately). Model VP510-B is identical to the VP410-S, except that it includes an attractive canopy mount designed for bi-directional sound dispersion. Housings are spun .090 tempered aluminum plate. Loudspeaker grille is cast from special self-aging aluminum alloy with a tensile strength of 44,000 P.S.I. Grille is reinforced with a stainless steel wire mesh screen spun over a CRS subplate. Housing and grille are assembled using flush-mount heat-treated alloy screws. Models mount to standard E.O. boxes (not included), however, Model VP410-S installs via keyhole slots on the rear of the housing or may be flush mounted with anchors to ceiling or wall. Model VP510-B installs using a heavy cast aluminum canopy for ceiling or wall installations. Baffle and housing are finished in satin aluminum with a clear lacquer coating. Canopy (of VP510-B) is finished in black epoxy. (Note: Model VP510-B not intended for use with re-entrant horns.)

MODEL	SPEAKER	DIMENSIONS	MOUNTS

* 4" octagon style E.O. Box.

RE-ENTRANT HORN ADAPTER PLATE

FAMT-6

FAMT-6. Specially designed plate retrofits vandal-proof baffles to accept APF Series re-entrant horns. It is also a general-purpose mounting ring/adapter for retrofit applications which allows a 6" cone or horn loudspeaker to mount an 8" enclosure and/or baffle. (Model FAMT-6 replaces VPA-APF.)

DIGITAL CLOCK/SPEAKER BAFFLE

DC162-8

DC162-8/DC162-8SF. Popular DC162-8 is a recessed assembly which features an attractive square baffle with rectangular clock panel designed to mount digital clocks with the same dimensions as Rauland Borg Models 2410 and 2420. (Order clock from others.) DC162-8SF consists of the DC162-8 baffle mounted to a specially-designed sloped-front 20 gauge CRS enclosure. Models are finished in textured white epoxy.

ANALOG CLOCK SPEAKER BAFFLES

Atlas Sound clock/speaker baffles feature a patented universal clock mounting bracket which enables secure mounting of any 9", 10" or 12" standard clock (by others). Universal clock mounting bracket is secured via #4 weld studs. To ensure proper fit, the overall diameter of the selected clock must clear the clock/hole clearance diameter listed in the chart below. All clocks must mount from the front. The bracket can also be easily modified (trimmed) in the field to clear clock dust covers or motors. Compatible clock manufacturers include: *American Time & Signal, Cincinnati, DuKane, Edwards, Faraday, Franklin, Latham, National, Rauland, Standard, and Simplex.*

830 Series. Economical recessed or surface-mounting assembly features a CRS grille and trim ring mounted on an 18-gauge CRS panel. Unit also includes a black gasket for concealed loudspeaker mounting. Assembly installs with double-action torsion spring system to eliminate visible hardware. Assembly is finished in textured white.

840 Series. Baffle for recessed or surface-mounting features a CRS perforated grille, CRS frame and black subplate for concealed loudspeaker mounting. Grille and frame are finished in textured white epoxy.

NC850 Series. These recessed baffles feature three panels for mounting clock, loudspeaker, and controls in one framed assembly. Baffles will mount round or square clocks, loudspeaker, and choice of controls. The NC850 control panel opening is 15 1/2" wide for mounting (2) two 4"W x 6"H and (1) one 7 1/2"W x 6"H panels or one 15 1/2" blank filler panel. Panel styles may be mixed and matched to meet application requirements. A continuous piano hinge permits easy access for servicing. A lock in the center panel allows opening by authorized personnel only. Loudspeaker mounts to a concealed black subplate and toggle switches mount to rear-mounted weld studs. Frame is 20-gauge CRS finished in textured black epoxy. Loudspeaker grille is 22-gauge perforated CRS finished in textured white. Control panel is 20-gauge CRS finished in textured white.

UL CLASSIFIED FIRE-RESISTANT SPEAKER ASSEMBLIES

FR Series. Atlas Sound has developed the only speaker assemblies that are UL classified for fire-resistance in the United States and Canada. The FR Series has passed a fire-rating up to three hours (rating varies by ceiling construction) and has been tested in accordance with the UL standard – Fire Test of Building Construction and Materials, ANSI/UL263 (ASTM E119, NFPA 251).

FR Series assemblies include an enclosure-fiber kit, UL listed speaker/transformer assembly, and choice of UL Listed baffle. Each enclosure-fiber kit includes pre-cut fiber panels, metal enclosure, rail set and hardware. The 43 speaker/transformer combinations approved for use in FR assemblies are FR versions of the industry standard Atlas Sound Strategy Series FA134, FA136, FA138 models and the C803A, C5A, C10A, and FC104 loudspeakers. The approved baffles are also FR versions of familiar Atlas Sound models.

To maintain UL Classification for fire-resistance, enclosure-fiber kits must be used with FR Series components.

FR Enclosure-Fiber Kit includes enclosure, pre-cut fiber panels, and rails

ATLAS SOUND FR SERIES BENEFITS ARE CLEAR !

UL Classification!

The UL mark is universally recognized and respected. Local regulatory agencies can feel confident in approving the UL Classified FR Series...the only UL Classified Fire Resistant Speaker Assemblies in the US and Canada!

Quick Installation & Low Installed Cost!

The installed cost of an FR Series loudspeaker system will be substantially lower than the installed cost of a conventional loudspeaker system using contractor-constructed drywall fire boxes.

Wide Selection & Proven Performance!

FR Series loudspeaker components are UL Classified versions of proven Atlas Sound models. Installing an FR Series system means no compromise in Atlas Sound's high performance and quality standards.

ATLAS SOUND MAKES INSTALLATIONS EASY!

- 1 Attach rails to enclosure
- 2 Assemble pre-cut fiber panels over enclosure, notch fiber at rails
- 3 Wire top panel to sides at four corners

EASY TO ORDER!

Choose from 43 FR Series speaker assemblies

Select matching FR enclosure-fiber kit

EZ95-8

ALL MODELS (EXCEPT EZ95-8)
Mounting rails are 26" (660mm)
long and supported on the T-Bar.

EZ95-8 ONLY
Mounting rails are 23 3/4" (603mm)
long and supported on the ceiling tile.

General Description

Time and labor-saving enclosure system (Patent #4, 484, 658) for 4" and 8" loudspeakers installs quickly and efficiently. Enclosures have premounted brackets and install easily with screws to support rails provided. No costly tile bridge is necessary. Welded CRS enclosures are undercoated and finished in textured black epoxy. Support rails are CRS and finished in a galvanized coating.

BLIND-MOUNT ENCLOSURES FOR 4" & 8" LOUDSPEAKERS

BMT Series. Unique enclosure system (U.S. Patent #4, 673, 149) provides easy and cost-effective loudspeaker installation in hard-to-access ceilings, including drywall. Models are equipped with unique mounting ears that telescope out from the enclosure interior and adjust vertically to accommodate ceilings with a thickness of 1/2" (13mm) to 1 1/2" (35mm). Construction is CRS with torsion spring receptacles and three 1/2" (13mm) conduit knockouts in the enclosure top. J-Nuts are included on the return of the enclosure to accommodate surface-mounting grilles. Standard depth Models BMT95-8 and BMT95-4 include sound dampening material to minimize metallic resonance. Extra depth Models BMT95-8-7 and BMT95-4-7 feature high-density, acoustic batting.

ENCLOSURES FOR EXTENDED LOUDSPEAKER PERFORMANCE

EXTRA-DEPTH BACKBOXES FOR 8" LOUDSPEAKERS

Achieve improved low-frequency performance of 8" commercial and professional loudspeakers with Atlas Sound extra-depth enclosures. Increased volume extends bass response by allowing additional acoustic loading for cost-effective application wherever enhanced audio quality is desired. Enclosures are undercoated and lined with 1 1/2" (38mm) thick high density fiberglass (1 1/2 lbs per cu ft) to prevent metallic resonance in the high end of the frequency spectrum. Selection includes industry-standard 95 Series in screw-mount and torsion spring (T) versions, popular 96 Series with internal mounting holes on the flange for installation convenience in acoustic tile ceilings and Model 191-78-8 with adjustable mounting bracket for installation flexibility in a variety of ceiling types and depths. All enclosures are heavy-gauge CRS furnished with combination conduit knockouts. Recessed models are finished in textured black epoxy. Surface model is finished in textured white epoxy.

Q SERIES ENCLOSURES

General Information: Q Series assembly matches the acoustical characteristics of 3/4" (19mm) plywood, while providing the structural, economic, and code regulation benefits afforded by metal enclosures. Construction is 18-gauge CRS with formed strengthening ribs on the enclosure back. Acoustic fiberboard is permanently affixed to the inner wall surfaces of all square enclosures to eliminate hangover and vibration (cylindrical enclosures utilize undercoating). Inner walls are also lined with 1 1/2" (38mm) thick fiberglass having a 1 1/2 lb./cu. ft. density to control unwanted resonances in the high end of the frequency spectrum. Compound 1/2"-3/4" (13-19mm) conduit knockouts are furnished on all four sides to facilitate wiring. Enclosures are finished in black textured epoxy (Q428-SA is white epoxy). Note: Recessed enclosures with a cubic content greater than 1 cu. ft. may require optional QR Series mounting angles.

SURFACE ENCLOSURE WITH PREMOUNTED CRS BAFFLE

Q428-SA. Convenient assembly is 1 1/2 cu. ft. with 1/2" thick fiber board. Package includes above specifications and premounted baffle (included) is recessed into the enclosure for flush appearance. Back plate is removable for installation ease. Finish is textured white epoxy.

MODEL	SPEAKER	CU. FT.	A	B	C
Q428-SA	8" (203mm)	1 1/2 (0.42m ³)	18" (457mm)	18" (457mm)	8 1/2" (216mm)

MOUNTING ANGLES

QR30. Optional angles are recommended for Q Series enclosures with a cubic content greater than 1 cu. ft. 16-gauge CRS construction. Angles are 30°L (762 mm) and finished in black baked epoxy (1 pr.).

ROUND PROTECTIVE ENCLOSURES FOR RECESSED INSTALLATION

E410-11

96-4

TORSION SPRING ENCLOSURES FOR 4" LOUDSPEAKERS*

E410 Series. Enclosures mount 4" loudspeakers and accept a variety of torsion-spring grilles. Model E410 is 1/4 cu. ft. (.007m³) enclosure. Model E410-11 is an extra-depth [1/2 cu. ft. (.014m³)] version of the E410. All versions are constructed of CRS, undercoated, equipped with torsion spring receptacles, and finished in textured black epoxy. Models with (NK) suffix have no conduit knockouts. Use model FA81-4 tile bridge or 180 series rails for suspended ceiling applications.

MODEL	A	B	C	D
E410(NK)	10 1/8" (257mm)	6 3/8" (162mm)	6 1/2" (165mm)	1/2" (13mm)

ECONOMICAL COMPACT ENCLOSURE FOR 4" LOUDSPEAKERS*

96-4 Series. Cost-effective enclosure for 4" (102mm) loudspeakers are designed to screw-mount baffle. Models 51-4 and 60-4. Model 96-4 is equipped with compound conduit knockouts.

MODEL	A	B	C	D	E
96-4*	6 1/4" (159mm)	6 1/4" (159mm)	4 1/4" (108mm)	1/2" (13mm)	7 1/8" (181mm)

*Reference Baffle/Enclosure Mounting Guide for list of compatible grilles.

Enclosures are UL 1480 general signaling listed and accepted under UL 2043 for use in air handling "plenum" spaces.

EXTRA-DEPTH ENCLOSURE FOR 4" LOUDSPEAKERS**

96-4X Series. Providing improved low-end performance for 49 loudspeakers. Model 96-4X has a volume of ¼ cu. ft. (.007m³). They are similar to Series 96-4 with increased width and depth. Constructed of CRS, undercoated, and finished in textured black epoxy.

MODEL	A	B	C	D
★ 96-4X	10" (254mm)	6¼" (159mm)	6" (152mm)	½" (13mm)

96-4X

ECONOMICAL ENCLOSURE FOR 8" & 12" LOUDSPEAKERS**

95 Series. Versatile, industry-standard enclosures are available in many configurations to meet installation and application requirements. Original Models 95-8 and 95-12 are furnished with four compound conduit knockouts each, flexible perforated straps and 8-32 J-Clips. Models with (T) prefix are also equipped with torsion-spring receptacles. Models with (NS) suffix have no mounting straps—those with (NK) suffix have no knockouts. Assemblies are CRS with textured black epoxy finish and patch-jute lining. For extra depth Models (T)95-8-7 and (T)95-8-10 with acoustic fiberglass see "Enclosures for Extended Loudspeaker Performance," this section.

95-8

STACKABLE ENCLOSURES**

CS95 Series. Ideal for contractors with limited storage facilities, this conically shaped enclosure nests to achieve reduced inventory space requirements and transportation costs. Furnished with four combination conduit knockouts ½"–¾" (13–19mm), flexible perforated strap, and four J-clips. One-piece CRS construction, undercoated, patch-jute lined and finished in textured black epoxy. (Note: Enclosure is not designed to mount loudspeakers with premounted line transformer models HT167 and HT327).

MODEL	A	B	C	D

CS95-8
(stacked)

CS95-8

ENCLOSURE WITH INTERNAL MOUNTING HOLES**

96-8 Series. Popular enclosure is designed with mounting holes located on the internal flange of the enclosure to provide installation ease and convenience in acoustic tile ceiling applications. Furnished with four compound conduit knockouts and extended plaster flange. Constructed of CRS, undercoated and finished in textured black epoxy. Model with (NK) suffix has no knockouts. For extra depth Models 96-8-7 and 96-8-10 with acoustic fiberglass, refer to "Enclosures for Extended Loudspeaker Performance," this section.

RECTANGULAR ENCLOSURES FOR RECESSED INSTALLATION

ENCLOSURE WITH ADJUSTABLE MOUNTING BRACKET**

191 Series. Versatile enclosure is ideal as a standard stock item. Features an adjustable mounting bracket (⅞"–¾") to provide installation flexibility in a variety of ceiling types and depths. Series is available in choice of two depths and for standard screw-mount and torsion spring (T) baffle installation. CRS enclosure is furnished with four compound conduit knockouts, heavy undercoating, patch-jute lining and black epoxy finish. For extra-depth Model 191-78-8 with acoustic fiberglass, refer to "Enclosures for Extended Loudspeaker Performance," this section.

MODEL	A	B	C	D

TILE BRIDGES FOR 4" & 8" LOUDSPEAKERS*

81-8S/81-8R/81-4. Load-bearing bridges prevent ceiling tile sag in ceiling installations by distributing loudspeaker, enclosure and/or baffle assembly weight to overhead T-bar support members. Model 81-8S mounts 8" loudspeaker packages and enclosures and features a square cut-out with a multi-position hole pattern to accommodate a variety of round and square baffles including torsion spring and screw-mount models. Model 81-8R has a round cut-out and mounts 8" loudspeaker packages and enclosures; the 81-4 has a round cut-out and mounts 4" loudspeaker packages. All tile bridges are constructed of 24-gauge rust-resistant electrogalvanized steel.

MODEL	CUT-OUT	LENGTH	WIDTH	DEPTH

*Tile bridges for Strategy Series and EQ Series loudspeaker systems are located with the system components in section 1.

CHANNEL SUPPORTS

180 Series. For application in suspended ceiling installations where adequate support is not available to mount loudspeaker, enclosure and baffle. Furnished with provisions to mount any type of protective enclosure or plaster frame. CRS construction. Galvanized finish.

186 Series. Support rails provide quick and efficient installation of protective enclosures and mounting rings in 16" (406mm) and 24" (610mm) stud ceiling construction. Adjustable slot and sliding basket nut allow a wide range of positioning flexibility to meet your application requirements. 186 Series is ideal for use with 95 and 96 Series enclosures and 75 and 76 Series mounting rings for 8" loudspeakers. Note: series will not accept enclosures and mounting rings for 4" loudspeakers. CRS construction. Galvanized finish.

MODEL	LENGTH
180-2	23 ³ / ₄ " (603mm)
180-4	47 ³ / ₄ " (1213mm)
186-16	18" (457mm)
186-24	26" (660mm)

MOUNTING RINGS*

75 Series. Versatile series is ideal for installation of screw-mount and torsion-spring (T) baffles with 8" (203mm) and 12" (305mm) loudspeakers. Recommended for a variety of ceiling constructions including dry wall, plaster and conventional ceiling applications when protective enclosures are not required. CRS construction. Finished in black epoxy. Four staking rivets or two torsion tabs included. (E1 suffix designates models with mounting ears for 16" (406mm) stud ceilings; E2 for 24" stud ceilings.) Note: T75-8 will not accept Model T730-8 grille.

MODEL	A	B	C
(T)75-8	11 ³ / ₄ " (298mm)	9 ⁷ / ₈ " (251mm)	—
(T)75-8E1	11 ³ / ₄ " (298mm)	9 ⁷ / ₈ " (251mm)	17" (432mm)

P Series

P77-8

P78-8

PR411

PR412

72-8E1

MOUNTING RINGS (CONT.)

P Series. Plastic mounting rings are ideal for retrofit applications with hard-to-access ceilings. Model P77-8 may be conveniently installed from ground level by cutting a 12" (305mm) dia. hole in the ceiling, snapping ring at breakslot, and maneuvering it up through hole to rest above ceiling. Model P78-8 includes mounting ears for conventional installation in 16" (406mm) stud ceilings. Construction is polystyrene plastic. Four J-nuts included.

MODEL	A	B	C
P77-8	13 ⁵ / ₈ " (346mm)	11 ¹⁵ / ₁₆ " (303mm)	—
P78-8	13 ⁵ / ₈ " (346mm)	11 ¹⁵ / ₁₆ " (303mm)	18" (457mm)

PR411/PR412. Versatile mounting ring installs to a variety of torsion-spring grilles with 4" (102mm) loudspeakers in drywall, plaster and conventional ceiling construction. Recommended for ease and economy when a protective enclosure is not specified. CRS construction. Finished in black epoxy. Includes torsion tabs.

MODEL	A	B	C	D
PR411	7 ⁷ / ₈ " (200mm)	6 ³ / ₈ " (162mm)	2 ¹ / ₄ " (57mm)	1/2" (13mm)
PR412	7 ⁷ / ₈ " (200mm)	6 ³ / ₈ " (162mm)	3 ¹ / ₄ " (83mm)	1/2" (13mm)

PR Series. These models mount several Atlas Sound torsion spring grilles with 4" (102mm) loudspeakers. Model PR411 is a versatile mounting ring that installs a variety of torsion spring grilles; PR412 is provided for use with Model T730-4B only. All units are of 20 ga. CRS construction, finished in textured black epoxy, and include two torsion tabs.

MODEL	A	B	C
71-8E2	13 ¹ / ₂ " SQ. (343mm)	11 ³ / ₄ " SQ. (298mm)	17" (432mm)

72-8E1	12 ¹ / ₄ " SQ.	10 ¹ / ₈ " SQ. (311mm)	17" (432mm) (271mm)

MOUNTING FRAMES

71/72 Series. Versatile series is ideal for installation of screw-mount baffles with 8" (203mm) loudspeakers when protective enclosures are not required. Selection includes models for a variety of ceiling constructions including drywall, plaster, conventional, and stud ceiling applications. Models with an (E1) suffix include mounting ears to accommodate 16" (406mm) stud ceiling construction. Models with an (E2) suffix include mounting ears for 24" (610mm) stud ceiling applications. All models are CRS construction and include four 8-32 weldnuts or two torsion tabs. Finished in black epoxy.

INDUSTRY STANDARD AUTO TRANSFORMER

AT Series. UL listed high-quality auto transformer series provides the advantages of excellent frequency response, low insertion loss and reliable performance for volume control application in 25 and 70.7 volt systems. Attenuation is accomplished in ten steps plus positive off position. (No stop between maximum and off position to prevent switch damage). Contacts are silver plated for noise-free operation. Includes stainless steel plate, stamped and filled dial scale with skirted black knob.

MODEL	POWER RATING (Watts)	ATTENUATION PER STEP	TOTAL ATTENUATION	INSERTION LOSS	PLATE SIZE	PLATE TYPE	PLATE COLOR
★ AT10(-PA)	10	3dB	33dB	.4dB	1 gang	Stainless	NA
★ AT35(-PA)	35	3dB	27dB	.6dB	1 gang	Stainless	NA
★ AT100(-PA)	100	3dB	27dB	.6dB	1 gang	Stainless	NA

AT Series. White & Ivory Decora Style plastic plates, with matching skirted knobs.

MODEL	POWER RATING (Watts)	ATTENUATION PER STEP	TOTAL ATTENUATION	INSERTION LOSS	PLATE SIZE	PLATE TYPE	PLATE COLOR
AT10DW	10	3dB	33dB	.4dB	1 gang	Plastic Decora	White
AT10DI	10	3dB	33dB	.4dB	1 gang	Plastic Decora	Ivory
AT35DW	35	3dB	27dB	.6dB	1 gang	Plastic Decora	White
AT35DI	35	3dB	27dB	.6dB	1 gang	Plastic Decora	Ivory
AT100DW	100	3dB	27dB	.6dB	1 gang	Plastic Decora	White
AT100DI	100	3dB	27dB	.6dB	1 gang	Plastic Decora	Ivory

New AT Series available on or around 7-15-02. Previous (*A*) models available until then.

ET-10A. Economical attenuator features a terminal strip in place of pigtail leads. The 10 watt unit may be used on 25 or 70.7 volt line. Attenuation is in ten steps plus positive off position. Switch incorporates a stop between maximum and off position. Stainless steel plate, silkscreened dial scale and skirted black knob.

MODEL	POWER RATING (Watts)	ATTENUATION PER STEP	TOTAL ATTENUATION	INSERTION LOSS	PLATE SIZE	PLATE TYPE	PLATE COLOR
ET-10A	10	1.5dB	15dB	.5dB	1 gang	Stainless	NA

AUTO TRANSFORMER WITH PRECISION LEVEL CONTROL

E408 Series. Specially designed for attenuation in masking and sound reinforcement systems where fine tuning of level control is required. Series employs a ten-position, non-shorting rotary switch without stop. Attenuation rate is 1.5dB per step. (All other specifications are the same as the AT Series including the UL listing).

MODEL	POWER RATING (Watts)	ATTENUATION PER STEP	TOTAL ATTENUATION	INSERTION LOSS	PLATE SIZE	PLATE TYPE	PLATE COLOR
★ E408-1	10	1.5dB	15dB	.4dB	1 gang	Stainless	NA
★ E408-3	35	1.5dB	15dB	.6dB	2 gang	Stainless	NA
★ E408-7	75	1.5dB	15dB	.6dB	2 gang	Stainless	NA

POTENTIOMETER ATTENUATOR

VC Series. Economical attenuator provides level control for low-power loudspeaker circuits. Model VC-50 has 50 ohm impedance for application with 4, 8 and 16 ohm voice coil circuits. Model VC-5K has 5000 ohm impedance for use with constant voltage loudspeaker circuits. Control is continuously variable. Both models are capable of handling 3 watts D.C. Complete with stainless steel plate, stamped and filled dial scale and skirted black knob.

MODEL	POWER RATING (Watts)	ATTENUATION PER STEP	INSERTION LOSS	PLATE SIZE	PLATE TYPE	PLATE COLOR	RESISTANCE
VC-5K(-PA)	3(DC)	Cont.	1dB	1 gang	Stainless	NA	5K ohms
VC-50	3(DC)	Cont.	1dB	1 gang	Stainless	NA	50 ohms

PRIORITY PAGING OPTION

PA Series. Priority paging feature by-passes the effect of the attenuator to provide program level selection of individual emergency and paging signals at the amplifier. Option is available on all AT Series attenuators and Model VC-5K. The SPDT relay is operated with 24 VDC at 10mA. Includes protective relay cover to insure lasting trouble-free performance tinned leads. (All other specifications except for dimensions are the same as selected AT and VC Series Models.)

RACK MOUNT OPTION

RM Series. For attenuation convenience of rack-mounted equipment in cabinets and consoles, the AT, E408 and VC Series attenuators are available without mounting plate for rack panel installation. Attractive matte black polycarbonate dial scale overlay with adhesive backing replaces the mounting plate. Includes skirted black knob. Overlay size is 2" sq. (51mm). (To order, simply add RM after the selected attenuator model number. Example: AT10-RM or AT10-PARM.) (Dial scale overlays to retrofit existing installations are available, see hardware section Model HX23.) For easy rack mounting of RM series attenuators, see model AT PLATE, catalog Section 10.

WHISPERTOUCH IMPEDANCE-MATCHING VOLUME CONTROLS

Devices provide clear, distortion-free music reproduction when one or multiple loudspeaker pairs are powered by a single amplifier. Additionally, 8 ohm models provide load protection. Attenuation is accomplished in ten steps. All 70V models are UL listed.

Original. These innovative volume controls feature impedance-matching to protect the amplifier and balance the audio signal, fine-tune level control to adjust low listening levels to the perfect setting, and an easy-grip low-profile knob. The knob features smooth detents and make-before-break contacts for smooth transition when changing volume settings. It measures 7/8" dia. x 3/8" projection. Series is offered in 8 ohm, 70V stereo and 70V mono versions to satisfy any volume control requirement. All models have a frequency response of 20 Hz - 20 kHz (-3dB, +0). Models with 8 ohm impedance measure up to 2 3/4" deep for mounting into a 20 cu. in. or backless E.O. box. Recommended models include Carlon Model B120A. Models for 70V use are 2 1/2" deep for mounting into an 18 or 20 cu. in. backbox. Units accept 14 to 20-gauge wire for termination and are offered in Decora-styling or with standard plate. Choose white (W) or ivory (I).

Switched. These include all the features of Original WhisperTouch plus an on/off switch and status indicator light. The "smart" relay switch automatically puts speakers into "stand-by" mode making them available rather than indiscriminantly active when the audio system is powered on. Audio is accessed by simply touching the switch. The small yet helpful status indicator light provides quick visual assessment of the audio system availability. Switched and Summing/Switched models require a 12 VDC power supply (order separately).

Summing. Offered in Original and Switched versions, Summing models combine left and right stereo signals to supply a single speaker with full-fidelity music reproduction in small or secondary listening areas. Switched and Summing/Switched models require a 12 VDC power supply (order separately).

* Decora-style devices require a cover plate. Order separately.

** Suffix model with color: Ivory (-I), white (-W). *** Decora-style plate measures 15/16" W x 2 5/8" H and requires a cover plate (order separately). Standard single-gang plate measures 2 3/4" W x 4 1/2" H. **** Order 12 VDC Model PS12-10 or PS-M12 separately (see below).

POWER SUPPLIES FOR SWITCHED WHISPERTOUCH

PS12-10. Compact 12-VDC power supply is a UL-listed, 1-amp supply developed for use with switched WhisperTouch volume controls. Supply includes a 6-foot extension lead and a 6-foot attached power cord and will power up to twelve Switched WhisperTouch volume controls.

PS-M12. Unit is a compact UL-listed 12-volt DC, 300 mA power supply with a 6-foot cord. The required input voltage is 120 volts. Supply includes a 1/8" mini-plug for direct connection to the M-1CB4A connector block (powers up to four F-1 flashers) or for use with up to three Switched WhisperTouch volume controls.

MODEL	POWERS UP TO	INPUT	OUTPUT (Nom.)	WEIGHT
PS12-10	12 Switched WhisperTouch	105 - 130 VAC	12 VDC @ 1 Amp	1.3 lbs. (.6 kg)
PS-M12	3 Switched WhisperTouch	120 VAC	12 VDC @ 300 mA	.50 (.2 kg)

★ c LISTED 70V models only.

DAT/SAT Series. Atlas Sound offers traditional autotransformer controls to provide excellent stereo performance and maximum speaker-handling capability. Models include positive off and full-power pass through at the maximum setting. Contacts are make-before-break for smooth transition. Models with 8-ohm impedance are suitable for residential stereo and voice-coil circuit application. Models for 25 or 70.7 volt use provide level control in distributed constant-voltage systems and are UL listed. Single-gang models mount standard E.O. boxes 2 1/2" deep. Choose Decora-Style (DAT) or standard plate (SAT) versions in ivory (-I) or white (-W).

- Choose DAT or SAT Series to control speaker volume when impedance matching is not necessary such as single-pair installations or when multi-channel amplifiers are used for individual zones.
- Combine DAT or SAT Series with a separate impedance-matching switching device (AST Series) to design a system with multiple loudspeaker pairs.

MODEL SERIES*	POWER RATING	SYSTEM		ATTENUATION		INSERTION LOSS	PLATE SIZE

FOUR

ATLAS SOUND SPEAKER SWITCHING SYSTEMS

IMPEDANCE-MATCHING SPEAKER SELECTORS

ASL-4/ASL-6. Impedance-matching loudspeaker switching systems provide control of up to four or six loudspeaker pairs positioned in multiple room applications. All volume controls for each loudspeaker pair are located on the front panel for easy access. Attenuation is accomplished in 10 steps. Units accommodate any combination of 8 and/or 16 ohm loudspeakers. Choose ASL Series to control speakers in retrofit or pre-wire installations where speaker wiring goes directly to the main equipment cabinet; not to individual volume controls. ASL models offer individual speaker volume controls with individual A/B source selection and separate on/off controls for each loudspeaker pair. Units feature a mar-resistant black finish. Dimensions are 17" W x 1 1/2" H x 5 7/8" D and can be shelf or 19" rack-mounted (brackets included). Wire capacity is 14-24 gauge. **Not for use with 70V systems.**

AST-4/AST-6. Impedance-matching loudspeaker switching systems provide control of up to four or six loudspeaker pairs positioned in multiple room applications. Controls for each loudspeaker pair are located on the front panel for easy access. Units accommodate any combination of 8 and/or 16-ohm loudspeakers. Use AST Series to offer additional functionality to systems using traditional (non-WhisperTouch) volume controls such as the DAT or SAT Series. AST devices include separate on/off controls for each loudspeaker pair and one A-B source selector switch for overall system control. Units feature a mar-resistant black finish. Dimensions are 17" W x 1 1/2" H x 5 7/8" D and can be shelf or 19" rack-mounted (brackets included). Wire capacity is 14-24 gauge. **Not for use with 70V systems.**

STAINLESS STEEL OR ALUMINUM WALL PLATES

Professional appearance with easy and cost-efficient installation is achieved by using Atlas Sound wall plates. Models include mounting holes on standard box mount center [$\frac{3}{16}$ " (83mm)] and plate mounting hardware. Units without devices are available in .031 stainless steel. Wall plates with pre-mounted connectors are standard with stainless steel plate.

RECEPTACLES WITH & WITHOUT CONNECTORS INSTALLED

MRB Series. Convenient receptacle floor box with easy-open lid requires no tools to access connectors. Lid is mounted on a pin hinge that lifts easily and swings to the side for access and then falls into a closed position when not in use. Four level legs are provided on a 4" octagon box. Models are offered with choice of mounting plate, punched to accept a variety of connector styles, and are available with listed selection of factory-installed connectors. Lid and trim cover are cast commercial red brass with a brushed finish. Optional matching carpet ring provides attractive finished appearance.

HX11-P	SPDT Momentary Push Button Switch, 1/4 Amp Contacts. Black Button. Hardware.
HX12-R	2 Pole, 6 Position Rotary Switch Continuous Rotation; 60° Indexing; 3/8" Bushing Length; 3/8" Shaft Length; Includes Hardware
HX21-B	Skirted Knob; Black; 1 1/4" Diameter Fits 1/4" Shaft; One Set Screw
HX22-W	Skirted Knob; White; 1 1/8" Diameter Fits 1/4" Shaft; One Set Screw
HX23	2" x 2" Polycarbonate Dial Scale. 3/8" Center Hole. Black Finish.
HX24-1	Single Gang S/S Plate; Dial Scale Stamped and Paint Filled 3/8" Center Mount Hole, Mounts to Standard E.O. Box; With Hardware
HX25-2	Double Gang S/S Plate; Dial Scale Stamped and Paint Filled 3/8" Center Mount Hole, Mounts Standard E.O. Box; With Hardware
HX26-2	Double Gang S/S Plate with Dial Scale for Attenuator and 6 Position Rotary Switch
HX31-345	3" Speaker with 45 Ohm Voice Coil. Magnet Weight 1.47 oz
HX41-50	50 Ohm Wirewound Potentiometer, 3 Watt. Continuous Rotation. 3/8" Bushing Length; 3/8" Long Flatted Shaft. Includes Mounting Hardware
HX42-5K	5K Ohm Wirewound Potentiometer. 3 Watt. Continuous Rotation. 3/8" Bushing Length; 3/8" Long Flatted Shaft. Includes Mounting Hardware
HX53-832	8-32 x 1" Holt Head Tamperpoof Machine Screw, Cadmium Plated
HX52W	3/8" - 3" Toggle Bolt Set Truss Head; Cadmium Plated. Heads are Painted White
HX71	Speaker Dust Cover; Mounts on Back of Standard 8" Speaker; Is made of Polyvinyl and has Attached Chipboard Mounting ring
HX76	Felt Tabs (100 pieces)

AT Plate-052. The new Atlas Sound AT Plate is perfect for rack mount applications where attenuators are required. The Atlas Sound AT Plate, a 2RU H #14 gauge plate pre-punched to accommodate up to (6) Atlas Sound rack mount attenuators. Attractive black filler plugs are provided for applications where the AT Plate will not be fully "loaded". The plate is finished in flat black epoxy to better blend in with other rack mount equipment.

FOUR

MICRO INFRARED REPEATERS & FLASHERS

M-1A Series. Atlas Sound IR repeaters allow the operation of virtually any IR-controlled A/V component from multiple room locations. The M-1A Series repeater will receive the IR signal and rebroadcast it to the small F-1 flasher LED positioned on the front of each A/V component. The F-1 forwards the signal to the source component's IR receiver.

These micro repeaters feature an attractive, flush, white lens that blends with any white surface. Their high sensitivity enables use within a 40 foot range with fast reaction time and minimal interference. Repeaters are available installed on a white decorator-style subplate (cover plate not included) or separately for flush-mounting in a ceiling, wall, cabinet or speaker grille.

F-1 Series. Small F-1 flasher LEDs are shipped with an adhesive backing and 1/8" phone plugs for connection to all IR-controlled A/V components. Up to six flasher units may be connected to a single M-1A repeater using two M-1CB4B connector blocks or any standard adapter (by others). (Note: some high-end A/V components are equipped to accept hard-wired IR signals. In this case, F-1 flashers would not be necessary.)

F-1 M-1AJW* M-1A
*(Shown with cover plate, Sold separately.)

MODEL	DESCRIPTION	CURRENT DRAW	STYLE	COLOR
M-1A	IR Repeater	12 mA	Flush Mount	White Lens
M-1AJW	IR Repeater	12 mA	Wall Mount, Supplied on Decorator Subplate*	White Lens, White Subplate
F-1	Rasher	.05 mA	Surface Mount	Black Lens, Black Cord

* Order Sound decorator-style cover plate separately.
** Order Model M-1A separately.

STAND-ALONE IR REPEATER SYSTEM

M-1CB4B. For installation flexibility, the M-1CB4B amplified connector block is offered as a plug-in interface device that provides connections for an M-1A Series repeater, four F-1 flashers, and power supply Model PS-M12. This configuration allows IR operation of up to four A/V components from up to four room locations. The M-1CB4B offers 1/8" mini jacks for power supply Model PS-M12 and up to four F-1 flashers; it also provides terminals for wiring up to four M-1A repeaters (rooms) in parallel fashion and a data jack for connecting a mini-pin IR source or another M-1CB4B. The units amplified circuit design supplies clear, strong IR data to source components.

This stand-alone IR repeater system requires: one M-1A repeater in each remote room location, one M-1CB4B for every four A/V components, a PS-M12 power supply, and one F-1 flasher for each A/V component. For installations which require control of more than four components or transmission from more than four rooms, multiple M-1CB4B blocks may be used. (Note: each M-1A repeater can control a maximum of six F-1 flashers.)

PS-M12. Unit is a compact UL-listed 12-volt DC, 200 mA power supply with a 6-foot cord. The required input voltage is 120 volts. Supply includes a 1/8" mini-plug for direct connection to the M-1CB4B connector block (powers up to four F-1 flashers) or for use with up to three switched WhisperTouch® volume controls.

M-1CB4B

PS-M12

Single Repeater/Emitter System

MODEL F-1 FLASHER /EMITTER NOTE:

Atlas Sound® F-1 Infrared Flashers can be parallel wired. Up to six can be connected to control six sources.

*Repeater is 2 1/2" x 2 1/2" deep measured from front of lens to back of unit. We recommend at least of clearance to allow wire management.

Multiple Repeater / Emitter System

block for the M-1 Infrared Repeater System. It allows connection of multiple repeaters to 4 emitters (flashers) with no loss in signal strength.

Note: Multiple M-1 Infrared Repeaters can be connected to this point by wiring them in parallel.

Use Three Conductor Wire (shielded or unshielded). If shielded cable is used, shield may be used as the 3rd conductor.

Wire Gauge	Maximum Wire Run Distance
24 Gauge	200'
22 Gauge	600'
20 Gauge	2000'
18 Gauge	5000'

REGULATED DC POWER SUPPLY WITH 1/2 AMP OUTPUT

RPS24-05. Compact 24 VDC model is offered for use where small, economical power supplies are required. RPS24-05 is recommended for telecommunication installations including small telephone systems and intercom/annunciator applications in industrial, institutional, service and educational facilities. Unit is fuse-protected in the primary, includes barrier strip terminals and has a 6 foot AC power cord. Finished in black epoxy.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT
RPS24-05	117 VAC 60 Hz, 26 W	24 VDC 1/2 Amp	0.5 mV	500 mV	6 ³ / ₄ " x 3 ⁵ / ₈ " x 2" (171 x 92 x 51 mm)	3 lbs. (1.4 kg)

RPS24-05

REGULATED DC POWER SUPPLIES WITH 2 & 4 AMP OUTPUT

PS24-2R/PS24-4R. Assemblies with varying amp service are provided for applications that require excellent regulation and extremely low ripple including transistorized and solid-state control equipment and alarm/warning systems. Models are fuse-protected in the primary, include barrier strip terminals, have a 6 foot power cord, and will operate in an ambient temperature range of 0-50°C. Finished in black epoxy; larger models include a ventilated cover finished in textured black epoxy.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT

PS24-2R PS24-50A PS24-4R

HEAVY-DUTY DC POWER SUPPLY WITH 5 AMP OUTPUT

PS24-50A. Model offers 24 VDC for applications that require a high-current DC supply including many types of telephone, annunciator and industrial paging systems, and installations with large numbers of relays. Unit is fused at the input and includes barrier-type terminals, keyhole mounting slots, ventilated cover and 6 foot AC line cord. Finished in black epoxy.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT

PS24-2R PS24-50A PS24-4R

GENERAL PURPOSE DC POWER SUPPLIES (2 AMP OUTPUT)

PS24-20. Compact, multi-voltage unit is designed for a variety of general applications. Conversion is accomplished through a plug-in lead. Assembly is complete with fused-transformer primary, 6 foot power cord, and black epoxy finish.

- ★ **TS242.** UL Listed unit is used for a variety of applications that do not require a regulated supply. Model includes a 117 VAC unswitched outlet, neon pilot lamp, barrier-type terminals, and 6 foot power cord.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT
PS24-20	117 VAC 60 Hz, 70 W	24, 12, 6 VDC 2 Amps	Less Than 2.5%	27-22 V	6 ³ / ₄ " x 3 ⁵ / ₈ " x 4" (171 x 92 x 102 mm)	4.5 lbs. (2.0 kg)

POWER PACK

PS24-075. Compact supply is designed to power the RPM/RLM Series DC relays and may also be used in a variety of annunciator applications. Includes positive, negative, and ground terminals with the negative terminal isolated from the ground. Complete with 6 foot power cord and black epoxy finish.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT
PS24-075	117 VAC 60 Hz, 26 W	24 VDC 3/4 Amp	Less Than 1.5%	26-22 V	6 ³ / ₄ " x 3 ⁵ / ₈ " x 2" (171 x 92 x 51mm)	3.5 lbs. (1.6 kg)

TELEPHONE POWER SUPPLY

TPS24-05. Unit is a combination 24 VDC/TALK voltage power supply engineered to power most common-talk telephone intercom systems (see Section 8). Finished in black epoxy and complete with 6' power cord. For information on common-talk intercom applications, request SL8-1433.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT

RACK-MOUNT POWER SUPPLY SHELF

PS-RK. Accessory shelf provides convenient installation of Atlas-Sound power supplies in 19" cabinets. Shelf supports up to four 6³/₄" L supplies or one 13¹/₄" L unit. CRS assembly is finished in black textured epoxy and includes knockouts for line cords, front viewing hole for power indicator, and viewing hole plug. Size: 19" W x 8" D x 5¹/₄" H (483mm x 203mm x 133 mm).

POWERED RELAY MODULE

PSRM-1. DPDT relay with built-in power supply and protective chassis provides versatile service as a music muting device, paging adapter, powered remote control switch or as a source to control additional relays. Terminal strip includes six positions for relay wiring and two for the addition of an external switch to actuate the relay. Compact assembly may be mounted in any position utilizing the "instant mount" pressure-sensitive foam tape adhesive (provided), or may be screw mounted. CRS construction. Finished in black epoxy. Includes 6-ft. power cord.

DC RELAY PACKS

RPM/RLM Series. Modular chassis with individual plug-in relays provides configuration and expansion flexibility for application wherever a 24 VDC, DPDT relay is required including zone paging, intercom and telephone systems. Chassis is available in four sizes with 2, 4, 8 and 12 relay sockets. Plug-in DPDT relays prevent long-term oxidation problems and are offered in 3 and 5 amp versions (order separately). To eliminate bussing, one size of each relay coil is connected to a common terminal. Chassis is painted with black epoxy and includes a printed circuit board with barrier type terminals.

RELAY PACK CHASSIS MODULES (Without Relays)		
MODEL	RELAY SOCKET QUANTITY	SIZE

RLM-24-5	DPDT	Silver Cadmium Oxide	500 mA to 5 Amp	

TONE SIGNAL GENERATOR

GPS750. Solid-state unit with built-in power supply provides reliable attention gathering sound for audible signaling in commercial and industrial communication system applications such as time clocks. Model GPS750 produces a steady pulse or siren tone making it ideal for use in schools. The siren takes precedence over the pulse and the pulse over the steady. The square wave output is available on the terminal marked "out". Controls include: output level, tone frequency, pulse duration and sweep frequency. Actuated by an external SPST switch. Finished in black epoxy.

MODEL	INPUT POWER	OUTPUT LEVEL	FREQUENCY	SIZE
GPS750	117 VAC, 60 Hz	1 volt @ 10K	600-1000 Hz	6 ³ / ₄ " x 5 ¹ / ₂ " x 2 ¹ / ₄ " (171 x 140 x 57mm)

GPS750

MODULAR PAGING COMMUNICATIONS CENTER

MPC Series. Attractively styled input/output switching accessory is a basic modular system suitable for a variety of zone paging* and communications applications. As an output device, the control center is used to activate specific loudspeakers for selective zone paging in restaurants, reception areas, professional offices, health clubs, production and customer service departments. As an input device, MPC Series will switch selected components (microphone, tape deck, etc.) into a sound or communications system. Models may be ordered as factory-assembled consoles with 6 or 12 DPDT-style switches or individual chassis and switch modules. Chassis are constructed of heavy-gauge CRS with neutral "computer" gray finished housing and side panels. Size is 9³/₄"W x 8¹/₈"H x 4¹/₄"D. Switch modules are mounted to a 22-gauge CRS plate finished in neutral gray epoxy and covered with a polycarbonate overlay with pockets for switch identification.

MODEL	DESCRIPTION	CONTACTS		TERMINATIONS
		MATERIAL	RATING	
MPC-106B	Console Assembly with 6 DPDT Switches	Silver Plated	1/2 Amp	Captive Terminal Assembly
MPC-112B	Console Assembly with 12 DPDT Switches			
MPC-102A	Console Assembly Chassis Only			
MPC-6SWA	6 Switch Module/DPDT			
MP-1B	Blank Panel, Covers 1 Port			

* The standard MPC units must be modified for zone paging by installing jumper wires. Refer to SL5-1506.

ZONE PAGE POWERED RELAY PACKS

PSR Series. DPDT relay with internal 24 VDC power supply is available with 6 or 12 factory-wired relays for application with MPC Series communications control center. To facilitate the addition of external relays or lights, the power supply output is also connected at the terminal strip. Relays may be easily converted to an all page function by connecting the off bus to the selected relay switch output. Models include silkscreened terminal diagram and 6-ft. power cord. Black epoxy finish. Separate amplifiers needed for both paging and background music.

ETC SYSTEM—A FIREMEN'S TELEPHONE SYSTEM*

General Description. The Atlas-Sound ETC System provides emergency personnel and building authorities with dedicated two-way communications and signaling using a master control panel and remote telephone stations located throughout a building. System is an essential adjunct requirement for the optimum protection of life and property when operational limitations such as shielding within a building or lack of communications channels preclude the use of standard radio or sound communications facilities. Modular component system features expansion flexibility, audible-visual alarm, remote alarm provision, call in assurance, zone-to-zone communications, paging and line supervision. A complete selection of remote telephone stations with controlled access housings and telephone jack assemblies are listed under "Emergency Telephone Assemblies and Components." All items are ordered separately for configuration convenience. System is listed under UL Standard 864.

MASTER CONTROL PANEL FOR ETC SYSTEM

MT-400. Master control panel provides communication between an unlimited number of remote telephone stations in one or any combination of building or fire zones. Panel has provisions for installation of up to four CM-1 zone modules. Complete with handset, audible/visual tone alert, remote alarm button and LED power and remote alarm indicator lamps. A constant-level paging output is provided for integration into an existing paging system. Paging is actuated with push-to-talk button on handset. Rugged steel housing mounts in optional UL Listed enclosure model FTE-14 or UL Listed 19" E.I.A. standard enclosures. Unit requires 5 1/2" (3RU) vertical panel space. Finished in black epoxy. (Note: A limit of 6 handsets may be off-hook at one time. Paging amp and loudspeakers not included). Must be mounted in UL Listed Enclosure to maintain UL Rating. For wiring information, request installation manual #246181.

ZONE EXPANDER PANEL FOR ETC SYSTEM

EP-10. Expansion panel is designed to increase basic system capacity beyond four zones of communication. EP-10 panels may be added in an unlimited quantity to meet zone requirements of large building complexes. Each unit has provisions for up to ten CM-1 zone modules. Rugged steel housing will mount in enclosure FTE-14 or 19" E.I.A. standard enclosures. Unit requires 5 1/2" (3RU) vertical panel space. Finish is black epoxy.

ZONE MODULE FOR ETC SYSTEM

CM-1. Zone card module installs into MT-400 and EP-10 zone card positions to provide the necessary circuitry for power distribution, communication functions, paging (from zone location) and line supervision. P.C. board is attached to a steel panel equipped with LED lamps to provide visual status of: "Power", "Call-In", "Open Line", "Operator Connect" and "Page" functions. Pushbutton switches enable; "Operator Connect" and "Page" functions. Finish is black epoxy.

ZONE COVER FOR ETC SYSTEM

BCF-1. Blank cover installs over unused zone card locations in the MT-400 and the EP-10 to provide aesthetic continuity and protection from dust and indoor environmental hazards. Steel plate is finished in black epoxy.

POWER SUPPLY FOR ETC SYSTEM

FTS24-RM. Designed to power the ETC System, this 24 VDC power supply includes a protective steel housing. FTS24-RM installs into enclosure FTE-14 or 19" E.I.A. standard cabinets and requires 31/29 (2RU) vertical panel space. Finished in black epoxy.

FTS24-RM SPECIFICATIONS	
POWER INDICATION	Neon Pilot Lamp
POWER INPUT	117 VAC, 60 Hz
CONVENIENCE OUTLET	117 VAC, Not Switched
POWER OUTPUT	24 VDC @ 2 Amps
OUTPUT WATTS	48
INPUT WATTS	64
INPUT TERMINATION	6 ft. Power Cord, 2 Conductor Plus Ground
OUTPUT TERMINALS	Screw Type Barrier
OUTPUT RIPPLE	8mV @ Rated Load
OUTPUT PROTECTION	2 Amp Fuse
INPUT PROTECTION	Circuit Breaker
DIMENSIONS	3 15/32" H (2RU) x 19" W x 5 1/2" D

ENCLOSURE FOR ETC SYSTEM

FTE-14. Optional accessory enclosure for surface or wall installation of the ETC system provides 14 1/8" (8RU) vertical panel space to house (1) MT-400, (1) EP-10 and (1) FTS24-RM or variations thereof. 16-ga. CRS cabinet includes 11-ga. CRS mounting rails which swing out to provide convenient service access to rear of equipment. Front door is complete with smoked acrylic plex front, sturdy piano hinge and lock. Finished in textured red epoxy. For installations that require additional panel space a complete selection of UL Listed cabinets with vertical panel space up to 77" are featured in Section 10 of this catalog.

MODEL	TYPE	VERTICAL PANEL SPACE	DIMENSIONS
FTE-14	Surface or wall cabinet	14 1/8" (8RU)	20 3/16" H x 24 1/4" W x 9" D

Models are listed under UL Standard 864.

HANDSET/HOOKSWITCH ASSEMBLIES FOR ETC SYSTEM *

L22 Series. Assemblies are designed for proprietary use with the ETC System. Models consist of handset, chrome hanger hookswitch, steel mounting raceway, sidetone network and 7-point barrier strip termination. Selection includes models with coiled cord or armored cable for installation in appropriate surface or recessed enclosures. Finished in textured red epoxy.

MODEL	CORDTYPE	MOUNTS ENCLOSURE	ENCLOSURETYPE
L22-300-FT	Coil Cord	L20-300-BX	Recessed

* 20 and L22 Series Models are listed under UL Standard 864.

15, 2 & 1 WATT COMPRESSION DRIVER LOUDSPEAKERS

VT/VTF Series. Patented units are the proven performance standard around the world for effective sound and electronic signal transmission of emergency voice communications and tone signaling. Cost-effective series function as protective warning devices in intercom systems and as communication system loudspeakers in multi-occupancy and expanded space areas including high-rise residences, public buildings, health-care and educational facilities, banks, shopping areas, distribution centers and transportation terminals. High-efficiency compression driver provides optimum acoustic conversion efficiency. Die-cast watersealed construction withstands vandalism, vermin, moisture, corrosion and vibration. Selection includes 8 ohm, 70.7 and 25-volt transformer models and units with DC blocking capacitor (C) where noted. Models VT/VTF-152/157UC have a 5 mfd. capacitor; Models VT/VTF-22/27UC contain a 1-mfd. version. VT Series are surface mounting units measuring 4 1/4" SQ x 3 3/4" D. VTF Series are recessed mounting versions measuring 6" SQ x 3 3/4" D. Both series install to a 2 1/8" deep x 4" E.O. Box (not included); VTF Series also requires Model AR adapter ring. Suffix model with choice of finish Red(R) or Neutral Gray(N). When used with compatible control equipment, VT/VTF Series comply with UL Standard 1480—Speakers for Fire Protective Signaling Systems and California State Fire Marshal (Title 19). Models with special modifications to meet New York City MEA (Calendar no. 57-74-SA) and UL Canada are also available as standard product. Contact factory for proper model designation and price.

7.5 & 2 WATT RE-ENTRANT CONE LOUDSPEAKERS

SVT Series. Surface mount units feature a cone loudspeaker with integral re-entrant protective dome built into the housing for environment resistance, optimum power output and high intelligibility. Space-efficient series is recommended for use in demanding localized area emergency communications, electro-acoustic signaling, commercial sound and intercom applications. Models with 2 watt power handling are designed for low ambient areas including executive offices, condominiums, apartments, dormitory rooms, motel/hotel rooms, hospital suites and elevator cabs. Models with 7.5 watt power handling are intended for medium sound output coverage in general offices, hallways, stairwells, restaurants, service areas, nursing homes, townhouses, banks and leisure centers. Selection includes 8 ohm, 70.7 and 25 volt transformer models and models with DC blocking capacitor (C) where noted. Models SVT-22/72/77UC have a 3 mfd. capacitor; Model SVT-27UC contains a 1-mfd. version. SVT Series are surface mounting 4 1/4" Sq. x 3 3/4" D units for installation in standard 4" square E.O. Boxes (not included). Weathersealed housing is Noryl® plastic. Suffix model number choice of color Red(R) or Neutral Gray(S). When used with compatible control equipment, SVT Series comply with UL Standard 1480—Speakers for Fire Protective Signaling Systems and California State Fire Marshal (Title 19). Models with special modifications to meet New York City MEA (Calendar No. 57-74-SA) and UL Canada are also available as standard product. Contact factory for proper model designation and price.

SE. Surface-mounting outdoor backbox provides weatherproof installation of VT/SVT Series loudspeakers. 4 $\frac{1}{4}$ " SQ x 2" D housing is die-cast zinc with epoxy finish. Unit is tapped for $\frac{1}{2}$ " conduit and includes weatherproof gasket. Suffix model with choice of color. Red(R) or Neutral Gray(N).

SI. Surface-mounting indoor backbox for VT/SVT Series loudspeakers mounts to any single or double-gang backbox for concealed conduit installation. 4" SQ. x 1 $\frac{1}{2}$ " D CRS unit is finished in baked epoxy and includes $\frac{1}{2}$ " conduit knockouts. Suffix model with choice of color. Red(R) or Neutral Gray(N).

SFP. Semi-flush, 6" SQ adapter plate mounts behind VT/SVT Series loudspeakers to cover any recessed 4" SQ x 2 $\frac{1}{2}$ " D outlet box. CRS wall plate is stamped and painted. Suffix model with choice of color: Red(R) or Neutral Gray(N). Dimensions: 6" SQ. x $\frac{1}{2}$ " D.

TVTA. Twin housing for bi-directional mounting of two independently powered VT or SVT Series loudspeakers. Ideal for wall or ceiling installation in corridors and walkways. Each unit includes 2 $\frac{3}{4}$ " deep housing with base and adapter plate for parallel mounting to any electrical backbox. Suffix model with choice of color: Red(R) or Neutral Gray(N).

F-P. Flush adapter plate for VTF series loudspeakers provides for recessed mounting to 4 $\frac{1}{16}$ " backboxes or solid exterior and hollow interior wall surfaces where a backbox is not required. CRS stamped construction.

A-R. Adapter ring for recessed mounting of VTF series loudspeakers. Welded steel collar is 2" deep to provide necessary extension to any 4" SQ. x 2 $\frac{1}{8}$ " deep E.O. box. Includes four "S" clips. Finished in neutral grey.

M-R. Mounting ring with clips for recessed mounting of VTF/SVTF Series loudspeakers. Welded steel ring is 2" deep to provide extension to any 4 $\frac{1}{16}$ " SQ x 2 $\frac{1}{8}$ " D backbox. Finished in neutral grey.

Note: Accessories are also ideal for application with WPVT Series Weatherproof Intercom Stations (Section 8).

4" LOUDSPEAKERS FOR FIRE PROTECTION SIGNALING

General Description. UST and UDT Series loudspeakers are 10 and 8 watt UL Listed assemblies, respectively, that provide clear reproduction for emergency warning signals, paging, and background music systems. Pre-assembled models, which are designed for use with compatible control equipment, are commonly used to inform and protect occupants in hotels, airports, apartment complexes, schools or wherever fire-protective signaling systems are required or specified to preserve life and property. In addition to their high-quality communication capability, UST and UDT Series models offer a choice of baffle styles and a selection of UL Listed and plenum-rated enclosures. UDT Models can also be mounted to standard E.O. Boxes. All models have a DC blocking capacitor and terminal strip connectors. Listed under UL Standard 1480, Speakers for Fire Protective Signaling Systems, provided that recommended enclosures are used for each model. As always, confirm specifications with local building codes.

UST Series. These multi-functional units feature a 10 watt, high-fidelity 4" loudspeaker (Model FC104) with a frequency response of 105 Hz-17 kHz, and an 8 watt, multi-tapped transformer. This configuration provides a wide frequency range allowing it to function in either an emergency warning or background music/paging system. This dual capability effectively reduces system and installation expenses by eliminating the need for two separate speaker systems (where permitted by local codes): one for emergency warning; and one for paging.

UDT Series. Models are comprised of an 8 watt, 4" loudspeaker, and a 2 watt, multi-tapped transformer. These units reproduce warning signals and life-safety communications with high output and minimal input power demand.

UDT SERIES LOUDSPEAKER SPECIFICATIONS							
MODEL SERIES	SIZE	MAGNET	FREQUENCY RESPONSE	POWER RATING	IMPEDANCE	FLUX DENSITY	SENSITIVITY*
UST	4" (102mm)	10 oz. (0.28 kg)	105 Hz - 17 kHz	10 Watts	8 ohm	10,500 Gauss	93dB (1W, 1M)
UDT	4" (102mm)	5 oz. (0.14 kg)	400 Hz - 4 kHz	8 Watts	8 ohm	9,200 Gauss	94dB (1W, 1M)

* UL Rating at 1 watt, 10 ft. (3dB increment rating) 800-2800 Hz, UDT = 84dB, UST = 78dB.

8" LOUDSPEAKERS WITH DUAL OR SINGLE VOICE COIL

UKT/UHT Series. High-quality 8" ceiling or wall-mount loudspeakers for application in fire protective signaling, emergency alarm and audio evacuation systems are available with a single or dual voice coil, factory-mounted 5 watt multi-tapped transformer and a selection of baffle styles and colors to accommodate varying code and aesthetic requirements. UKT Series loudspeakers are equipped with two 1" dia. voice coils, two transformers (specify 25 or 70.7 volts) and DC blocking capacitor. UHT Series loudspeakers have a single 1" dia. voice coil, choice of 70.7 or 25 volt transformer, and DC blocking capacitor. All units are shipped pre-assembled to reduce installation labor, time and expense. Both model series provide line supervision. Loudspeakers are equipped with a molded, fire-retardant, moistureproof cone with whizzer and 10-oz. ceramic magnet to deliver smooth frequency response with high intelligibility and minimal distortion. Transformer has a core size of 1/2" x 5/8" (13 x 16mm) and insertion loss of 1.5dB. All models terminate with 6" color-coded leads. Refer to SL6-1181 and SL6-1424 for more information. UL Listed loudspeaker packages must be used with UL Listed enclosures indicated to maintain UL Listed status. Listed under UL Standard 1480—Speakers for Fire Protective Signaling Systems. As always, confirm specifications with local building codes.

* UL Ratings measured per UL Standard 1480 at 1 watt, 10 ft. (3dB increment rating): UKT = 78dB; UHT = 81dB. Dispersion: 160° @ 2000Hz.

STANDARD & HIGH-POWER SIREN LOUDSPEAKER ASSEMBLIES

HP370 Series. High-performance electronic siren loudspeakers provide penetrating tone signaling and high-intelligibility voice communications to enhance the functional and operational range of mobile and stationary emergency communication systems. All siren models include the world-recognized SD Series 11 ohm compression driver with double re-entrant loudspeaker for use in ambulance and emergency vehicle applications, security alarm, protective communications, community warning and 2-way radio systems. Assemblies include the patented 100 watt SD-370A compression driver (U.S. Patent 7,760,501) complete with a non-fatiguing, self-aligning sound chamber assembly. HP370 Series is available in choice of wide angle, round, or rectangular loudspeaker bell or specially designed housing for concealed and under hood installation. Product series suitable for use with matched amplifier and control equipment in systems requiring AMECAf (formerly AAMVA) Certification to General Services Admin. specifications (KKK-A-1822C).

COMPRESSION DRIVERS FOR ELECTRONIC SIREN APPLICATION

SD Series. Recognized throughout the world as the quality and performance standard for electronic signaling, SD Series heavy-duty weatherproof compression drivers are recommended for application in stationary and mobile public address systems, emergency and law enforcement vehicles of all types. Driver is equipped with a 2½" voice coil having a nominal impedance of 11 ohm at rated power. Non-fatiguing phenolic diaphragm is a formed, self-aligning assembly capable of field replacement. Model SD-70 is a 58 watt driver recommended for medium powered systems. SD-370A is a patented (U.S. Patent 7,760,501) 100 watt driver designed for high-powered signaling applications. It features a non-fatiguing, self-aligning sound chamber assembly. Model SD-370A is a standard component of the popular HP370 Series siren loudspeaker assemblies and will accommodate any horn or reflex projector equipped with standard 1½"-18 thread. SD-70 is finished in grey baked epoxy. SD-370A is finished in black baked epoxy. Product series is suitable for use with matched control equipment for siren systems requiring AMECA (formerly AAMVA) certification to General Services Admin. specification (KKK-A-1822C) or Article 8, Title 13 of the Cal. Admin. Code.

VTB Series. UL recognized compact high-efficiency Voice/Tone™ compression drivers are designed for custom installation in high-efficiency industrial communication, intercom, electronic alarm and monitoring system applications including correctional facilities, transportation vehicles, construction sites and drive-in menu boards. Models include integral exponential sound projector to provide reliable sound distribution and optimum intelligibility for the reproduction of voice and/or electronic tone signals. Die-cast zinc construction with watersealed driver will withstand moisture, corrosion, vibration, vermin and vandalism. Models are available with a selection of multi-tap transformers and are designed to mount a variety of standard or custom housings and face plates to meet installation and application requirements.

STATIONS WITH COMPRESSION DRIVER & CALL SWITCH OPTION

VPVT-PB Series. Loudspeaker stations with high-efficiency compression driver mounted to an 12-gauge stainless steel plate provide two-way communication for vandal-proof use in detention facilities, correctional institutions and secured access applications. Rugged recess-mounting assemblies incorporate the patented VT Series, environment-resistant compression driver; recognized throughout the world for dependable performance and effective voice and signal tone distribution. High-intelligibility, 8 ohm compression driver also functions as a microphone to provide clear voice communication. VPVT-PB Series incorporate a vandal-resistant call-origination button with 3 amp contact rating to provide call-in signaling capability. Stations are available in high-power 15 watt models with 25 volt transformer. VPVT-PB Series measures 7 1/4" square and installs into Model VP-77 backbox. Backboxes are ordered separately.

STATIONS WITH CONE LOUDSPEAKER & CALL SWITCH OPTION

VPCS Series. High-security VPCS vandal-proof loudspeaker stations are equipped with a 2 1/2" dia. moisture-proof resin impregnated cone loudspeaker for clear voice/signal transmission with durable performance. The overall depth of all units is a shallow 2 1/8" (54mm) allowing installation in standard size E.O. boxes. VPCS-2G- Series and VPCS-2GPB-2 are 2-gang versions. VPCS-3G- Series are 3-gang models. VPCS models include a two-piece die-cast barrier (patent applied for) to protect the loudspeaker assembly from vandalism. Models with "PB" designation include a vandal-proof call switch. The switch is a heavy-duty, momentary action push-button with a 1.5A 250 VAC contact rating. The 25 volt transformer has 1/4, 1/2, 1 and 2 watt taps. VPB-1A is a vandal proof mounted call switch designed for installation where call origination is desired. VPCS Series face plates are constructed of 11-gauge stainless steel.

STATIONS WITH COMPRESSION DRIVER AND CALL SWITCH

WPVT-S/WPVT-F Series. Surface and flush-mounting outdoor intercom and paging loudspeaker assemblies provide weatherproof and vandal-proof two-way communication with call-in capability for remote guard and security stations, entry and exit gates, perimeter doors and parking garages. Environment-resistant assemblies include die-cast watersealed VT Series 8 ohm compression driver loudspeaker available with 15 or 2 watt transformer and pre-mounted call SPDT-type switch protected by a weatherproof rubber boot. WPVT-S Series are surface mounting assemblies size 4 1/4" SQ. x 3 3/8" D. WPVT-F Series are recess/flush-mounting versions size 6" SQ. x 3 3/8" D. Both model series are finished in neutral gray(N) epoxy and install to a standard 4" E.O. Box (not included). A large selection of installation accessories are also available. See Section 6 "Installation Accessories for Voice/Tone Loudspeakers."

VISIKOM INTERCOMMUNICATION SYSTEM

VISIKOM TELEPHONE VISITATION SYSTEM

VVP-24/PVP-6. Modular telephone intercommunication system accommodates up to 24 independent telephone conversations of two or more telephone stations each for use where physical separation between communicating individuals is desired. Typical applications include customer telephones and visitation areas of detention, correctional and penitentiary facilities. Unique filter circuitry employed assures privacy and isolation from crosstalk. Plug-in design provides simple installation, servicing and expansion capability. System is comprised of Model PVP-24 control unit, Model PVP-6 plug-in interface module and standard telephone stations with two form "C" (DPDT) hookswitches including Atlas Sound Model Series CE and DP-1. Surface-mounting control unit includes integral power supply, four 3/4" cable access holes and ports for installation of up to four PVP-6 modules. Each plug-in module will control up to six isolated telephone circuits for a total system capacity of 24 circuits. Chassis and lift-off cover are constructed of 18-gauge CRS and finished in textured black epoxy. Wiring requirements are two conductor, telephone type. For complete wiring and installation information, request manual #245691.

MODEL	DESCRIPTION	POWER REQ.	POWER OUTPUT	CAPACITY	DIMENSIONS (W x H x D)

COMMON TALK TELEPHONE INTERCOM APPLICATIONS

Atlas Sound offers a selection of telephone stations and related accessories which can be used to create a variety of common talk telephone intercom systems. For details on individual models, refer to specification sheet SL8-1434, "Telephone Intercom Accessories."

Handset (Series Connected)

All of the common talk telephone stations described on this sheet utilize series-connected handset elements.

Using a Common Talk Line

Two or more (handsets) may be connected in parallel across a common "talk line," which must then be connected to an appropriate DC voltage source (the talk-line output of the Model TPS24-05 power supply combined with any 24 VDC power supply).

CE and DP-1A Series Telephones

Each telephone intercom station is equipped with a two-form "C" (DPDT) hookswitch and is wired to the handset.

"PT" Option for CE-2A and DP-1A

A commonly used option available on the CE-2A and DP-1A telephone station is the handset-mounted pushbutton, known as the "PT" option.

PAGEKOM® COMMON-TALK PAGING SYSTEMS

General Description. PageKom one and two-line common talk-paging systems with "page only" line are ideal for application wherever cost-efficient and dependable common-talk intercommunication and paging are logical communications adjuncts. Typical installations include commercial and service businesses, manufacturing, production, distribution and storage facilities. Selection includes one and two-channel models in wall and desktop versions.

Models with integrated loudspeaker provide added paging flexibility in remote areas where overhead announcements are not practical. PageKom systems require a power control unit model PKC24-30, necessary wiring plus a system amplifier (both items by other manufacturers). Desk phone models also require Model PK10-TA terminal box. For wiring information, request installation manual #286919 or SL8-1455.

PAGEKOM® WALL PHONES/OPTIONAL PEDESTAL STAND

PK100/PKS Series. Models PK101-WA and PK100-WA are one and two-line stations, respectively for wall or pedestal mounting. Assemblies incorporate a "500" style handset with factory-mounted SPDT-type paging switch, cast metal hookswitch with external loudspeaker muting device and LED busy lights mounted within a CRS housing with silkscreened nomenclature. All connections are screw terminal. Housings are finished in neutral gray epoxy and measure 6 1/2" H x 4 1/2" W x 2" D. Handsets are matching neutral color. Optional PKS Series single pedestal phone stands are available for station mounting in open areas and where free-standing access is preferred. Stands are rectangular CRS tube construction MIG welded to an 11-gauge CRS mounting base for dependable strength and stability. Finish is neutral gray epoxy.

PAGEKOM® WALL & DESK PHONES WITH LOUDSPEAKER

PK200/PK300 Series. Versatile one and two-line stations for wall and desktop application, respectively, incorporate the same basic features as the PK100 Series but include integral loudspeaker to provide paging capability at the handset. Models are ideal for application in remote and private areas where close-up direct paging transmission is desired. Models include a 2 1/2" loudspeaker, 25 volt transformer and 1/2" and 1 watt taps and screwdriver-adjust volume control. To provide uninterrupted conversation and paging capability, the internal loudspeaker is muted when the handset hookswitch is activated. Wall-mount housing is constructed of CRS, finished in neutral gray epoxy and measures 7 1/8" H x 4 1/2" W x 2" D. Desk housings are molded from high-impact plastic and finished in neutral gray. Handsets are also neutral color. Desk phones require model PK10-TA terminal box (order separately).

PAGEKOM® POWER CONTROL UNIT

PKC24-30. Power controller with full wave rectifier and pi-section filter delivers 24 volts at 3 amps to service up to 45 stations each. 100K ohm potentiometer with screwdriver adjust, controls the input from any background music source to the amplifier. Relays are 24 VDC, DPDT plug-in type with dust cover for long life and easy servicing. Assembly also includes a non-switched convenience outlet. Terminations are screw terminals for system wiring and phono plugs for the amplifier and program source. For expansion convenience, a jumper terminal is provided for simple addition of auxiliary power supply Model PS24-30 capable of powering up to 45 more stations (90 total). CRS housing is finished in black with textured black cover and measures 3 1/2" H x 13 1/2" W x 7 1/4" D. Assembly is listed under UL 464.

MODEL	POWER INPUT	POWER OUTPUT	EXT. POWER INPUT	AUX. OUTPUT POWER
PKC24-30	105-125 VAC 60 Hz	24 VDC @ 3 Amps	24 VDC up to 3 Amps	24 VDC @ 250 mA fused

PAGEKOM® TERMINAL BOX

PK10-TA. Assembly includes 10-point barrier strip for screw terminal connection housed within a CRS enclosure finished in neutral gray epoxy. Model PK10-TA terminal box is required for application with PK300 Series desk phones and includes six-foot 10 conductor cable terminated with spade lugs. Dimensions: 5 1/2" H x 4 1/8" W x 1 1/8" D.

TELEPHONE INTERCOM ENCLOSURE

TS302A. Surface-mounting 2-gang enclosure provides for surface mounting of CE Series intercom stations. CRS unit is finished in neutral gray epoxy.

WALL MOUNT HANDSET/HOOKSWITCH ASSEMBLY

CE-2A. Economical handset assembly provides clear and crisp speech reproduction for intercom and paging functions. It includes a "500" style handset and two form "C" (DPDT) hookswitches mounted to a 2-gang plate with rear mounted terminal strip, color coded leads and spade lugs. Model features a chrome hanger hookswitch, neutral handset, flexible coil cord and stainless steel plate for mounting directly to a standard E.O. Box. Factory-wired options are listed below.

PT Option. Factory-installed push-to-talk handset button provides for relay control and a variety of switch, communication, and signaling functions. Contact switch arrangement is a SPDT wired as normally open. Option is available on CE and DP Series telephone stations as noted.

AC Option. For telephone station installations requiring vandal protection, this 25" stainless steel armored cable is securely fastened to the mounting plate and handset to provide service-free operation in public access areas, municipal buildings, and warehouses. Option available on Model CE-2 only.

CE-2A-AC

DESK INTERCOM STATION ASSEMBLY

DP-1 Series. Traditional "2500" style desk phone is finished in neutral for use in virtually any telephone intercom system. Assembly includes handset, two form "C" (DPDT) hookswitches, transmitter, receiver, housing with blank dial and coiled cord. Unit is wired to an interior mounted terminal block and supplied with spade lugs for quick modification. Unit does not include ringer, induction coil. Finished in neutral gray.

MODEL	DESCRIPTION	COLOR
DP-1A	Desk Phone	Neutral

DP-1A

600-OHM IMPEDANCE MATCHING TRANSFORMER

LT600-VC. Versatile unit for matching telephone-type, 600 ohm line circuits with HI-Z circuits. It can also be used as a 600 ohm to 600 ohm isolation transformer. Recommended for coupling of telephone-type lines into amplified sound systems, background music and paging systems, recording equipment, or studio electronics. Built-in potentiometer provides optional adjustability for the 25K output level. The 600 ohm input may be matched to 600, 10K and 25K-ohm circuits. All components are mounted on a printed circuit board. Steel chassis includes mounting ears and "insta-mount" tape. Transformer is shielded to minimize induced hum. Unit includes a phono jack on the output side for convenient connection to amplifier or other equipment circuitry. Jack can be connected to various transformer taps via barrier strip jumper. (Factory-installed jumper connects jack to potentiometer output).

MODEL	INPUT IMPEDANCE	OUTPUT IMPEDANCE	FREQUENCY RESPONSE	DIMENSIONS
LT600-VC	600 ohm	600, 10K, 25K ohm	60Hz-12KHz	4 ⁷ / ₈ " L x 3 ¹ / ₈ " W x 1 ³ / ₈ " H (124 x 80 x 44 mm)

LT600-VC

TELEPHONE POWER SUPPLY

TPS24-05. Unit is a combination 24-VDC/TALK voltage power supply engineered to power most common-talk telephone intercom systems (see Section 8). Finished in black epoxy and complete with 68 power cord. For information on common-talk intercom applications, request SL8-1433.

MODEL	INPUT	OUTPUT (Nom.)	RIPPLE @ FULL LOAD	REGULATION 0 - FULL LOAD	SIZE L x W x H	WEIGHT

TPS24-05

TELEPHONE ACCESSORIES AND REPLACEMENT PARTS

Suitable for use with CE Series handset/hookswitch assemblies.

MODEL	DESCRIPTION
CEK-1A	Coil style replacement cord, standard 6-foot length, neutral
CX-EA	Handset mounting noise cancelling transmitter, neutral
DY-1	Dynamic transmitter allows the telephone to function as a microphone for high intelligibility paging. Replace carbon transmitter with DY-1 during installation.
RU-1	Replacement handset receiver (150-200 ohm)
TU-1	Replacement handset transmitter (50 ohm)

EIGHT

Open office landscaping and mobile partitions are popular concepts within commercial and institutional buildings. In order to maintain conversational privacy for the individual, Atlas Sound has merged the expertise of leading acoustical consultants and its own practical manufacturing experience to produce sound masking loudspeakers and signal generators.

The selection of products is designed to accommodate the varying mechanical requirements of suspended tile ceilings and the building codes of individual communities. Models include special 4" and 8" diameter loudspeaker assemblies for upward, downward, horizontal and angled dispersion, as well as digital masking amplifiers and sound generators.

"THE MASKER" SELF-CONTAINED SYSTEM

AM1100 Series. Complete self-contained masking unit is suitable for applications where distributed constant-voltage systems are not practical. Economically priced unit provides confidentiality and can be installed above or below the ceiling (as field conditions require). System could be used in individual office areas, common waiting areas and professional offices where confidential conversations occur. The equalized masking sound lowers intelligibility and "masks" disruptive outside sounds.

System is available in 117VAC and 16VAC versions. Each model includes built-in power supply, digital pink noise generator, 2 watt amplifier, 4" loudspeaker with 10-oz. ceramic magnet and selection of installation and operational features described below. All components are packaged within a specially designed 6" (152mm) metal cube enclosure featuring one-point suspension to allow 360° positioning capability. Controls include power switch, screwdriver-adjust master volume control, attenuator with 1½dB per step, and two screwdriver-adjust low pass filters. For convenience, sound output curves have been calculated and shaped at the factory (specially designed curves to meet customer specifications are available). 117 volt models include transformer with IC electronic regulator and resettable circuit breaker. 16 volt versions include 8" leads for connection to external power transformer. The following options are included on specified models: (L) AC line cord with molded plug, (H) 4' suspension chain with "S" hook. Listed under UL Standard 1480, Speakers for Fire Protective Signaling.

AM1100-LH

MODEL	POWER REQUIREMENTS	DESCRIPTION
AM1100-LH	117VAC, 60 Hz	Masker with line cord and chain
AM1100-16VH	16VAC, 60 Hz @ 350 mA	Masker with chain

Also available: **PS16-40 AC.** 16 VAC power supply - will power up to (7) AM1100-16VH Maskers

DSP-BASED SOUND MASKING GENERATOR/EQUALIZER

MG2500. The Atlas Sound MG2500 Noise Masking Processor is a digital pink-noise generator that includes a balanced line-level audio input and a 2-channel DSP processor, all in a single rack-space unit. An extended 'non-apparent' repeat time of noise (200 minutes) and output delay with distance/delay calculation, per channel helps insure the masking source will not be decoded in high security installations. The MG2500 includes two independent matrixes for channel-to-channel mixing and balanced input & outputs on plug-in barrier strip connectors. Noise & audio levels, plus two channels of combined 1/3-octave & parametric equalization, EQ, gain management & delay, are adjusted via computer software (Windows 95/98/2000/XP/NT4). Sixteen presets can also be recalled via contact-closures, RS-232, or other remote control options. There are no manual controls on front panel, to prevent tampering. All programming software & serial cable included. UL Listed. Available July 2002.

MG2001. The MG2001 represents the latest technology in digital signal processing (DSP) engines for sound masking generator/equalizers. This model features two built-in digital noise generators and two analog noise generators allowing the versatility of digital, analog, or mixed noise at either of its two outputs. Each noise source is separately adjustable-between 80dBu and 0dBu in 0.1dB steps. The MG2001 offers a variety of user selectable filter options including one-third octave, parametric high/low pass, and high/low shelving filters. Each filter offers precision .1dB level and 1 Hz frequency steps. All set-up and operating functions of the MG2001 are conducted from a PC using software provided for Windows 95/98/2000/XP/NT4. After defining and downloading the control functions through the PC, the settings will be stored within the unit in non-volatile memory (no battery required). The MG2001 model features 12 storage memories and 12 preset functions. The unit occupies one rack space unit (1¼") with a depth of 10" behind the front panel. It contains a built-in power supply capable of operating between 94-260 VAC at either 50 or 60 Hz.

MG2500

MG2001

SOUND MASKING GENERATOR/EQUALIZER WITH LCD DISPLAY

MG1500A. Masking pink noise generator is a professionally engineered source for acoustic masking utilizing the latest technology. Unit features a digital noise source and a digitally controlled analog equalizer. All control functions are selected using pushbutton switches and the display menu on the LCD screen. This self-contained unit is equipped with an internal power supply and operates at 117VAC. Room and loudspeaker acoustic equalization is achieved with 14 adjustable broadband filters on ½-octave centers from 200-4000 Hz. Unit also contains two filters centered at 8 and 16 kHz plus a low-pass and high-pass filter. Ten memory settings are offered for storing different equalization curves and built-in password security prevents tampering. The LCD read-out may be personalized to display the installer's name and phone number so that the customer has the information close at hand if questions arise. Chassis is mounted to a 19" W rack panel with rear-mounted terminals and three-conductor, 6-foot cord. Unit requires one rack unit (1¼") of vertical panel space. Finished in black semi-gloss enamel.

MG1500A

GENERAL PURPOSE GENERATOR

GPN1200B. Digital generator with switchable output produces pink or white noise for application in sound masking systems and for system equalization and audio equipment testing. Output level is .3V into 600 ohm (-8dBm) for matching input circuits of most commercial equalizers and amplifiers. Low-pass filter shapes frequencies from 16KHz to 250Hz at 12dB per octave. Self-contained unit with built-in power supply operates at 117VAC at 60Hz and includes replaceable fuse, ¼" phone jack and screw-terminal output connections. Chassis with rear-mounted controls is attached to a 19"W x 1¼"H rack panel and finished in black semi-gloss epoxy.

SUSPENSION MOUNTING SOUND MASKING LOUDSPEAKERS

M1000 Series. The new M1000 masking speaker assembly is designed to accurately reproduce the needed spectrum of masking signal into the plenum space. The innovative 712 cubic inch square enclosure insures ample low frequency response. A specially designed 8" dual cone loudspeaker is included in the package. A high efficiency 70.7V internal transformer is coupled to an external selector switch for easy system tuning. For more precise adjustments, a wide selection of wattage taps ranging from 1/4 watt to 4 watt are provided.

The exclusive Atlas Sound EZ hang brackets simplify installation. This innovative suspension system utilizes (2) collapsible galvanized hangers configured to allow quick upward or side firing installation. The hangers are factory-installed on the unit and fold flat for shipping. To meet most any local code requirement, the M1000 includes an innovative cover containing both knockouts and a strain relief. This system will allow the use of rigid or flexible conduit (if required) and easily accommodates "through" connections on the removable plate. UL Pending.

Model	Transformer Taps @ 70.7V	Speaker	Enclosure Volume	Dispersion Angle
M1000	.25,.5,1,2&4	8", 10 oz Dual Cone	712 cu. in.	Upward & Horizontal

M980 Series. Loudspeaker/enclosures for sound masking systems meet a wide variety of installation and acoustic requirements to achieve continuous background coverage in an open office environment. Models with "BX" option are UL listed to meet regulatory requirements. Labor-saving hardware package, complete with 4' suspension chain and snap hooks, allows these cylindrical assemblies to be easily and securely suspended in most suspended tile ceilings for upward, downward, horizontal or angled sound dispersion as required to meet specific level and environmental acoustic objectives, as well as code requirements. Wired assemblies include loudspeaker, transformer, enclosure, baffle and necessary hardware. CRS enclosures are undercoated and lined with 1 1/2 lb./cu. ft. density fiberglass to eliminate metallic resonance in the high end of the frequency spectrum. CRS baffle is perforated and employs a foam filter gasket to protect assembly from dust and indoor environmental hazards. Enclosure and baffle are finished in black epoxy. M980 Series is available with choice of 4", 6" or 8" loudspeakers and 70.7 volt transformer with .5, 1, 2 and 5 watt power taps mounted within a 650 cu. in. enclosure. Series is available with optional rotary switch wired to transformer primary (suffix model with -RS) and optional conduit box complete with 1/2" conduit knockouts (suffix model with -BX).

M900 Series. Economically priced loudspeaker/enclosure sound masking assemblies offer opportunities when budget constraints exist. These versatile units offer the same quality construction and similar performance as the M980 Series (described above) in a lower-priced package. Labor-saving hardware package, complete with 4' suspension chain and snap hooks, allows these cylindrical assemblies to be easily and securely suspended in most suspended tile ceilings in the conventional manner to provide upward, downward, horizontal and angled sound dispersion as required to meet specific level and environmental acoustic objectives, as well as code requirements. M900 Series is available with a choice of two 8" loudspeakers and a 70.7 volt transformer with .5, 1, 2 and 5 watt power taps. Both models are mounted within a 325 cu. in. enclosure. The CRS enclosure has a black epoxy finish and patch jute lining. Optional conduit box complete with 1/2" conduit knockouts is available (suffix model with -BX).

T-BAR/CHANNEL SUPPORT SOUND MASKING LOUDSPEAKERS

M812. Loudspeaker/enclosure masking assemblies help maintain a successful acoustic environment in open plan and partitioned office designs with T-Bar supported ceiling systems. Selection includes square enclosures with upward sound dispersion, choice of two 8" loudspeakers with premounted 70.7 volt transformer, channel support rails and mounting hardware. Enclosures are finished in black epoxy and acoustically treated with undercoating and 1 1/2 lb./cu. ft. density fiberglass to absorb resonance associated with high-frequency sound transmission. Transformers are supplied with .5, 1, 2 and 5 watt primary taps. M812 Series is a square enclosure with a cubic content of 529 cu. in. All models are available with optional rotary switch wired to transformer primary (suffix model with -RS) and optional conduit box complete with 1/2" conduit knockouts (suffix model with -BX). Also may be used in access floor masking systems.

NINE

* c UL LISTED Models with "-BX" (conduit box) option are UL listed under UL1480 General Signaling and are rated for use in air handling "plenum" spaces.

** For complete loudspeaker specifications, refer to Section 1.

Atlas Sound has been a leading manufacturer in the cabinet market for 30 years. The company's metal forming and solution-oriented design experience has created cabinets that are functional and meet specific spatial and structural guidelines. Models include unique ventilation and wire management features to meet changing configuration requirements, while offering superior aesthetics to satisfy work group

image and facility management concerns. Specify Atlas Sound cabinets racks and consoles for use in commercial, industrial, broadcast, and institutional applications for computer-control equipment, telecommunications, studio electronics, building management, communications and security systems, or wherever rack-mounted devices require enclosure protection.

CABINET COLORS

#962 - Midnight Black
(Textured Finish, Semi-Matte Sheen)

ATLAS SOUND STANDARD FINISH

Atlas Sound's finishing process for cabinet and rack systems, is now the largest in the industry, due to the technologically advanced painting process and facility. The high-adhesion process combined with specially formulated powder coatings produce a superior overall appearance and finish. Most cabinets finished in -962 midnight black as standard, filler panels and accessories finished in -052 as standard. Other products finished as noted.

KNOCKED-DOWN OR WELDED CABINETS WITH FIXED RAILS

WA100 Series. These industry-standard utility cabinets are engineered for superior ventilation and wire management. They are complete with base, top panel; vented side panels; vented rear door with lock; one pair of fixed rails; mounting screws and hardware. The rear door is removable and may be hung for right or left-hand hinging. Series WA100 is welded and UL listed (Standard 1678). Both styles feature, vents in the cabinet top and bottom front edge; knock outs at the top and bottom with easy wiring access through a standard panel openings in the cabinet. This installer-friendly design offers technicians ample room for wiring connections. Top and bottom panel opening may be left open for access and ventilation or covered using one of the following: a standard 5¼" (3RU) panel Model S19-5***; a non-conductive polymer panel to facilitate isolation of the rack from the building's electrical system Model ISOPANEL; or exhaust fan Models ES195-(121)(122) (top only). Optional solid or acrylic front doors are available. WA100 Series will not accept rear rack rails. Outside dimensions are 22⅞" W x 18½" D.

* Listed panel opening allows ⅛" clearance at top and bottom (⅜" total). Welded Models are UL listed under Standard 1678.

*** Note: One Model S19-5 painted black is mounted to each cabinet as a shipping stiffener.

WA100-70B-962

WELDED CABINETS WITH DOOR & ADJUSTABLE RAILING

WA200/WA202 Series. Cost-efficient-cabinets are the same as WA100 Series, with the added features of a solid steel front door (110 Series) and front-to-rear adjustable mounting rails (230 Series). Series WA200 and WA202 are welded and UL listed assemblies. Both are available w/without door (denoted by LD). Extra-Depth Series WA202 models are structurally identical to the WA200 Series, except for their 25½" depth. Available in five vertical panel space heights. Outside dimensions are: (WA200 models are 22⅞" W x 18½" D)(WA202 Series is 22⅞" W x 25½" D) Additional mounting rails are offered. Specify 230 Series.

SOLID, VENTED & PLEXI DOORS FOR STANDARD SERIES

110/5000SDV/5000SDP Series. Optional surface-mounting front doors provide secured access for 19" Standard Series cabinets. Series 110 is a 16-ga. CRS door with lock, keys, handle and mounting hardware for right or left-hand hinging. Series 5000SDV is fully perforated and specifically designed to accommodate airflow requirements of power amplifiers and electronics with front-mounted intake fans. Series 5000SDP is an attractive acrylic plex door that allows for visual monitoring of equipment mounted in cabinets. It includes a full-length smoked acrylic plex panel within a reinforced 16-ga. CRS frame, two hinges with removable hinge pins, lock, handle, mounting hardware and keys. All surface doors are keyed the same yet different than flush doors.

WELDED RACKS FOR MULTI-BAY CONFIGURATION

500/502/503 Series. Sturdy welded racks feature 16 ga. CRS welded frames in 18½", 25½" or 30" depths (respectively), standard panel space heights and 19" widths. Designed with open sides for easy wiring access in single or multi-bay configurations. Racks offer superior wire management, ventilation and styling. Series 500 has 17¼" usable depth, Series 502 provides for 24¼" usable depth, and Series 503 has 28¾" in usable depth. The Series is UL-listed and shipped with a flush-mounting, removable rear door (right or left-hand hinging) with lock, and adjustable mounting rails. Series 500 and 502 include one pair of 11 ga. CRS adjustable mounting rails tapped 10-32; Series 503 includes two pair of rails.

Wire management and ventilation features include maximum cabling and cooling opportunities via a standard panel width opening in the cabinet top and bottom. The panel opening may be covered with a standard 5¼" (3RU) panel Model S19-5*, the ISOPANEL (a non-conductive polymer panel to facilitate isolation of the rack from the building's electrical system), or exhaust fan Model ES195-122 (121). Optional center wiring channel features an open bottom and 4" width for easy cable access and wiring between cabinets. Unique side panel/center channel combination creates a convenient enclosed 4" wide wire management area. Mounting rail supports have slotted holes to adjust rail depth and provide open cable raceways. Supports are also on 19" panel spacing to accommodate vertical accessory mounting. Punched vents located at the cabinet top and bottom front edge may be covered with standard panels to control air handling.

* Note: One Model S19-5, painted black, is mounted to each cabinet as a shipping stiffener.

502-70B-962

OPTIONAL ACCESSORIES.

110/5000, -SDP & -SDV, Series Surface-Mount Front Doors. Series 110 doors are 16-ga. CRS with lock, keys, door pull and mounting hardware for right or left-hinging. Attractively-styled 5000 Series doors are available in perforated (SDV) and Full-length smoked plexiglass panel mounted into a 16-gauge CRS frame (SDP). Doors come complete with two hinges, removable hinge pins, lock, door pull, mounting hardware and keys. Doors provide ¼" minimum clearance from rail for knobs/handles

540/542/543 Series 58" Wide Side Panels. Series 540, 542, and 543 lift-off, vented side panels are offered for enclosing 500, 502 and 503 Series cabinets, respectively. Side panels may also be used to enclose a 522 or 523 Series wire channel to create a closed extra-depth side panel. To install, simply connect side panel supports (included) to the channel and hook side panel over supports.

522/523 Series 4" Wide Wiring Channel. Four-inch wide wiring channels are great for single or multi-bay installations that require extensive wire management. The 522 and 523 Series mount the 502 Series (25½"D) and 503 Series (309D) racks respectively. The channel provides a four-inch wide wiring raceway and may be used between two cabinets or on the side when combined with a standard ½" wide side panel to enclose the wire management area. The three-piece channel series is 16-ga. CRS and assembles in place with supplied hardware. The open bottom design provides ample cable access. Channels are offered in sizes to fit each 502 and 503 Series cabinet and are sold as single units.

230/235 Series Mounting Rails. Eleven-gauge CRS mounting rails are tapped 10-32 on E.I.A. spacing (½" - ¾" - 1½" continuous centers) painted black. One set is supplied with Series 500 and 502 racks, two sets are supplied with Series 503. Additional rails are offered to provide front and rear support to equipment mounted in Series 500 and 502.

* One pair of mounting rails is supplied on 500 and 502 Series. Two pair are supplied on 503 Series.

CABINETS WITH CASTERS & SIDE HANDLES FOR MOBILE USE

RX Series. Sturdy mobile equipment cabinets have been re-designed to offer increased mounting-depth and improved wire-management capabilities in an easily transportable protective cabinet. Construction is similar to the recently re-designed WA202B Series with the addition of four, pre-installed 4" casters (2 locking) and a pair of recessed and hinged, rubber-padded steel grips on each side. RX Series Models feature three wire access/isolation holes in the bottom of the rear panel and a solid base. Dimensions are 22⁵/₈" W x 25¹/₂" D; offering vertical panel space heights of 24⁵/₈" and 36⁷/₈". Cabinet features; a 16-ga. CRS welded frame; adjustable, front-to-rear mounting rail supports with slotted cut-outs for vertical wire management; perforated vents on side panels and rear door; a 600 lb. load capacity; a locking rear door and a locking and removable front door.

* Listed panel opening allows ¹/₈" clearance at top and bottom (¹/₄" total).

OPEN RACK WITH ADJUSTABLE CHANNEL RAILS

800 Series. 800 Series racks instill stability, economical and easy access are desired for 19" (wide usage for electronic, telecommunications, switching, testing, signal and transmitter equipment). Rigid frames feature easy-to-adjust channel rails that position on center, front or rear, to effectively support equipment of varying weights. Mounting rails are 11-gauge CRS, tapped 10-32 on E.I.A. spacing. Base will accept four optional casters (Model CS-LDPR, sold in pairs) or leg levelers (Model LL-1, sold in sets of four). Outside dimensions are 21¹³/₈" W x 21" D. Components are shipped unassembled in two cartons.

* Listed panel opening allows ¹/₈" clearance at top and bottom (¹/₄" total).

EASY-TO-ASSEMBLE, STACKABLE UTILITY FRAMES

900 Series. Versatile frames are engineered for easy-to-assemble, strength and shipping/storage economies. Innovative units assemble and stack easily for mounting electronics in custom cabinet enclosures or free-standing situations. They are ideal for theater, residential, broadcast and retail applications, where easy access to equipment mounted, "behind the scenes", is desired. This frame-only design allows full use of all vertical panel space for equipment mounting and is intended for permanent installation where doors, side panels and casters are not required. (Custom side panels may be added).

The 900 Series frames are offered in 17¹/₂" and 26¹/₄" panel space heights. Model 900-19 is 21¹/₄" tall and offers 10 rack units of vertical panel space. All (4) rails are tapped. Model 900-28(P) is 300 tall and offers 15 rack units of vertical panel space. (Usable panel space becomes 11 and 16 rack units, respectively, with removal of the optional top horizontal member.) All models can be stacked and ganged in the combinations outlined below. The vertical stacking process is easily accomplished — simply stack the rail members and join them using the front-to-rear members as splice plates. (All necessary hardware is furnished.) Units can also be joined "side-by-side" using the predrilled holes in the front-to-rear frame members and owner-supplied hardware. (These pre-drilled holes can also be used to mount custom side panels.)

The corner post rails of Models 900-19 and 900-28 are manufactured of 11-ga. CRS, drilled and tapped for EIA mounting. Three left-to-right frame members are supplied. To complete the frame structure, one blank recessed 16-ga. CRS panel measuring 3¹/₂" (2RU) is included. This panel may be placed anywhere along the front or back side of the frame. The left-to-right frame members are 14-ga. CRS and offer cutouts for easy wire access and ¹/₄" holes for bolting to floors (optional). They can also be used as handles to carry and/or re-position the frames (install the members in the desired direction). The front-to-rear frame members are 16-ga. CRS, to provide structural rigidity and to serve as splice plates when joining 900 Series units. They also are equipped with wire tie holes for wire bundle management.

Units are finished in black. Assemblies are shipped knocked-down in a compact carton suitable for UPS shipment. Hardware bag containing black screws and washers is furnished.

SECTIONAL WALL CABINETS FOR 19" EQUIPMENT

These pre-assembled sectional wall-mount cabinets feature right or left-hand hinging capability and offer full functional and mechanical flexibility for mounting standard 19" W rack equipment. Cabinets have been engineered to offer increased mounting, wiring and structural capabilities. Feature center section depths of 12", 15" and 18", respectively; and rear mounting section depth of 4 1/2". 300 Series models are used to protect electronic switching, monitoring, lighting, sound and communications controls in venues such as: school auditoriums, health care facilities, clubs, factories, warehouses, public areas and recreation areas.

Structural and mounting features include: 16-ga. CRS construction throughout; one-piece front and rear sections strengthened with frame flanges on bottom, top and sides; center section with corner-brace structural supports, a center section guide plate, electric-welded seams and miters; punched vents for heat dissipation and 11-ga. adjustable front-to-rear mounting rails. The center section mounting rail supports also have slotted cutouts, to easily adjust rail depth and provide open raceways for containing vertically run wire and cable. Corner brace supports, which straddle the back and side panel of the rear section (hinge-side), also feature round wire access holes for harnessing excess wire. All 300B, 320B and 340B Series models have 20 conduit knockouts, except Model 300-12B which has 16. Provisions have been added to facilitate contractor installation of plywood for mounting accessories to inside of rear section if desired. Rear section also includes removable pin-type hinges allowing it to be installed separately in a surface or recessed manner.

300B/320B/340B Series (with 2" deep solid front door). Cabinets ship with the solid Series SD 2" deep steel front door with cylinder lock.

300LDB/320LDB/340LDB Series (without front door). This series of models can accept the optional 4" deep 304 Series steel doors or optional 2" deep 302V Series vented steel doors or 302P Series door with plexiglass front.

Optional 302/304B Series Doors. Will fit all Series 300LDB, 320LDB and 340LDB cabinets: 2" Deep Series 302 doors are available with plexiglass (P), vented steel (V) or solid steel (SD) front. 2" Deep Series SD doors are identical to Series 300B, 320B and 340B standard 2" cabinet doors. 4" Deep Series 304B doors provide clearance for equipment with full-grip handles & protruding knobs.

CT31A. Optional heavy-duty casters, support and reduces the load bearing requirements of the wall, by supporting the center section weight when opened and closed (typically used on 61" H models). Cabinet must be mounted 6" from the ground. Support is constructed of formed, 14-ga. steel and includes heavy-duty, zinc-plated caster with a black, hard-tread wheel. Adjusts in height from 5 1/2" - 7 1/2" and is supplied with drilling template for easy installation. Finished in black.

EJL-2. Replacement latch-bracket for security applications features a standard-size hole to accommodate customer-supplied 1/4" padlock. Bracket is constructed of 11-ga. CRS and mounts into existing latch holes after standard lock is removed.

† Suffix model with P (plexiglass) or V (vented steel) or SD (solid steel).

WALL MOUNT SHELF/ENCLOSURE SYSTEM

WME150. WME150 wall mount shelves are perfect for limited-access of electronic equipment in convenience food stores, restaurants for audio/video control rooms, educational and institutional facilities, auditoriums, stadiums or venues where the convenience of locking security or open access and wall mounting of equipment is desired. Typical installations include supporting VHS recorders, amplifiers, TV/video monitors, tuners, SCA receivers, computer CPUs or other electronic equipment that is not rack mountable. Unit will support free standing 19" rack mount equipment. The enclosure, wall mounts on 16" centers; is 21" wide, wall mount, is constructed of 16-gauge CRS ends and 18-gauge shelves, (6) piece (bolt together with hardware) comes pre-drilled with four mounting holes for stud mounting to wall. Weight capacity of the shelf handles up to 150 lbs. Finished in standard #592 nutral white textured powder coat paint.

TILT-OUT WALL CABINETS FOR 19" EQUIPMENT

AWR Series. Convenient access and lock-in security highlights, Atlas-Sound's tilt-out wall cabinets for 19" equipment. The re-designed welded models can be surface or recessed mounted (trim ring included) and are available in choice of 3½" (AWR-3A) and 5¼" (AWR-5A) panel space sizes for mounting remote amplifiers and control equipment. Series features a 16-ga. CRS formed door frame with a 16-ga. CRS locking tilt-out door which closes against door stops. The flush mounting door is attached to the frame internally with a piano hinge to prevent tampering. Doors can be opened to, two positions—tilt-out for operation and by releasing side catches, the door will open to approximately 90°, for equipment installation and maintenance. Units are furnished with two steel safety-catch cables which suspend and hold doors at 90°. Models offer 1½" wide, blank mounting space located on right side of chassis to accommodate custom mounting of accessories such as switches, jacks and lights. Front panels have 45-degree mitered edges to present a clean flush appearance. Backbox is 16-ga. CRS equipped with six concentric knockouts of ½" and ¾". AWR Series is shipped complete and ready for installation. Panel mounting holes accept 10-32 hardware.

WELDED & ASSEMBLED DESK TOP CABINETS

400 Series. Welded assemblies provide desk-top access to (19") control and monitor equipment. Models are 16-gauge CRS and include one pair of mounting rails, tapped 10-32, hardware and wiring access below rear door or panel. Models 400-5 and 400-7 are low-height models with protective rubber feet and removable rear panel attached with "U" clips and bolts. Models 400-12 through 400-31 include locking rear door with spring-loaded hinge, side vents and optional front door with self-tapping screws. Inside (usable) dimensions are 17¼" W x 14¼" D.

SEVEN EASY ORDERING STEPS

Atlas Sound has developed an easy-order method for the popular Series 5000 heavy-duty vertical cabinet line. By following the ordering steps outlined below, contractors and engineers will be guided through the specifying and ordering process quickly. For detailed specifications, request SL10-1456.

1 CABINET FRAMES IN 5 HEIGHTS & 3 DEPTHS

Series 5000T. UL Listed modular frames are available in: 19" panel width, a choice of six vertical panel openings from 36½" to 77½"; and a depth of 25½" or 30". (36" depth also available in 77" height only) Overall width is 22½". Each welded assembly is 14-ga. CRS with reinforced, multi-formed vertical corner column sections. Units are also equipped with two pair adjustable 11-ga. CRS mounting rails tapped 10-32 and 11-ga.. CRS corner caster gussets with four integral ⅜"-16 threaded sockets for leg leveler installation. (Order levelers separately.) Hardware kit for panel mounting is furnished (includes black phillips-head screws). Finished in highly durable #962 midnight black wrinkle powder coat finish.

25½" D* MODEL	30" D* MODEL	36" D* MODEL	PANEL OPENING**	RACK UNIT	OVERALL HEIGHT

2 45° WEDGES FOR 25½" & 30" DEEP CABINETS

Wedge cabinets provide an attractive installation of 25½" D and 30" D. (77"H only) vertical cabinets in angled multi-bay configurations. Each 45° assembly is welded of 16-ga. CRS construction with formed top. Two 45° units may be joined for 90° applications. Base wedge component is reinforced with 14-ga. CRS front-to-rear channel members and furnished with a locking rear door. All other stacked wedge components include a solid rear panel.

3 WRITING SURFACES

WS Series. New attractive 1" thick writing surfaces are offered in seven sizes and feature a white laminate over solid particle board construction. Version "A" offers an oak trimmed front edge, which provides 18" of writing area. Units mount to cabinet frame with support brackets and hardware (supplied) for secure and distributed load-bearing capability. One 1¼" blank panel (Model S219-1) is furnished for closure under the writing surface. Specify panel and bracket color match cabinet frame. Units may be used alone or combined with other models to accommodate multiple cabinet configurations. Writing surfaces use only 1 RU of panel space when installed on 5022 models (the installed writing surface covers the top horizontal frame member). Writing surfaces require 3 RU for all other Series 5000 models. Note: order one S219-5 panel (3 RU) to close the space under the writing surface when mounting frame Models 5036 – 5077 (and discard the supplied S219-1 panel).

4-bay	WS-4A*		

* WS Series uses 1 RU of panel space for installation on 5022 models, 3 RU on Models 5036 – 5077 (order panel S219-5 for closure). Suffix model with color designation for brackets in order to match cabinet frame.

Writing Surface continued top of next page.

3 WRITING SURFACES (CONT'D)

SMS Series. Single-bay writing surfaces are available in horizontal or sloped styling. The sloped model includes a padded front for increased operator comfort. Both models feature heavy-duty steel frame construction with full-length welded rails for excellent load-bearing capability. Insert support rails are equipped with mounting holes on E.I.A. universal spacing for rack mounting equipment (up to 7 RU, 12 $\frac{1}{4}$ "). Height restriction of equipment mounted in Model SMS-19H is 4 $\frac{3}{4}$ "; in Model SMS-19A is 2 $\frac{1}{4}$ ". Choose from a white or woodgrain laminate insert (required; ordered separately). Shipped complete with hardware kit. Specify color to match cabinet frame. Both models use 1 RU of panel space for installation on 5022 models and 3 RU for all other models.

1-bay, Sloped	SMS-19A-962**	Woodgrain	TKS
1-bay, Horizontal	SMS-19H-962**	White	WHS

*SMS Series uses 1 RU of panel space for installation on 5022 models, 3 RU on Models 5036 – 5077.
 **Specify white (WHS) or woodgrain (TKS) insert.

SMS-19A

SMS-19H

4 TOP & BOTTOM PANELS

5000 Series top & bottom panels offer protection for console contents, from dust and tampering by ordering the appropriate top and bottom panel for each cabinet frame. Top panels are offered in solid or perforated styling. Perforated panels are offered to dissipate equipment-generated heat and are equipped with $\frac{1}{8}$ " dia. holes on $\frac{3}{8}$ " staggered centers for a 40% open ventilation area. Bottom panels are available in solid design only. All panels feature CRS construction. (TPS models are 16-ga.; TPP models are 22-ga.; BPS models are 14-ga.) Consider using EFT Series turbo fans in place of top panels for added ventilation. (see Cooling Accessories later in this section).

5 SIDE PANELS (SOLD IN PAIRS)

Choose from solid or vented surface-mounting side panels featuring 18-ga. CRS construction with welded corners. Panel pairs are offered for both the 25 $\frac{1}{2}$ " and 30" D Series 5000 cabinets and add $\frac{1}{2}$ " of width to each side of the cabinet configuration. Panel pairs are engineered to provide lift-off access to equipment, as well as security when fastened in place. One panel set includes a complete pair for each side of a cabinet; if specifying a multi-bay configuration, split the set among the two end consoles. Finished in highly durable #962 midnight black wrinkle powder coat finish.

5077-19-SDP

Functional Add-Ons

6 PANEL/DOOR ASSEMBLIES

Surface Doors. SD Series doors mount to cabinet frame and are typically used in front-mounting installations where rack-mounted electronics have protruding knobs or handles. Models provide 1⁵/₁₆" for handle clearance. Choose from solid, smoked acrylic plex or perforated vent styling where noted. Doors are 16-ga. CRS and include cylinder lock and recessed handle. (All surface doors are keyed the same.) Doors are equipped with quick-release hinges and removable pins for easy door removal. Also included is a template for field installation. (Customer is required to drill mounting holes for surface doors which may be hung for right or left-hand opening and closure.) Models SD19 and SDP19 are short doors designed for writing surface applications and include one, 1³/₄" panel (Model S219-1) for closure.

Flush Doors. Series 5000-FD flush doors mount in the panel space opening, flush-to-frame and are intended for rear installation. Models are available as solid or vented top and bottom. Doors are 16-ga. CRS construction and include cylinder lock and recessed handle. (All flush doors are keyed the same). Doors are complete with spring-release hinges for easy removal. Cabinet is pre-drilled for right or left-hand door mounting. Available in a choice of standard colors. Model FD19 is a short door designed for writing surface applications and is shipped complete with one 1³/₄" door attachment panel (Model DAP-19) for closure.

DAP-19 Flush Door Attachment Panel. Use the DAP-19 to allow for a shorter 5000FD/FDL Series door, to be mounted on a taller cabinet (i.e. a 70" door on a 77" cabinet). This application is typical of installations that require rear wiring access. Unit will support the door by serving as the upper or lower closure panel. Model uses 1 rack unit for installation. A separate fill panel may also be ordered to cover excess space.

Flush Blank Panel. When a door is not required but closure is necessary for a 5022 cabinet, order solid panel Model S219-21 or S219-22 for writing surface and non-writing surface applications respectively. The units are 16-ga. CRS and formed on all four sides.

WRITING SURFACE APPLICATIONS***			
TO MATCH FRAME	SURFACE DOORS	FLUSH DOOR	FLUSH BLANK PANEL

5077	44	5077-19SD	(SDP)	(SDV)	5077-19FD	(FDV)	-

*When mounting an SD Series door that is shorter than the panel opening (i.e. a 5022 door on a 5036 cabinet) consider ordering an optional S219-1 panel to close-off the opening above or below the door.

**Consider the optional DAP-19 attachment panel described above.

***Door installation will reduce available rack space by 1 RU (1%).

7 FUNCTIONAL ADD-ONS

Choose from a variety of convenient, electronic and cooling accessories to create the configuration which best suits functional needs: casters (for single-bay applications), leg levelers (recommended with single or multi-bay configurations), solid or vented fill panels; shelves, drawers, power panels, fans and blowers. A complete listing of all accessories/add-ons is provided later in this section.

WHILE DESIGNING THE CABINET CONFIGURATION, ASK YOURSELF THE FOLLOWING QUESTIONS:

- How many leg levelers should be ordered?
- Will solid or perforated fill panels be needed for closure?
- How many drawers and shelves will be needed?
- Would fans help dissipate equipment-generated heat?
- Will electrical strips, rack work lights or panels be required?

EIGHT EASY ORDERING STEPS

Atlas Sound has reconfigured its Series VI heavy-duty stacking modular console line for easier ordering convenience. Simply follow the eight ordering steps outlined below. For detailed specifications request SL10-1528 and SL10-1529.

1 CONSOLE FRAME ASSEMBLIES WITH REMOVABLE REAR PANELS

Frame Construction. Choose from (9) heavy-duty, 14-ga. CRS assemblies, offering 19" W panel space. All consoles feature; multi-formed vertical column sections and MIG welding for superior rigidity and load-bearing capability. The base component of all models are reinforced with 11-ga. CRS corner caster gussets and four, front-to-rear channel members. Four integral 1/8"-16 threaded sockets are provided for leg leveler installation (order separately). Hardware kit for panel mounting is furnished (includes black Phillips head screws and cage nuts). Louvered rear panels are included for closure; these may be replaced by doors, fans, or other panels.

Mounting Rails. All rails are punched on E.I.A. universal spacing with .281 dia. holes on 5/8"-5/8"-1/2"

ORDERING TIPS!

- This is the time to consider future expansion needs!
- Use the same frame assemblies next to one another to avoid combinations that are difficult to join
- Use the same frame style at each end of a multi-bay configuration (i.e. SMB-DN) to ease side panel ordering
- If you require a configuration not shown here, refer to Piece-Part Components later in this section.

2 45° WEDGE CONFIGURATIONS

CW Series. These 45° corner wedges are offered to create cabinet configurations that suit the user's needs and the physical space requirements. Two CW Series wedge units may be joined for 90° applications. All models are constructed of welded, 16-ga. CRS with a formed top. The base wedge component is reinforced with 14-ga. CRS front-to-rear channel members and furnished with a locking rear door. All other wedge components include a solid rear panel. Corner wedges are finished in a choice of standard colors. Optional wedge top panels are available, please refer to Top and Bottom Panels later in the Series VI section.

** These represent all standard combinations. Please contact the Engineering Dept., if your needs require other combinations.

3 WRITING SURFACES

WS Series. New attractive 1" thick writing surfaces are offered in seven sizes and feature a white laminate over solid particle board construction. "A" versions offer an oak trimmed front edge providing 18" of writing area. Units mount to cabinet frame with supplied support brackets and hardware for secure and distributed load-bearing capability, providing a minimum of 27¹/₈" above the floor and a maximum of 29¹/₈" with LL-2 leg levelers. One 1³/₈" blank panel (Model S219-1) is furnished for closure under the writing surface. Specify panel and bracket color to match cabinet frame. Units may be used alone or combined with other models to accommodate larger cabinet configurations. Writing surfaces use 1 RU of panel space for installation.

* WS Series uses 1 RU of panel space for installation.

SMS Series. Single-bay writing surfaces are available in horizontal or sloped styling. The sloped model includes a padded front for increased operator comfort. Both models feature heavy-duty steel frame construction with full-length welded rails for excellent load-bearing capability. Insert support rails are equipped with mounting holes on E.I.A., universal spacing for rack mounting equipment (up to 7 RU, 12¹/₈"*). Height restriction of equipment mounted in Model SMS-19H is 4³/₈"; in Model SMS-19A is 2¹/₈". Choose from a white or woodgrain laminate insert (required; ordered separately). Shipped complete with hardware kit. Specify color to match cabinet frame. Both models use 1 RU of panel space for installation.

* SMS Series uses 1 RU of panel space for installation.

** Specify white (WHS) or woodgrain (TKS) insert.

4 TOP & BOTTOM PANELS

TP/BPS Series. Protect console contents from dust and tampering by ordering the appropriate top and bottom panel for each cabinet frame. TP Series top panels feature solid CRS construction (TP1, TP2, and TP3 are 18-ga.; TP4 is 16-ga.) and add 1/8" to the overall cabinet height. BPS Series bottom panels are of 14-ga. CRS construction. Both model series are available in a choice of standard colors. Also listed are optional wedge top panels which ensure uniform height when SMB-AN and SMB-BN frames are positioned next to CW-1 and CW-2 wedge configurations. (Without an SMCT top panel, the cabinets will be slightly taller than the wedges.)

5 SIDE PANELS (SOLD IN PAIRS)

SP Series. These surface mounting side panel pairs feature solid 18-ga. CRS construction and add 1/8" of width to each side of the cabinet configuration. Panels secure from inside the cabinet for access protection. One panel set includes a complete pair for each side of a console; if specifying a multi-bay configuration, split the set among the two end consoles.

6 SIDE PANELS ABOVE WEDGE (SOLD IN PAIRS)

SPAW Series. These panel pairs provide the configuration with a consistent appearance by enclosing the cabinet sides when they extend above a wedge. One panel set includes a complete pair to be split among the two consoles which surround the wedge. SPAW Series panels feature solid 18-ga. CRS construction and add 1/8" of width to each side of the cabinet configuration. Panels are easily secured from inside the cabinet. SPAW Series models do not allow the use of an optional wedge top panel (the wedges do have a formed top).

7 PANEL/DOOR ASSEMBLIES

Surface Doors. SD Series doors are mounted to cabinet frames and are typically used in front-mounting installations where rack-mounted electronics have protruding knobs or when drawers and sliding shelves are utilized. Models provide 1 5/16" clearance from rail and are offered in solid, vented and smoked acrylic plex styling. Doors feature 16-ga. CRS construction and include cylinder lock and recessed handle. (All surface doors are keyed the same.) Doors are equipped with quick-release hinges and removable pins for easy door removal. Customer is required to drill all mounting holes and install the door for right or left-hand mounting. Available in a choice of standard colors. Models SD19 and SDP19 are designed for writing surface applications only and include one 1 3/4" panel (Model S219-1) for closure.

5022-19-SD

SDP19

5022-19-FD

S219-22

DAP-19

Flush Doors. Models FD19 and 5022-19-FD mount in the panel space opening, flush-to-frame and feature 16-ga. CRS construction, cylinder lock and recessed handle. (All flush doors are keyed the same.) Doors are complete with spring-release hinges for easy door removal. Cabinet is pre-drilled for right or left-hand hinging. Model FD19 is designed for use as a front door under a writing surface and is shipped complete with one 1 3/4" door attachment panel (Model DAP-19) for closure. Model 5022-19FD is typically used as a rear door but may be used as a front door when a writing surface is not required. Please be aware that flush doors are not compatible with drawers and sliding shelves.

Flush Blank Panels. When a door is not required but closure is necessary, order solid panel Models S219-21 or S219-22. Units are solid 16-ga. CRS and formed on all four sides.

8 FUNCTIONAL ADD-ONS

Choose from a variety of convenient, electronic and cooling accessories to create the configuration which best suits functional needs: casters (for single-bay applications), leg levelers (recommended with single or multi-bay configurations), solid or vented fill panels; shelves, drawers, power panels, fans and blowers. A complete listing of all accessories/add-ons is provided later in this section.

Functional Add-Ons

WHILE DESIGNING THE CABINET CONFIGURATION, ASK YOURSELF THE FOLLOWING QUESTIONS:

- How many leg levelers should be ordered?
- Will solid or perforated fill panels be needed for closure?
- How many drawers and shelves will be needed?
- Would fans help dissipate equipment-generated heat?
- Will electrical strips, rack work lights or panels be required?

ORDERING TIP!

• Drawers and shelves may be used in place of doors or behind surface doors.

See Functional Add-Ons on page 96

Piece-part components, are offered to add functionality and custom capability to in stock assemblies. A selection of stacking frame modules and add-on components are offered to allow you to design your own console for professional security/surveillance systems and for equipment used in communications, energy management, simulation, process control and computer integrated manufacturing operations. Mix-and-match the components as you like.

WELDED FRAME MODULES

Frame Construction. These superbly engineered frames are constructed of MIG-welded, 14-ga. CRS for easy modular configuration and long-lasting structural integrity. All frame components feature multi-formed vertical column sections for superior rigidity and load-bearing capability. The base component is reinforced with 11-ga. CRS corner caster gussets and four front-to-rear channel members. Four integral 3/8"-16 threaded sockets are provided for leg leveler installation (order separately). Hardware kit for panel mounting is furnished (includes black Phillips head screws and cage nuts).

Mounting Rails. All rails are punched on E.I.A. universal spacing with .281 dia. holes on 5/8"-5/8"-1/2" continuous centers. Base component is supplied with 2-pair, 14-ga. CRS adjustable zinc-plated rails. All other frame components have fixed, 14-ga. CRS front and rear rails.

Appearance/Finish. Welded assemblies provide a professional high-quality image. All exterior weld joints are ground smooth for an uninterrupted, seamless appearance. Frames are finished in a choice of standard colors.

 ** Writing surfaces will take up 1 RU of panel space for installation.

*** Inside dimensions (between rails) for all models:
 17 1/2" W x 24" D.

45° WEDGE MODULES

Use 45° stacking wedges modules to create corner configurations that maximize space and enhance user flexibility. Two wedge units may be joined for 90° applications. Welded frames are 16-ga. CRS with formed top. The base wedge component is reinforced with 14-ga. CRS front-to-rear channel members and furnished with locking rear door. All other wedge components include a solid rear panel. Optional wedge top panels are offered to provide a uniform height across the console/wedge configuration.

WRITING SURFACES

WS Series. New attractive 1" thick writing surfaces are offered in seven sizes and feature a white laminate over solid particle board construction. Units mount to cabinet frame with supplied support brackets and hardware for secure and distributed load-bearing capability providing a minimum of 27 7/8" above the floor and a maximum of 29 3/8" with LL-leg levelers. One 1 3/4" blank panel (Model S219-1) is furnished for closure under the writing surface. Specify panel and bracket color to match cabinet frame. Units may be used alone or combined with other models to accommodate larger cabinet configurations. Writing surfaces use 1 RU of panel space for installation.

WRITING SURFACES (CONT'D)

SMS Series. Single-bay writing surfaces are available in horizontal or sloped style. The slopping model includes a padded front for increased operator comfort. Both models feature heavy-duty steel frame construction with full-length welded rails for excellent load-bearing capability. Insert support rails are equipped with mounting holes on E.I.A. universal spacing for rack mounting equipment (up to 7 RU, 12 1/2"). Height restriction of equipment mounted in Model SMS-19H is 4"; in Model SMS-19A is 2 1/4". Choose from a white or woodgrain laminate insert (required; ordered separately). Shipped complete with hardware kit. Both models use 1 RU of panel space for installation.

NON-ANGLED CONFIGURATION***	ORDER MODEL*	INSERT STYLE	ORDER MODEL
1-bay, Sloped	SMS-19A**	Woodgrain	TKS
1-bay, Horizontal	SMS-19H**	White	WHS

* SMS Series uses 1 RU of panel space for installation. *** For multi-bay and angled configurations refer to WS Series.
** Specify white (WHS) or woodgrain (TKS) insert.

PANELS

Protect console contents from dust and tampering by ordering attractive closure panels. Models are available in a choice of standard colors.

Side Panels. SMP Series surface mounting side panel pairs feature solid 18-ga. CRS construction and add 3/8" of width to each side of the console. Panels are engineered to provide security and fasten into place from inside the cabinet. Side panels are offered as pairs; if specifying a multi-bay configuration, split the set among the two end consoles.

Top Panels. TP Series top panels feature solid CRS construction (TP1, TP2 and TP3 are 18-ga.; TP4 is 16-ga.) and add 3/8" to the overall cabinet height. TP Series replaces the SMT Series.

Front/Rear Panels. S219 Series flush blank panels are 16-ga. CRS formed on all four sides. Available in solid and louvered styles.

Bottom Panels. BPS Series bottom panels are of 14-ga. CRS construction.

DOORS

Surface Doors. SD Series doors mount to cabinet frame which are typically used in front-mounting installations where rack-mounted electronics have protruding knobs or when drawers and sliding shelves are utilized. Models provide 1 1/8" clearance from rail and are offered in solid, vented and smoked acrylic plex styling. Doors feature 16-ga. CRS construction and include cylinder lock and recessed handle. (All surface doors are keyed the same.) Doors are equipped with quick-release hinges and removable pins for easy door removal. Customer is required to drill all mounting holes and install the door for right or left-hand mounting. Available in a choice of standard colors. Models SD19 and SDP19 are designed for writing surface applications only and include one 1 1/4" panel (Model S219-1) for closure.

Flush Doors. Models FD19 and 5022-19-FD mount in the panel space opening, flush-to-frame and feature 16-ga. CRS construction, cylinder lock and recessed handle. (All flush doors are keyed the same.) Doors are complete with spring-release hinges for easy door removal. Cabinet is pre-drilled for right or left-hand hinging. Model FD19 is designed for use as a front door under a writing surface and is shipped complete with one 1 1/4" door attachment panel (Model DAP-19) for closure. Model 5022-19FD is typically used as a rear door but may be used as a front door when a writing surface is not required. Please be aware that flush doors are not compatible with drawers and sliding shelves.

EASY-ORDER STANDARD DESK CONFIGURATIONS

DW30 Series. Choose from four desk configurations to create a coordinated work environment with Series VI consoles and Series 5000 cabinets. These attractive work stations use base Model 5022-19-30 with side panels and open front and rear (Series 5000 description on page 86 and 87) for a sturdy and reliable 19" W x 30" D electronic pedestal. Standard configurations are offered with woodgrain writing surface, black finished pedestal frame and legs, two pair of adjustable mounting rails, modesty(?) and side panels are finished in -962 black powder coat. A complete selection of keyboard and pencil drawers, front and rear doors/panels, shelves, leg levelers and casters are available (refer to Functional Add-Ons on page 91).

* Pedestal may be right or left-hand mounted.
 ** Listed panel opening allows 1/16" clearance at top and bottom (1/8" total).

DW30-60P1

FUNCTIONAL ADD-ONS: PANELS

ISOLATION PANEL

ISOPANEL™. The ISOPANEL™ mounts into the bottom or top panel-width opening of Atlas Sound's Series WA100, WA200, WA202, 500 and 502 cabinets. ISOPANEL™ provides a non-conductive mounting surface for interfacing with a building's conduit or other cable tray system. The specially formulated polymer panel reduces the potential for ground situations.

The ISOPANEL™ has three pre-cut openings to accommodate standard 2 1/2" conduit couplings. This allows conduit to be brought into the rack without touching the metal frame. Additional screw holes, which facilitate #8 sheet metal screws are provided for mounting standard 40 electrical covers over each 2 1/2" hole for custom application. Textured polymer material can be worked with common hand tools facilitating field modification. The ISOPANEL™ covers the 3 RU panel opening of specified cabinets, yet uses standard E.I.A. mounting holes to secure to cabinet. Over-sized panel measures 19" L x 6" W (outside dimension).

MODEL	MATERIAL	DIMENSIONS	MOUNTS (top or bottom opening)
ISOPANEL	Polymer	19" L x 6" W	WA100, WA200, WA202, 500, 502 & 503 Series

ISOPANEL

SOLID, PERFORATED & LOUVERED PANELS

General Description. Choose from a variety of panels to enclose unfilled space and to provide aesthetic continuity and security in 19" electronic equipment cabinets. Solid, perforated, and louvered models offer dust protection and heat ventilation. All models include oblong mounting holes on E.I.A. universal spacing for adjustment flexibility. Units are finished in black as standard.

SEC Series Security Covers. Designed to eliminate unauthorized operator tampering to rack mount equipment such as equalizers and rack mount mixers. 22-gauge construction features fine perforated steel insert for good visibility. Unique radiused corners provide a professional looking installation. Formed edges protect equipment from scratches. Available in 1U to 3U heights.

CB SERIES. Economy solid steel panels are constructed of #14 steel finished in attractive -052 flat black electrostatic powdercoat.

A19 Series. Solid aluminum panels for 19" wide electronic equipment cabinets are constructed of 1/8" (3mm) thick aluminum.

S19/S219 Series.* Solid 16-ga. CRS blank panels are available in a selection of recessed and flush mounting models. S19 Series has formed returns on panel top and bottom for recessed installation. S219 Series are formed on all four sides to exhibit a flush-to-frame appearance.

SVP19/SVP219 Series.* Perforated 22-ga. CRS vent panels provide for natural air circulation and dissipation of equipment generated heat. SVP19 Series is formed on panel top and bottom for recessed installation. SVP219 Series is formed on four sides to achieve a flush-to-frame appearance.

RECESSED & FLUSH STORAGE DRAWERS

SD/SD-FP Series. Recessed and flush mounting drawers are offered in multiple panel space sizes and a choice of full or partial extension lengths to accommodate tapes, discs, microphones, tools and accessory items. The 16-gauge CRS drawers mount into 19" cabinets come complete with slides, having hold-in detents and 100 lb.-rated steel ball bearing rollers. Textured smooth finish. (Recessed drawers are ideal for use with 300/320 Series wall cabinets.) Width of all models is 16 1/2" (inside).

SOLID ALL-PURPOSE SHELVES

SH19-5/SH19-7. Economical all-purpose shelves for 19" cabinets are available in two panel space sizes to provide convenient mounting of electronic equipment that does not have an attached rack mount panel. Both models are 14" deep for standard depth cabinets and can be secured using a single pair of front mounting rails. Shelves are 16-gauge CRS and include mounting holes on E.I.A. standard spacing, mounting and assembly hardware.

SH503. Extra-depth shelf is similar to the SH19-5/SH19-7 models listed above except that it was designed to accommodate equipment mounted in extra-depth cabinets. Model SH503 is 20" deep.

PCD3-16

FUNCTIONAL ADD-ONS: SHELVES & DRAWERS FOR SERIES 5000, VI & VII

Please note: Series 5000, VI & VII can also mount the "Shelves & Drawers for 19" Cabinets."

HEAVY-DUTY SHELVES

SH2000 Series. Sturdy shelves attach to cabinets that are equipped with front and rear mounting rails to provide dependable support for heavy equipment installations including large power supplies, amplifiers, video tape recorders, computers and control systems. One-piece units are 16-gauge CRS and include oblong mounting holes and choice of standard colors and finishes. Shelves mount behind "Z" rails.

SLIDING SHELF/TRAY FOR CABINETS WITH FRONT & REAR RAILS

VTD16. Versatile shelf provides easy access to keyboards, video tape recorders and control equipment. Solid bearing slides extend to a full 17" outside of cabinet rails with lock-out protection. Dual-purpose design may be used right-side up as a shelf or upside-down as a tray with a protective lip according to desired application. Model mounts 19" cabinets (18 1/2" to 25 1/2" deep) equipped with front and rear mounting rails. Load bearing capacity is 85 lbs. Constructed of 16-gauge CRS and finished in standard black.

SUPPORT ANGLE BRACKETS

SA-25/SA-30. Use these versatile "L" brackets to support electronic equipment when a solid shelf is not required or when obstructed air circulation is a concern. Brackets span the vertical rails front-to-back to provide additional or initial support for heavy equipment. Model SA-25 mounts 25 1/2" deep cabinets; Model SA-30 mounts 30" deep cabinets. Both models are constructed of 11-gauge CRS with slotted cutouts. Finish is standard black.

SA-25

COMPUTER KEYBOARD DRAWER FOR SERIES VII DESKS

DW-KB. Convenient keyboard drawer is offered for use with Series VII desks. Unit mounts under desk writing surface and will accommodate keyboards up to 19 3/8" wide and features an open front with a 2" D arm rest. The keyboard area is recessed 3/8". Drawer will extend 10" from the closed position with lock-out protection. Manufactured of 18-gauge CRS. Drawer includes slides with hold-in detents and 100 lb.-rated steel ball bearing rollers.

WALL-MOUNT SHELF/ENCLOSURE SYSTEM

WME150. The new, extremely versatile six-piece Wall-Mount Shelf/Enclosure System unit is easy to assemble in a variety of configurations (in utility closets and anywhere space is at a premium). The Six piece set is shipped flat and can be easily assembled with common tools. In the two shelf configuration with the supporting side panels, the wall-mount shelf can be used for a wide variety of equipment with a locking door or top. It can be configured as a locking enclosure with two shelves or as a two-shelves-open enclosure, with the two remaining panels used with additional side panels (sold separately) to making a second open shelf unit. Construction is 16-ga. CRS and finished in neutral white.

MOUNTING RAILS

RT-5000 Series. Mounting rails are comprised of; 11-ga. CRS zinc-plated with tapped front and side panels; 10-32 on E.I.A. spacing (⁵/₈"-⁵/₈"-¹/₂" continuous centers). Rails are sold in pairs and will mount with Series 5000 cabinets, Series VI consoles and Series VII desks. Shipped with mounting bolts and slide nuts. Order panel hardware separately; HK-40 has chrome screws/plastic washers, HK-40SB has black screws/plastic washers.

FUNCTIONAL ADD-ONS: GENERAL

CASTERS

CS-5PR.* These 3" dia. swivel casters mount easily to cabinets with pre-installed caster plates. Casters are zinc-plated and include black, non-locking hard-tread wheels. The load-bearing capacity is 125 lbs. each. Sold in pairs. Fits 5000 Series and Series VI.

CS-8PR. Locking 3" diameter swivel casters mount easily to cabinets with pre-installed caster plates. Units have a load-bearing capacity of 125 lbs. each and are sold in pairs. Casters are zinc-plated and include black, hard tread wheels. Each rack requires four casters (2 pairs).

CS-HDPR.* Heavy-duty, 2½" dia. non-locking swivel casters have a load-bearing capacity of 255 lbs. ea. and will mount Series VI consoles and Series V cabinets equipped with integral caster plates. Units are zinc-plated and include black, hard-tread wheels. Sold in pairs.

CS-LDPR. Smooth-riding, 2" twin-wheel casters are rug-acceptable and ideal for supporting 800 Series open racks and Series VII desks. Units provide a load-bearing capacity of 75 lbs. each and install into ¾"-16 threaded stem. Finish is black.

CT-7. Four-caster replacement set for Model CT1020 roller truck includes one pair of locking swivel and one pair of rigid casters with 125 lb. load-bearing capacity each.

ROLLER TRUCK & CASTER KIT ACCESSORIES

CT1020. Heavy-duty, welded 16-ga. CRS roller truck provides mobility for 19" W x 18½" D cabinets. Unit is designed for single-bay use and has one pair rigid and one pair locking 3" swivel casters. Finish is black.

CT-500K. Caster kit provides mobility to 19" W x 18½" D WA100, WA200, and 500 Series cabinets in single or multi-bay installations. Kit includes four swivel 2" dia. twin casters (two non-locking and two rigid) and two 17" L brackets with hardware.

CT-5020K. Caster kit provides for caster installation onto 19" W x 25½" D cabinets in single or multi-bay installations. Kit includes four, non-locking, 2½" dia. casters and two, easy-to-install, 25" L mounting/supporting brackets. Model accommodates the 25½" D WA202 and 502 Series cabinets.

CT-5030K. Caster kit for 19" W x 30" D Series 503 is similar to the CT-5020K model with a longer mounting bracket.

SLIMLINE AC POWER PANELS FOR 19" CABINETS

ACRL-191A. ACRL series is equipped with a lighted, front-mounted rocker switch. It includes a re-settable 15-amp circuit breaker on the front panel with six switched and two unswitched outlets located on the back chassis. ACRL-191A has internal pigtail leads. It includes a removable rear wiring panel with E.O. connector/strain relief. Front panel is 16-ga. CRS and formed on two sides for recessed mounting. Finish is black epoxy.

ACRL-191B. The ACRL-191B retains all features of the ACRL-191A with the addition of a un-switched outlet on the front panel and a 6' factory installed power cord. A removable rear access panel is provided to allow the unit be hard-wired for permanent installation. UL Listing Pending. Available July 2002

ACRL-291. The ACRL-291 includes eight switched rear panel outlets plus one front panel un-switched outlet. A pull-out light bar is included on both the front and rear panels of the unit to provide illumination to both the front and rear of the rack. A 15 amp re-settable circuit breaker is located on the front panel for easy access. A 6' power cord is factory installed however a removable access panel and instructions are provided in the event the unit is to be hard-wired with conduit for permanent installations. UL Listing Pending. Available July 2002.

MODEL	PULLOUT LIGHTS	PANEL & SWITCH RATING	OUTLETS SWITCHED	OUTLETS UNSWITCHED	DIMENSIONS

RACK WORK LIGHT

RWL-1. Portable lamp with wide light diffusion provides illumination of interior rack spaces. Supplied with a "non-mar" magnetic mount, 3-wire grounded AC outlet, on-off switch, high impact clear polycarbonate lens, two 10 watt incandescent lamps (one for replacement) and six-foot power cord. Assembly is 18 and 22-gauge CRS. Standard finish is flat black epoxy.

MODEL	SIZE	WEIGHT
RWL-1	4 3/4" H x 3 3/16" W x 2 3/4" D (121 x 81 x 70mm)	1.48 lbs.

19" MONITOR PANELS

MVXA-2008/MVXA-2016. Atlas Sound's MVXA monitor panels (patent pending) are active devices for aural and visual monitoring, from eight or sixteen different speaker and line level circuits in any combination. Each input is individually selectable using an easy-to-position jumper. Units offer superior performance with easy visual assessment in an ultra-thin single rack space chassis. Twelve segment LED bar-graphs provide 33dB of resolution and monitor any combination of line level (1V reference) —25Vrms, 70Vrms and 100Vrms simultaneously. The bottom ten LEDs are green and have a VU ballistics response. The two red LEDs at the top of the bar graph are peak to provide instantaneous level indication. LED meter sensitivity is -30dB to +30dB. Units offer the capability to aurally monitor individual channels via an internal speaker, headphone jack, line level output to external amplifier or 3 watt high-fidelity output to an external speaker. Panel functions include a channel selection knob, channel audible monitoring level control and headphone jacks. External power supply is UL Listed. Unit weight is 7 lbs. (3.2 kg).

MXVA-2016	1	16				1 3/4" x 19" x 9 1/2"

19" MONITOR PANELS – (CONT'D)

MVX Series. Designed for economical multi-channel system applications that require quality aural and visual monitoring. Models are available with choice of loudspeaker and VU meter for 25 or 70.7-volt systems. To enable monitoring of up to five program channels, all units include a 6-position, double-pole switch with a positive "off" position and a volume control for adjusting the level of the monitor loudspeaker. Each monitored circuit connects to two rear-mounted screw terminals. Front panels are 16-ga. CRS, finished in black. Potentiometers and channel selectors are rear mounted with white nomenclature. VU meters are of moving coil design and include type "A" meter scale and protective thermoplastic cover.

MVX-195

SEQUENTIAL SWITCH SYSTEM

SACR/SACS Series. Prevents high, "in-rush" currents which can damage drivers and sensitive electronic equipment. System applies power to system components in desired time-delay sequence to minimize the potential for tripped circuit breakers, blown fuses and voltage spikes. Ideal for large sound reinforcement systems, electrical and electronic systems/controls and any signal chain that requires sequential power up and power down. System is comprised of a six-circuit sequencer controller with remote start switch (use momentary switch only) terminals, external power supply (included) and choice of outlet strips with six or one circuit in regular and isolated ground versions (order separately). Models SACR-191 and SACS-5(F) are finished in black epoxy. Model SACS-1(F) is finished in neutral gray. For wiring information, request manual #227385.

AC OUTLET STRIPS

ACS-1/ACS-1A/ACS-2A. Outlet strip includes six grounded duplex outlets for installation in equipment cabinets with vertical panel space greater than 36 3/4". May be used in conjunction with Atlas Sound fan assemblies and power panels to provide a complete cooling and AC power distribution system. Includes hardware. Finished in black epoxy. Dimensions are 36 3/4" L x 2 3/8" W x 1 1/2" H.

RAC-5(B)/RAC-9(B). Slimline outlet strips provide convenient electrical access without utilizing valuable cabinet space. Compact housing installs between cabinet side panel and mounting rails to the horizontal frame. Housings are finished in black epoxy. Dimensions for the RAC-5 models are 16 1/2" L x 1 1/2" W x 2" D. RAC-9 models measure 24 1/2" L x 1 1/2" W x 2" D.

FAN PANELS FOR EXHAUST COOLING IN 19" CABINETS

ES Series. Recessed and flush fan panel assemblies dissipate equipment-generated heat quickly from 19" cabinets. Front/rear and top loading assemblies are available in single and dual fan models with 115 CFM fan speed for flush and recessed mounting. The ES195 Series is for recessed mounting; the ES2195 Series is designed for flush mounting. Models are complete with fan(s) protected by nickel chrome plated wire grille backed with a steel wire mesh screen assembled to a 16-gauge CRS panel. Panels mount easily to all E.I.A. standard mounting rails and are stocked in standard black finish. Fans are factory-mounted for exhaust cooling and may be rotated easily, in the field, for intake cooling. A 6 ft. line cord is included. When mounting ES Series fans on top of Series 5000 cabinets, order S219 blank panels to fill the opening [21" (12RU) for the 25½" D cabinets; 24½" (14RU) for the 30" D cabinets].

HORIZONTAL FAN TRAYS FOR 19" X 25½" CABINETS

CFM Series/CFT-0. Modular, space-efficient series requires only one rack panel space and allows direct equipment cooling for specific heat source areas. Fan tray frame Model CFT-0 will accept up to three CFM Series fan module units with 1 to 3 fans each (9 fans maximum). Frame and fan modules are ordered separately for task-oriented cooling flexibility. Frame mounts directly to the front and rear mounting rails of: Series 202, 502, and 5000 cabinets; Series VI consoles (base model only); and Series VII desks. High-quality 115 CFM fans provide rapid and quiet heat dissipation. Quick connect plugs allow simple and expedient field servicing for adding to or changing fan pattern arrangement. Units are finished in standard black and include a six-foot line cord. All CFM Series modules require the CFT-0 fan tray frame for installation.

TOP-MOUNTING TUBEAXIAL FAN FOR SERIES 5000

EFT Series. Powerful cooling assemblies are top-mounting fan panels which provide quiet and effective dissipation of heat, for equipment mounted in 25½" and 30" deep Series 5000 cabinets. Space-efficient units require no vertical panel space and deliver 550 cfm with a 100 diameter tubeaxial propeller fan. Series operates at 115VAC, 60 Hz and includes a continuous-duty, shaded-pole type motor, sealed ball bearings, and chrome plated finger guards. Assemblies include an automatic reset thermal protector and six-foot line cord with molded plug mounted to a 16-gauge CRS panel finished in standard black.

FILTERED INTAKE BLOWER FOR 19" CABINETS

BP195--320. Updated intake blower panel is equipped with stronger fans delivering 320 CFM and provides exceptional ventilation and cooling for equipment mounted in 19" cabinets. The air flow is directed to the rear of the cabinet for improved circulation. Model BP195-320 incorporates a washable and easily removable filter. Model operates at 115 VAC, 60 Hz and contains two 7" tubeaxial fans, each with its own ball bearing motor. A 44" power cord is furnished. Unit is mounted within a 17" W x 13.7" D enclosure with a 19" W x 5½" H grille. Mounting is secured to stud via two captive nuts. Aluminum mesh filter slides into formed channels for easy removal and cleaning. Enclosure is finished in black. Face plate grille is polished chrome. Note: replacement filter Model FLT 195-320 is offered. Order separately.

FAN THERMOSTAT

CFT-125. Unit provides ventilation control of fans and other cooling equipment. Thermostat includes an automatic shut-off feature and a special 3-wire extension cord with series plug for automatic operation. Use the thermostat knob to make temperature adjustments at dial settings from 50° to 100° F. The CFT-125 is UL- and CSA-listed.

ATLAS ADVANTAGES

- Steel tubing is finished in a choice of mirrored chrome or non-reflective ebony*
- Anti-vibration cap absorbs incidental vibrations and sounds*
- Lock-nut ring securely positions tubing to base*
- Atlas Sound stands are threaded 5/8"-27 and include a lock-nut ring for versatile positioning of accessories*
- Famous Atlas Sound clutch won't slip under pressure*
- Bases are high-stability cast metal equipped with shock absorbing rubber pads*

Atlas Sound floor stands are made to last! Quality design and over 60 years worth of performances —on stage and off—offer proven reliability you can depend on. The fact is they're simply built better.

ALL-PURPOSE FLOOR STANDS

MS-10C/MS-10CE. Cost-efficient assemblies are the most frequently purchased stand throughout the world for dependable performance in music, entertainment, business, education and social functions. MS-10C includes chrome finished tube and circular cast iron base. MS-10CE is supplied with ebony finished tube and circular cast base.

PROFESSIONAL FULL-HEIGHT STANDS

MS-12C/MS-12CE. All-purpose stands feature wearproof clutch for quick height adjustment and a high-stability, low profile cast base. MS-12C consists of chromed tube and ebony base. MS-12CE features ebony finished tube and base.

FULLY ADJUSTABLE THREE-SECTION STANDS

MS-4/MS-4E/MS-43/MS-43E. Versatile stand adjusts from 25" to 65" to meet the needs of seated and standing instrumentalists and performers. Model includes three-section chromed tube assembly (MS-4/MS-3) or ebony tube (MS-4E/MS-43E) with two wearproof clutches for optimum vertical height adjustment and high stability. All models feature a low-profile cast iron base finished in ebony. The MS-4 Series base has a diameter of 10" and weighs 6 lbs. The MS-43 Series base is 12" in diameter and weighs 8 lbs.

EXTRA-STABILITY STANDS WITH OVERSIZED BASE

MS-20/MS-20E. Heavy-duty stands for studio, recording, church, and school application include an extra-height 1 1/2" diameter tube assembly with wearproof clutch, top adapter, and low contour high-stability cast iron base. MS-20 features chromed finish tube and ebony base. MS-20E includes ebony finished tube and base.

STUDIO STANDS WITH AIR SUSPENSION SYSTEM

MS-25. Heavy-duty studio recording stand features 1 1/2" diameter chromed tube assembly with integral air suspension system to protect sensitive microphones. Triangular cast base includes sculptured sides, ebony finish and decorative chrome cover.

PERFORMER SERIES TRIPOD STANDS

TL34-15E

TWO- AND THREE-PIECE TRIPOD STANDS

TL34E. Top-of-the-line Performer Series tripods (U.S. Patent # 5,340,066) feature a durable, all-metal housing with a unique double-cam locking device and Glide'n Lock legs for secure positioning and convenient transportation/storage. Units also include the wearproof Atlas Sound clutch to withstand years of stage and studio handling, as well as high-density rubber feet to reduce mechanical noise to the microphone. Tube assemblies are manufactured of CRS and terminate in the standard $\frac{5}{8}$ " - 27 thread pattern. Finish is non-reflective ebony epoxy.

TRIPOD/BOOM COMBINATIONS

TL34-BBE/TL34-15E/TL34-21XE. For maximum miking ease and portability, choose tripod/boom stands with everything in one. Packages include the patented Performer Series tripod with CAD engineered base, 2-piece adjustable tubing (34" - 63"H) and Glide'n Lock legs matched with an economy boom. Model BB-77E (34"L) or Performer Series Boom Model PB15E (34"L) pr PB21XE (25 $\frac{1}{4}$ " - 38 $\frac{1}{2}$ "). Both Performer Series booms feature the patented all-metal swivel clamp with Glide'n Position tubing, nylon brake bushings and wool washers; a $\frac{3}{4}$ lb. counterweight for balance; and steel T-bar knob for no-fail locking. Tripod/boom assemblies are finished in ebony epoxy.

MUSICIAN SERIES TRIPOD STANDS

TE-E

TEB-E

TE28

ECONOMICAL TWO-PIECE TRIPOD & TRIPOD/BOOM STANDS

Atlas Sound's next generation of Musician Series tripods are lightweight, styled stands that offer the fit and feel of tripods costing considerably more.

TE-E. This All-purpose tripod. The full height stand extends from 37" to 65" and includes an all-new three-piece clutch design with a highly durable metal barrel. Tripod legs attach to a metal retainer assembly that includes a thumbscrew/brake system to provide secure positioning and prevent tube marring. Tube assemblies are durable CRS construction terminated in the industry standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 5 $\frac{1}{2}$ lbs.

TEB-E. Tripod/boom combination features the BE-E removable, telescopic boom to provide microphone extension from 24" to 39". It includes a molded plastic handle, metal swivel clamp with protective rubber inserts and an easy-grip knob for vertical alignment. Adjustment for the main and extension boom include a thumbscrew/brake system to provide secure positioning and prevent tube marring. Tube assemblies are manufactured of CRS and terminate in the standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 7 $\frac{1}{2}$ lbs.

TE28/TE28E. Musician Series tripods are lightweight (4.0 lbs.), professionally styled stands that offer the fit and feel of tripods costing considerably more. Their general-purpose, full-height design extends from 35" to 60". The two-piece clutch with protective insert provides secure and scratch-free positioning. Easy-locking legs tighten with a single motion for fast set-up and teardown. Tube assemblies are manufactured of CRS and terminate in the standard $\frac{5}{8}$ " - 27 thread pattern. Finish is chrome or satin ebony (E) as noted.

TE16-B. Musician Series tripod/boom stands feature the same lightweight, professional styling as the TE28 Series tripods (described above) with the addition of a factory-attached, fixed-length adjustable boom. Boom attachment provides microphone extension up to 25 $\frac{1}{2}$ " and includes a molded plastic handle and swivel clamp. Swivel includes a protective insert for secure and scratch-free horizontal positioning and an easy-grip knob for vertical alignment. Tube assemblies are manufactured of CRS and terminate in the standard $\frac{5}{8}$ " - 27 thread pattern. Total weight is 4.75 lbs. Finish is chrome.

ECONOMICAL STUDIO BOOM

SB-11WE. Economical studio boom is especially suited for small studio/broadcast applications and for stage miking of drums and percussion instruments. Unit features a 60" L, two-piece horizontal boom assembly. Boom includes a Performer Series swivel clamp and an adjustable 2 lb. counterweight for effortless boom arm orientation. Tubing incorporates a 90° angled end for optimum microphone positioning and terminates in the standard 5/8" - 27 thread pattern. Stand features an Atlas Sound wearproof clutch for positive locking control. Triangular die-cast base offers extra stability and is equipped with hard rubber swivel casters for effortless and silent mobility. Finish is non-reflective ebony epoxy.

PROFESSIONAL STUDIO BOOM WITH AIR SUSPENSION SYSTEM

SB-36W. Heavy-duty stand for stage and studio application include integral piston-type air suspension system for effortless height adjustment and microphone protection. Model is equipped with a two-piece horizontal chromed-tube assembly, adjustable 6 lb. boom counterweight, heavy-duty gyro-matic swivel, Atlas Sound wearproof clutch and triangular cast iron base. SB-36W includes silent-motion, ball-bearing swivel casters of hard rubber for friction-free and vibration-absorbing mobility. Tubing terminates in the standard 5/8" - 27 thread pattern, and supplied with guide clips for microphone cable attachment. Tubing is finished in chrome; base is ebony epoxy with a chrome cover.

INSTRUMENT MIKING STANDS

LOW-HEIGHT ADJUSTABLE STANDS

DMS-7(E)/DMS-10(E). Low-profile stands with high-stability cast base are ideal for professional drum miking applications. All feature adjustable-height tubing and the famous Atlas Sound clutch for precise orientation and a 10" dia. cast iron base for dependable positioning and isolation from drum vibrations. Models DMS-7(E) combine a floor-stand base with desk-stand height—ideal for kick-drum miking. DMS-10(E) are taller versions, ideal for miking toms and larger guitar amps. All include a threaded tip assembly for compatibility with microphone clamps, goosenecks, and booms. (Mini-adjustable boom Models PB11X(E) are great companions.) Units are finished in chrome or ebony epoxy (E) where noted.

PERFORMER SERIES BOOM ATTACHMENTS

PB11XE

PB15/PB15E

PB21X/PB21XE

GENERAL DESCRIPTION

Performer Series booms are manufactured in the U.S., to the highest quality standards and combine exceptional styling with a unique, all-metal swivel clamp (US patent # 354,491) for greater user flexibility. Clamp features Glide'n Position tubing with nylon brake bushings for smooth horizontal adjustment. Resilient washers are made from compressed virgin wool fiber (in lieu of rubber) to offer quiet and secure positioning even after years of use. Extra-strength, steel T-bar knob assures no-fail locking with simple one-hand adjustment in the vertical plane. All versions include counterweights for increased balance and stability. All clamps are finished in non-reflective ebony epoxy. Tubing is manufactured of CRS and terminates in the standard $\frac{5}{8}$ " - 27 thread pattern.

MINI ADJUSTABLE BOOM

PB11X/PB11XE. Compact booms extend from 16 $\frac{1}{4}$ " to 24 $\frac{1}{2}$ " with a single motion—perfect for drum/piano/guitar amp and short distance miking. Units include a threaded end cap and a fixed $\frac{3}{4}$ lb. counterweight for stability. Finish is chrome or ebony epoxy (E) where noted.

FIXED-LENGTH BOOMS

PB15/PB15E. All-purpose, high-quality booms are 34" long and include fixed $\frac{3}{4}$ lb. counterweights for stability. Select from chrome or ebony epoxy (E) finish as noted.

EXTENDABLE-LENGTH BOOMS

PB21X/PB21XE. Booms extend from 25 $\frac{1}{4}$ " to 38 $\frac{1}{2}$ " with a single motion and are suitable for a wide variety of miking applications. Units contain a fixed $\frac{3}{4}$ lb. counterweight and threaded end cap. Finish is chrome or ebony epoxy (E) as noted.

MODEL	LENGTH	TUBE FINISH	WEIGHT	SWIVEL	COUNTERWEIGHT
PB11X	16 $\frac{1}{4}$ " to 24 $\frac{1}{2}$ "	Chrome Plated	2.0 lbs.	Threaded	Fixed, $\frac{3}{4}$ lb.

PB21XE	25 $\frac{1}{4}$ " to 38 $\frac{1}{2}$ "	Ebony Epoxy	2 $\frac{1}{2}$ lbs.		Fixed, $\frac{3}{4}$ lb.

TRADITIONAL BOOM ATTACHMENTS

BE-E

BB-77E/BB-77

BB28XE/BB28X

GENERAL PURPOSE FIXED-LENGTH BOOMS

BE-E. This versatile, low-cost boom features adjustable-length positioning for extended mic range applications. The two-piece boom extends 24" - 39". Includes a molded plastic handle, metal swivel clamp with protective rubber insert, and an easy-grip knob for vertical alignment. Adjustment for the main and extension boom includes a thumbscrew /brake system to provide secure positioning and prevent tube marring. Tube assemblies are manufactured of CRS and terminate in standard $\frac{5}{8}$ " - 27 thread pattern. Satin ebony (E) finish. 2 lbs.

MODEL	LENGTH	TUBE FINISH	WEIGHT	SWIVEL	COUNTERWEIGHT
BE-E	24"-39"	Satin Ebony	2 lbs.	Threaded $\frac{5}{8}$ " - 27	None

BB-77/BB-77E. Basic, multi-purpose 34" boom features a fixed $\frac{3}{4}$ lb. counterweight, thread-on die cast swivel, single-action positive locking, and new easy-grip knob for positioning control. Ideal for application with floor stands or accessory components. Model BB-77 has chrome finish tubing; BB-77E is finished in non-reflective ebony epoxy.

MUSICIAN SERIES EXTENDABLE-LENGTH BOOMS

BB28X/BB28XE. Versatile, general-use boom features adjustable-length positioning for extended microphone range applications. Two piece boom extends 18" to 37" and is equipped with a molded plastic swivel-clamp threaded $\frac{5}{8}$ " - 27. Swivel includes a protective insert for secure and scratch-free horizontal positioning and an easy-grip knob for vertical alignment. Model BB28X is finished in chrome; BB28XE is satin ebony.

MODEL	LENGTH	TUBE FINISH	WEIGHT	SWIVEL	COUNTERWEIGHT
BB28X	26 $\frac{1}{4}$ " - 38 $\frac{3}{4}$ "	Chrome Finish	1.5 lbs.	Threaded $\frac{5}{8}$ " - 27	None

BB-77E	34"	Ebony Epoxy	3.0 lbs.	Female Mount	Fixed, $\frac{3}{4}$ lb.

LIGHTWEIGHT ADJUSTABLE STANDS

SS500E. Designed for easy transportability, set-up and tear down, the new heavy-duty Model SS500E aluminum speaker stand weighs a mere 7 lbs. and supports up to 150 lbs! Additionally, the stand folds to a minimal 53" making it a great portable stand for use in churches, schools, and theaters. Height adjusts from 54" to 85" for versatile positioning and support of sound, monitor, and control equipment. The SS500E is equipped with a positive clamping system complete with a safety support pin to assure safe, slip-free support of elevated equipment. Vertical tube assembly contains 1½" and 1⅝" tubing. Clutch mechanism includes a protective insert for scratch-free height adjustment. Legs are double braced and include heavy-duty rubber feet for extra stability.

SS33E. Musician Series heavy-duty aluminum speaker stand supports up to 150 lbs. Its lightweight frame weighs a mere 6.3 lbs. for easy transportability, set-up, and teardown. The stand folds to a minimal 43" making it a great temporary stand for use in churches, schools and theaters. Height adjusts from 48" to 85" for versatile positioning and support of sound, monitor, and control equipment. Model is equipped with a positive clamping system complete with an air-damped safety release to assure slip-free support of elevated equipment. Vertical tube assembly contains 1½" and 1⅝" tubing. Universal platform style top adapter Model SSA-7 (order separately) is offered to mount a variety of equipment sizes and configurations. Finish is satin ebony.

DESK AND BANQUET STANDS

VIBRATION ISOLATING STAND

DS-2. Low-silhouette stand features an integral tension mount to reduce conductivity of external mechanical vibrations. High-stability metal base with protective pads includes notched area for convenient placement of cards or pens. Fixed-height tubing is chrome finished. Base is ebony.

GENERAL PURPOSE STANDS

DS-5/DS-5E. Fixed-height stands include traditional, circular cast iron base and choice of tubing finish: chrome or ebony (E) as noted. Stands are suitable for application with any standard microphone.

ADJUSTABLE STANDS

DS-7/DS-7E. Versatile stands have a vertical height adjustment from 8" to 13" and include wearproof clutch and ebony finish cast iron base. DS-7 features chromed tubing; DS-7E has ebony tubing.

CONTEMPORARY STAND

DS-14. Stand includes die-cast wishbone shaped base with ebony finish and fixed-height chrome tubing.

MODEL	HEIGHT SPAN	BASE SIZE	BASE STYLE	TUBE FINISH	BASE FINISH

MIC STAND ACCESSORIES

GOOSENECK FLEXIBLE EXTENSIONS

GN-6(E)/GN-13(E)/GN-19(E). Flexible goosenecks in 6", 13" and 19" lengths attach to any mic stand or adapter with $\frac{5}{8}$ " - 27 male and female threads. Inside dia. is .338". Chrome or ebony (E) finish.

CLIP-MOUNTING MICROPHONE ACCESSORIES

LO-2B(E). Lock-On accessory, respectively, allow fast connection and disconnection of plastic mic clamp holders and boom attachments with $\frac{5}{8}$ " - 27 threads for safe transportation. Available in chrome or ebony (E) where noted.

TM-1(E). Versatile mic mount for live sound and stereo recording. Mounts two or three mics onto any stand. Unit is 8 $\frac{3}{4}$ " wide and fits mic clamps with $\frac{5}{8}$ " receptacles. Available in chrome or ebony (E).

US-2. Flange-mounting, multi-purpose mic support includes 12 $\frac{3}{4}$ " L boom on a spring-loaded swivel with 180° vertical cable feed-thru. Mounts mics to lecterns, consoles, tables and desks. Chrome finish.

VM-2. Durable shock-mount accessory reduces external mechanical vibration pick-up. Die-cast unit can be left on a stand during transit unlike similar plastic accessories. Fits $\frac{5}{8}$ " - 27 threaded mics and mounts between the top tube of a $\frac{5}{8}$ " - 27 threaded stand and the mic clip. Chrome finish.

MULTI-PURPOSE CLAMPS

BC-1. Bracket-style surface clamp with 6" high chrome tube attaches to tables, desk, keyboard stands, and countertops for mounting mic and accessory items with standard $\frac{5}{8}$ " threads.

CO-1B. Connect-on swivel adapter/clamp provides for the addition of a second mic with standard $\frac{5}{8}$ " - 27 threads to any floor or desk stand with $\frac{5}{8}$ " or $\frac{7}{8}$ " dia. tubing. Ebony finish.

MAC-1. Multi-use adapter/clamp holds mics, booms, or accessories having $\frac{5}{8}$ " - 27 threads in vertical or horizontal orientation. Versatile unit also clamp mounts to $\frac{3}{8}$ ", $\frac{1}{2}$ " and 1 $\frac{1}{8}$ " dia. tubing or to free-standing instruments, keyboards and drums. Made of high-strength extruded aluminum. Ebony finish. Weight: 1.5 lbs.

CABLE/TAMBOURINE HANGERS & CABLE FEED-THRU ADAPTER

CH-1B(E). Versatile accessory can be used to hang cabling or a tambourine. Single screw-mounting assembly fits all tube assembly sizes. Available in chrome or ebony (E).

AD-15B. Chrome 4" cable feed-thru adapter with standard $\frac{5}{8}$ " male and female threads.

COUPLINGS USED WITH TUBE EXTENSIONS & ACCESSORIES

AD-4B	3/4" long, 5/8" - 27 male running thread; brass, no plating
AD-5B	5/8" - 27 female to 5/8" - 27 female coupling; chrome plated
AD-6B	7/8" female to 7/8"-27 female coupling; chrome plated

SURFACE-MOUNTING FIXTURES

AD-11B(E)	5/8" - 27 female flange with 1 3/4" base diameter; chrome or ebony (E)
AD-12B(E)	5/8" - 27 male flange with base holes on 1 1/4" centers; chrome or ebony (E)

TUBE EXTENSIONS USED WITH COUPLING ADAPTERS

AD-7B	3" long tube with 5/8" - 27 male at each end; chrome plated
AD-8B	6" long tube with 5/8" - 27male at each end; chrome plated
AD-14B	Right angle tube with 5/8" - 27 male and female end; chrome plated; 4" H x 4" Ext.
AD-19B	45° angle tube with 5/8" - 27 male and female end; chrome plated; 6" H x 3" Ext.
TB-58X	Adds 31" of height or length to any 5/8" tube; required AD-5B adapter
TB-78X	Adds 31" of height or length to any 7/8" tube; requires AD-6B adapter

REPLACEMENT KITS

REPLACEMENT KITS

Another great advantage of Atlas Sound stands is that you can make minor repairs and refurbishments over the years. Atlas Sound is one of the few manufacturers who sells replacement parts for its stands. Contact factory for details.

MSC-K
Clutch Replacement Kit

1000 SERIES LOUDSPEAKERS

1012 & 1015

The 1012 and 1015 speaker models each feature a 2" x 6" high frequency horn to provide a full 90° of horizontal coverage. This horn accurately reproduces high frequencies and provides improved off-axis intelligibility. The Atlas Sound Power Sentry™ high frequency protection circuitry is included to protect the high frequency driver from damaging transients. The Power Sentry actually compresses the damaging parts of the audio signal, while passing through the dynamics that give the music its richness and character.

The Woofer features 1½" to 2" high temperature voice coils on Black Kapton formers. The motor structure is oversized, made of durable strontium ferrite material. Vented pole pieces on the woofers keep them cooler; extended pole pieces provide a very linear speaker movement, for enhanced power handling capabilities at high sound pressure levels.

The dual 10 degree trapezoidal shape reduces internal standing waves which can color midbass/midrange frequencies.

The full-face protective grille looks unique, and the curved shape adds strength. The grille material is a rugged 19 gauge cold-rolled steel and we designed the grille mesh with a 65% open area so you get maximum protection, with minimum sonic effect. Even the corners are oversized. Heavy-duty handles are ergonomically located for carrying comfort. Rugged, interlocking corner pieces allow for easy cabinet stacking. A 1½" pole mount cap is included for use with a speaker stand such as the Atlas Sound SS33E or an optional subwoofer such as the Atlas Sound 20115S.

2000 SERIES LOUDSPEAKERS

2012, 2015 & 20215

The 2000 Series features a 90° x 90° Constant Directivity horn coupled to a 1" Compression driver. This design ensures superior off-axis coverage and improved vocal clarity and projection. And, for greater control over the high frequency response, we have included a variable horn attenuation circuit. This circuit allows you to tailor the high frequency response for the venue. The 2000 Series features the Atlas Sound Power Sentry™ high frequency protection circuitry.

The Woofer features 2" to 2½" high temperature voice coils on Black Kapton formers. The motor structure is oversized, made of durable strontium ferrite material. Vented pole pieces on the woofers keep them cooler; extended pole pieces provide a very linear speaker movement, for enhanced power handling capabilities at high sound pressure levels.

The 2000 Series features the same cosmetics and construction as the 1000 Series.

Low frequency reproduction is enhanced by using, multiple, smaller woofers. For comparison, by using (2) 8" drivers in the 2028, output is greater than a single 12" woofer. Respectively, using (2) 10" woofers in the 20210 provides more output than a single 15" woofer.

The 2028 and 20210 monitors feature a unique design. By mounting the (2) woofers horizontally with the high frequency driver centered on the horizontal plane, we create an effect we call, Targeted Dispersion Pattern. This means that the program material is focused at the performer. This reduces off-axis output that can bleed into other microphones, minimizing the need to lower the volume on your monitor system to avoid embarrassing feedback problems. Since this configuration is perfectly symmetrical, the performance is equal whether standing center, slightly left or right of the monitor.

MULTI-FUNCTIONAL ENCLOSURE

The 2028 and 20210 enclosures are constructed of High Density Polyethylene (HDPE). This material offers the sonic characteristics and strength of wood, yet increases durability and long lasting cosmetic integrity. This material also gives us much more flexibility in shape over a traditional wood enclosure. For instance, the cabinet is formed to provide dual throw angles of 25° and 45° for best placement and coverage regardless of stage dimensions. Also, since transportation space is always an issue, the small footprint and low weight makes these monitors a perfect selection for any mobile application.

MODEL	2028	20210
Type	Stage Monitor	Stage Monitor
Power Handling RMS	150 watts	200 watts
Power Handling Peak	225 watts	300 watts
Power Handling Total	600 watts	800 watts
Nominal Impedance	8 ohm	8 ohm
Frequency Response (± 10dB)	56Hz-20kHz	48Hz-20kHz
Sensitivity (1w, 1m)	94dB	95dB
Crossover Frequency	2.5 kHz	2.5 kHz
Maximum SPL	122dB	124dB
Input Connectors	(2) Parallel ¼" Phono Jacks (2) Parallel Neutrix 4-pole Speak-on	(2) Parallel ¼" Phono Jacks (2) Parallel Neutrix 4-pole Speak-on
Weight	28 lbs (12.7 kg)	36 lbs (16.3 kg)
Dimensions	10½" H x 28¾" W x 14¾" D 26.7cm x 72.7cm x 37.9 cm	12½" H x 34¾" W x 17¾" D 30.6 cm x 88.3 cm x 43.7 cm

2028 & 20210

SINGLE REFLEX BANDPASS SUBWOOFER

ADVANTAGES OF BANDPASS DESIGN

The bandpass design offers many distinct advantages over traditional vented subwoofers —No External Crossover Required.

Louder - 97dB (1w,1m) - Much more efficient than front loaded designs.

More Power - Up to 1200 watts Total Power Handling.

Less Distortion - Eliminating the high frequencies reduces upper harmonic distortion. Improved Reliability - The sealed upper chamber helps protect the subwoofer from excursion damage caused by demanding low frequencies. In addition, the woofer is fully encased within the cabinet, protecting it from physical damage.

Dado interlocking construction, Oriented Strand Board (OSB), Heavy-duty handles, Rugged, interlocking corner pieces, A 1½" pole mount cap is included for mounting of a full range speaker. The ATLAS ET26 black steel mounting pole is available as an accessory.

MODEL	20115S
Type	Bandpass Subwoofer
Power Handling RMS	300
Power Handling Peak	425
Power Handling Total	1200
Nominal Impedance	8 ohm
Frequency Response (± 10dB)	34Hz-130Hz
Sensitivity (1w, 1m)	97dB
Woofer Size	15"
Maximum SPL	128dB
Input Connectors	(2) Parallel ¼" Phone Jacks (2) Parallel Neutrix 4 pole Speak-on
Weight	63 lbs (28.5 kg)
Dimensions	28¾"H x 22¾"W x 17¾"D 73cm x 57.8cm x 44.8cm

Atlas Sound, a world leader in commercial sound technology, unveils a new program to give Contractors the products they need at the price they need them—The Contractor Focus Item program (CFI).

Contractor Focus Items (CFI) are highlighted to provide an "at a glance" direction for contractors and specifiers looking for the absolute best value in commercial sound products in the industry.

See your Atlas Rep for a demonstration of these new products and an explanation of how the CFI program can benefit you.
