iPad Installation and Configuration

Search iMaxCam HD to find the software in the App Store.
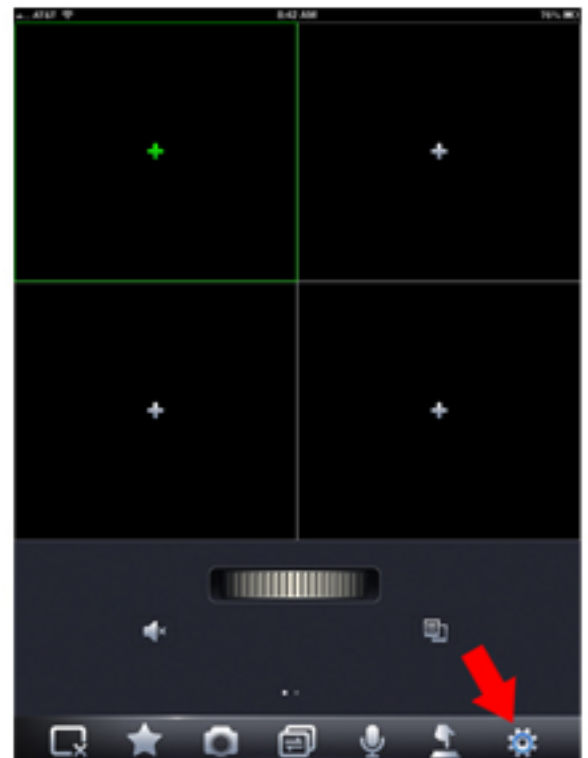

Click the iMaxCam HD software to begin the installation.

Click iMaxCam HD icon and the initial interface is shown as below.

After the app launches, tap the gear icon in the bottom right corner of the screen.

Tap the Add button in the top right corner to enter your DVR/NVR login information.

Below you will see that we have added the Worldeyecam demo system login information. These settings should match your own login information for your DVR/NVR. After you are done entering you information be sure to tap the save button in the top right corner.
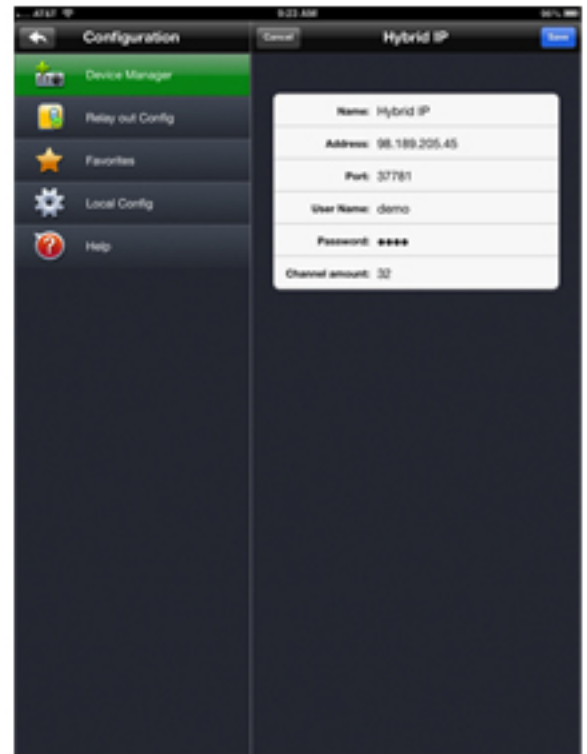

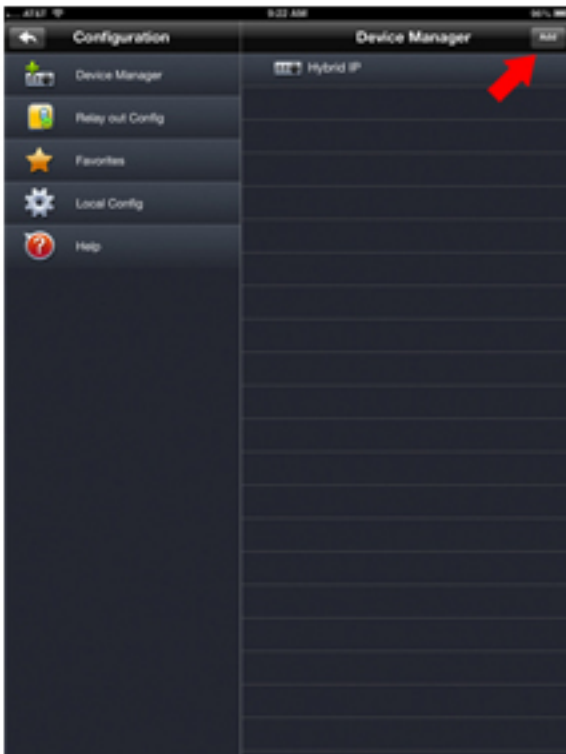

After entering your login
information, tap the DVR/NVR
you wish to view.

Next select the cameras you
would like to view.
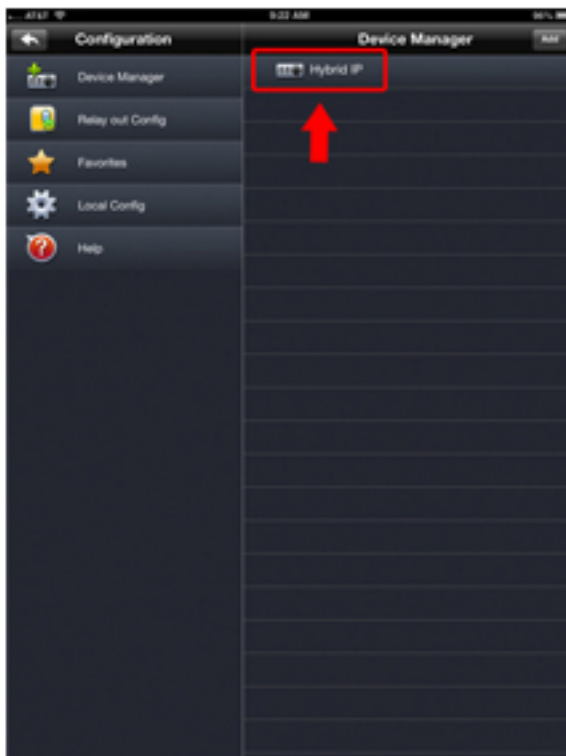

iPad will display 16 channels at once.

Several different screen arrangments are available.
