

ZONE-LO

Zone (Line Out Only) Controller

Zone (Line Out Only) Controller Overview

Advanced Network Device's (AND) devices are Power over Ethernet (PoE, PoE+) and require only an Ethernet cable with an RJ-45 connector to connect to existing data networks. You can broadcast simultaneously to both phones and speakers. When you implement an AND zone controller you can connect to your existing amplifier, making your existing analog speakers IP enabled.

Features

Built in Web Server:

- Configurable volume
- Device status
- Field upgradable

Easy Installation:

- Only requires CAT 5 connection to network, up to 300 ft.
- Power over Ethernet
- Green LED power on indicator

Interfaces:

- RJ-45 Ethernet line
- Unbalanced line level audio out via RCA connector
- Line Out signal level is up to 2 Vpp

Multicast:

- Full multicast and broadcast support. Send audio to individual devices, all devices or groups of devices (when combined with additional AND zone controllers).

Sound Masking:

- Generate configurable pink noise programmatically.

Options:

- Wall mount option included
